CHINESE MANIPULATION & REHABILITATION MEDICINE

No. 21 2010

Contents in Brief

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Primary research on artesunate inhibiting human hepatoma cell lines HepG2 cells growth and its mechanisms | (1) |
| The pituitrin the fibroid rejects in the technique under the peritoneoscope the application effect to observe | (3) |
| 61 examples non—cellule lung cancer 3D—CRT radiotherapy clinical result | (4) |
| Probes “Immortal Gives Principle Wound Sonchus asper Secret recipe” the Chinese medicine bone traumatology department surgery study thought— Concurrently theory “to execute the technique dialectically” | (6) |
| Protects the problem analysis and the countermeasure which in the trouble communication exchange exists study | (7) |
| Discussed shallowly the community culture is restored to health the medical service to the senior citizen to affect | (9) |
| The plate prominent sickness patient despondent psychology investigation and psychological nursing intervenes to the neck between | (10) |
| The child respiratory tract gathered the butcher virus the molecular biology to examine | (11) |
| Early time nursing intervenes to the gestation period diabetes pregnant woman and the newborn affects | (12) |
| The health education to enhances the natural childbirth rate to affect | (14) |
| Awoke the brain static inoculation fluid to acute cerebral hemorrhage patient blood serum C response protein level influence | (15) |
| 53 examples breath failure patient life—support machine relevant pneumonia clinical to analyze | (17) |
| The community intervened 2 diabetics to comply studies | (18) |
| Rehabilitation Nursing Research of Stroke Patients | (19) |
| The maintenance hemodialysis concurrent cerebral hemorrhage 24 examples clinical analyze | (20) |
| After the thrombosis passes in the treatment the small amount cerebral hemorrhage patient to have the apoplexy despondent clinical to study | (21) |
| The young child stubborn cough doctor practicing western medicine therapy clinical studies | (23) |
| Clinical tracheotomy technique application and complication research | (24) |
| Susceptibility of the respiratory virus infection and expressions of related cytokines in atopic infants | (25) |
| Liver cirrhosis patient to lose sleep the reason analysis and nursing measure | (27) |
| Under the critically ill guardianship hospital ward the respiratory tract infects the verdigris pseudomonad the drug resistance to analyze | (28) |
| Nursing intervention after stock bone anemic necrosis technique application | (29) |
| After the early controllability activity prevention referred bends the tendon damage prosthesis adhesion | (30) |
| Rectal Cancer patient blood serum TPA,CA242 and CEA union examination clinical significance | (32) |
| Patient—controlled intravenous analgesia with sufentanil in elderly patients after total hip replacement | (33) |
| Brain flesh wound sequential function barrier clinical analysis and nurses | (34) |
| After the bone fracture technique nurses using the analgesia pump complication | (35) |
| The pregnancy merge lacks the iron anemia the intervention and nurses | (37) |
| The peritoneoscope gallbladder excision method and the small margin gallbladder excision method clinical contrasts | (38) |
| The observation of effects in treating the mild or moderate Adolescent Idiopathic Scoliosis with brace and Chinese manipulation | (39) |
| Beautiful Sha Tong to maintain treats(MMT)the research to progress | (41) |
| The digestive ulcer perforates the treatment the progress | (42) |
| Syndrome shallowly dialectically” the mechanism and method of treatment | (43) |
| The spinal cord cervical vertebra gets sick early diagnosis and massage treatment | (44) |
| Massage and the hauling treats Cervical vertebra To get sick 106 examples to observe | (45) |
| Bacterium endotoxin inspection in endotoxin blood sickness treatment clinical practice | (47) |
| Initially searches the deathbed care | (48) |
| The spoken language area water needle injection brain protein hydrolysate inoculation the aphasia patient’s recovery curative effect observation | (49) |
| Distress shell Sha Tan observes to 2 diabetes nephrosis micro albuminuria curative effect | (50) |
| Supersonic general survey fatty liver clinical significance | (51) |
| Had discussed shallowly the obese | (52) |
| The duodenum uncinariasis and ulcer send the digestive tract hemorrhage the distinction diagnosis to realize | (52) |
| Urokinase uses in glaucoma technique after—filtration excessively impeded clinical observation | (53) |
| Austria executes Kangting to treat cancer ache 85 example clinical observation | (54) |
| Uremia hemodialysis patient inflammation designated object the change and significance | (55) |
| The pretage placenta splits the palace to produce postpartum hemorrhage clinically to analyze | (56) |
| Inflammation amber rather inoculation fluid treatment external disease factors high hot symptoms curative effect to observe | (57) |
| Heart stabbing pain Mongolian medicine card to diagnose | (58) |
| Discusses the woman menopause the colporrhagia clinical diagnosis and the analysis | (59) |
| Comfortable nursing on thyroid gland surgery patient’s application | (60) |
| Heart internal medicine department nurses the security problem discusses | (61) |
| 120 examples ICU heavy brain flesh wound condition monitor and nursing | (62) |
| 50 examples single nostril sinus sphenoidalis admission passage micro excision pituitary tumor the comfortable nursing | (63) |
| Discussed shallowly protects the trouble communication skill | (64) |
| 86 examples upper gastrointestinal hemorrhage nursing realizes | (65) |
| The long request rather to treat the organic phosphorus pesticide poisoning nursing to realize | (66) |
| Pregnancy induced hypertension(preeclampsia)Nursing | (67) |
| Acute cardiac arrest to dissolve the hitch to treat nurses | (68) |
| Causes postpartum hemorrhage and nursing case study | (69) |
| Analyze nursing defects of transfusion on 15 patients | (70) |
| After 40 example entire stomach excision method in the early intestines the nutrition observation and nurses | (71) |
| Common internal medicine department nursing flaw reason analysis and countermeasure | (72) |
| Nerve internal medicine department nurses the security the influence factor and guard measure | (73) |
| Nerve internal medicine department clinical nursing security hidden danger analysis | (74) |
| Chronic lung source heart disease clinical nurses | (75) |
| The nerve internal medicine department in hospital patient common accident preventive nurses | (76) |
| Vein leaving alone needle to realize in nerve internal medicine department application nursing | (77) |
| Nerve internal medicine department old age patient’s nursing realizes | (78) |
| The detachment of retina patient’s surgery nurses | (79) |

按摩与康复医学

2010年7月第3期(下旬刊) 总第21期

国内统一刊号:CN44-1667/R
