CONTENTS

Experimental study on seismic performance of pin-connected steel frame-self-centering-energy-dissipation bracing substructure *Shu Ganping, Li Ran* (187)

Analysis on the torsion effect of box girders with corrugated steel webs considering local longitudinal stiffness of webs *Zhang Yuanhai, Sun Chengcheng* (195)

Experimental study on orthogonal slab laying direction of discretely connected precast RC floor diaphragm under vertical load *Pang Rui, Zhang Lanbo, Liang Shuting, Zhang Tianpeng, Wang Wenkang* (202)

Experimental study on mechanical properties of cross-laminated bamboo slabs after one-sided fire *Lü Qingfang, Wang Weiyang, Liu Ye* (212)

Precision analysis and civil application of multi-camera digital image correlation method based on encoded targets *Wei Kang, Yuan Fang, Dong Zhiqiang, Shao Xinxing, Wu Gang, He Xiaoyuan* (219)

Pressure loss of internal dry air supply dehumidification system in main cable of suspension bridge *Chen Wei, Shen Ruili, Wan Tianbao, Ling Qi, Wang Zhongbin, Zhou Zhubing* (227)

Impact factor of railway extradosed cable-stayed bridge considering multi-factors *Lin Pengzhen, Wang Yapeng* (235)

Experimental study on strength and failure mode of strongly weathered mudstone with weak interlayer *Fu Xudong, Lu Jizhong, Huang Bin, Zhang Yuting* (242)

Mechanical properties of composite dowel shear connectors in corrugated steel-concrete composite bridge decks *Huang Pingming, Kong Fanlei, Peng Shouchong, Mei Kuihua* (249)

Optimization of TMD for vibration reduction of wind turbine under seismic excitation *Liang Ruijun, Wang Hao, Gao Hui, Xu Zidong, Li Aiqun* (256)

Quality sampling inspection plan by quantity for cement mixing piles *Zeng Biao, Zhu Jingjing, Ge Haiming, Zhang Dingwen* (264)

Mesoscale fracture analysis on concrete based on cohesive zone model *Zhou Zhengfeng, Kang Yufeng, Luo Junhao, Zhang Haopeng* (270)

Application of in-situ borehole shear tests in supporting design of roadbed slope *Zhang Zhichao, Ye Longzhen, Chen Junxin, Luo Xuan, Tang Xuefeng* (278)

Seismic design method for building basements considering soil-structure interaction *Qiu Yanjia, Zhang Hongru, Yu Zhongyang* (285)

Calculation method for frost heave force of tunnel with broken surrounding rock in seasonal frozen area and its engineering application *Cui Guangyao, Ma Jianfei, Wang Xuelai, Hou Zhan'ao, Wang Daoyuan* (294)

Curve-fitting method for settlement based on staged loading condition and its engineering application *Ying Hongwei, Huang Zhaojiang, Ge Hongbin, Shen Huawei, Wang Kuihua, Gong Xiaonan* (300)

Prediction model for liquefaction-induced lateral spread displacement based on GMDH *Duan Wei, Cai Guojun, Yuan Jun, Liu Songyu, Dong Xiaoqiang, Chen Ruifeng, Liu Xuening* (306)

Collapse analysis on steel frame structure under compartment fire based on sub-structure model *Ren Wen, Zhao Jincheng* (312)

Drained creep test and component creep model of soft silty clay in Hangzhou Bay *Deng Huiyuan, Dai Guoliang, Qiu Guoyang, Chen Zhishou, Lin Xin* (318)

Reconstruction and analysis of asphalt pavement texture using bilateral narrow angle photography *Chen Jun, Zhou Ruoyu, Kuai Chenchen, Sheng Zhiyan, Chen Qian* (325)

Calculation of road section traffic carrying capacity and timing optimization model of intersection under signal control *Lu Kai, Wang Li, Wu Wei, Deng Xingdong* (333)

Optimization of non-equal periodic preventive maintenance based on hidden semi-Markov degradation model *Su Chun, Li Le* (342)

Hardware implementation of anti-jamming circuit of GNSS receiver *Wang Yiting, Chen Jie, Yang Ying, Liu Xueyong, Li Jian, Ba Xiaohui* (350)

Algorithm and assessment of GPS/Galileo combined regional augmented PPP *Wang Siyao, Tu Rui, Li Qin, Lu Yangwei* (357)
