CONTENTS

CFD simulation of water-air coaxial nozzle in triple-pipe high-pressure jet grouting device	Zhang Feng, Li Jian, Deng Yongfeng, Lü Jianhong, Xu Chuanlong, Ke Han (623)
Low carbon design optimization of integrated energy system with urban thermal power plant as core	Tao Guangyue, Zhong Wenqi, Chen Xi, Zhou Guanwen (631)
Rapid prediction of three-dimensional velocity field of pulverized coal boiler based on CFD and POD	Li Tianyu, Chen Xi, Zhong Wenqi (641)
Experimental study on CO ₂ gasification characteristics of municipal solid waste based on Ni-based catalysts	Gao Ke, Liu Qian, Meng Zhuhui, Zhong Wenqi (650)
Experimental study on enhancement of ultrasonic and TiO ₂ nanoparticles on NH ₃ -H ₂ O-LiBr solution bubbling absorption	Wang Minqi, Zhou Runfa, Jin Zhenghao, Li Shuhong, Feng Lijie (658)
Pb ²⁺ adsorption characteristics and mechanism of corn stalk biochar produced by fluidized bed	Liu Lingqin, Huang Yaji, Hu Huaqun, Cao Jianhua (666)
Flexural carrying behavior of steel plate-concrete composite continuous slab	Chen Yuli, Sharmila Raut, Liu Lu, Li Minghong, Zong Zhouhong (676)
Analysis on coupled vibration of train-bridge system by considering wind and wave correlation	Cui Sheng'ai, Guo Chen, Zhang Meng, Zeng Huijiao, Liu Pin, Zhu Bing (684)
Analysis on ultimate bearing capacity of web-connected replaceable shear links based on tensile field theory	Yin Zhanzhong, Xu Shaobo, Feng Dazhe, Yang Bo (690)
Test and evaluation method for mixing uniformity of soil stabilization/modification	Deng Tingting, Liu Hang, Zhang Feng, Deng Yongfeng, Xu Chuanlong, Ke Han (697)
Triaxial creep test and model analysis of unsaturated saline soil	Yu Yunyan, Luo Chongliang, Wang Kun, Yue Jianping, Gao Chun, Tian Xiaopeng, Zhang Ruicheng, Xue Peng (704)
Experimental study on sand solidification and optimization of EICP in different temperature environments	Wang Hengxing, Miao Linchang, Sun Xiaohao, Wu Linyu, Fan Guangcai (712)
Strength evolution model of basalt fiber reinforced concrete under dry-wet cycles of sulfate solutions	Gan Lei, Feng Xianwei, Shen Zhenzhong, Zheng Guanghe (720)
Analysis of infrared radiation heating wavelength range of asphalt pavement	Ma Dengcheng, Chen Chao, Gui Xue (730)
Research on modification and recycling of high viscosity asphalt based on molecular dynamics simulation	Zhu Yajing, Xu Guangji, Ma Tao, Fan Jianwei (736)
Effect of steam curing system on the early mechanical property and microstructure of ultra-high performance concrete	Wu Jiandong, Guo Liping, Cao Yuanzhang, Qin Yaoyi (744)
Laboratory investigation on improvement of waterproof curtain in silt layer of Nanjing Yangtze River floodplain	Ding Jianwen, Guo Chen, Wang Tao, Zhang Sai, Hao Gang, Jiao Ning (753)
Offline reinforcement learning for eco-driving control at signalized intersections	Zhang Jian, Jiang Xia, Shi Xiaoyu, Cheng Jian, Zheng Yuebiao (762)
Train rescheduling of urban rail transit under bi-directional interruption in operation section	Zhou Weiteng, Qian Lei, Han Baoming, Ran Jiangliang (770)
Optimization model of transit line overlapped with rail based on continuous approximation	Liu Yuan, Luo Xiaoling (780)
Car-following model considering road gradient and preceding vehicle information in vehicle-infrastructure cooperation environment	Chen Long, Liu Mengxie, Cai Yingfeng, Liu Qingchao, Sun Xiaoqiang (787)
Research on merging interactions in weaving area based on multiple adaptive regression splines	Li Gen, Zhai Wei, Wu Lan, Tang Xiang (796)
Experimental study on influencing factors of microbial gas production performance	Deng Wenni, Wu Zhiwei (806)
Damping strategy of virtual synchronous generator based on active power deviation feedforward	Li Yang, Qi Rong, Deng Fei, Lin Hui (816)
