

# 智能计算机与应用

第 8 卷 第 4 期

2018 年 8 月 28 日出版

## 目 次

|                               |                                     |
|-------------------------------|-------------------------------------|
| 在流滑动窗体上挖掘 Top-K 高效用项集的有效算法    | 郭世明, 金代亮, 高 宏 ( 1 )                 |
| 基于 Web 产品协同设计系统关键技术的解决        | 邵秀丽, 李慧超, 王景军, 姚萌萌 ( 10 )           |
| 远距离输砂在线效益优化自动控制系统             | 王 帅, 王二永, 项 恒, 黄宪中 ( 17 )           |
| 云环境下电力交易的数据服务研究与实现            | 凌志扬, 闫红漫, 张 弘 ( 22 )                |
| 基于组合范数的单一方向运动模糊图像盲复原          | 陈文标, 孙圣姿, 万 源 ( 27 )                |
| 基于 Lucene 的教学资源垂直检索的研究与实现     | 安倩楠, 高东怀, 刘 健 ( 33 )                |
| 动态异构冗余的 Web 威胁感知技术研究          | 李卫超, 冯俊龙 ( 37 )                     |
| 混淆恶意 JavaScript 代码的多特征检测识别与分析 | 曲文鹏, 赵连军, 邓 旭 ( 42 )                |
| 不同载荷下压缩机的气动特性动态监测与控制          | 逯佳旺, 李 华 ( 48 )                     |
| 一种基于多义词向量表示的词义消歧方法            | 李国佳, 赵莹地, 郭鸿奇 ( 52 )                |
| 无源节点上一种多任务内核的设计与实现            | 文 豪, 高 宏, 程思瑶, 赵 旭 ( 57 )           |
| 基于 Kinect 的虚拟试衣相关技术的研究        | 万 燕, 陈林下 ( 63 )                     |
| 新浪微博与 Twitter 的特性对比研究         | 秦海龙, 刘 挺 ( 69 )                     |
| 基于 BlockChain 的数字媒体版权保护方法研究   | 邵 娜, 李晓坤, 郑永亮, 陈虹旭, 刘 磊, 杨 磊 ( 73 ) |
| FCM 聚类算法在岩石图像分析中的应用           | 程国建, 宋博敬 ( 78 )                     |
| 大数据环境中群智能算法的应用研究              | 张敏辉, 杨 剑 ( 81 )                     |
| 基于深度学习的银行卡交易反欺诈技术研究           | 窦路路, 石秀金 ( 85 )                     |
| 基于迭代主成分分析的哈希算法研究与实现           | 李志韩, 王洪亚 ( 88 )                     |
| 基于互联网技术的物流终端配送模式的创新研究         | 周 冰 ( 92 )                          |
| 基于 APOCS 的点云去噪算法              | 李刚森, 程远志 ( 96 )                     |
| 基于 Hadoop 的 Web 医疗咨询数据分析系统的实现 | 万方数据                                |
|                               | 张国锋 ( 103 )                         |

|                                  |                                    |
|----------------------------------|------------------------------------|
| 基于柯西变异的自适应花授粉算法                  | 王兴凡, 孟继志 (106)                     |
| 基于 Python 的反反爬虫技术分析与应用           | 余豪士, 匡芳君 (112)                     |
| 基于 OWASP 的微信系统安全性分析              | 张建珍 (116)                          |
| 基于 HMM 的通信流量异常检测                 | 张天雄 (121)                          |
| 基于众包的钻井物料数据仓库 ETL 系统研究           | 周 洁 (125)                          |
| 基于用户需求的城市公交调度算法研究                | 易 星 (129)                          |
| 基于 DiffServ 体系的 QoS 实现特定业务服务质量   | 金伟超 (132)                          |
| 基于 R 语言的成绩分析方法                   | 栾若星 (136)                          |
| 基于嵌入式 ARM 的天然气出口流量检测仪设计          | 郭建良, 杨 凯 (140)                     |
| 基于 Echarts 的地铁屏蔽门数据监控系统的实现       | 杨 娇, 陈 强, 王加宾, 梁鉴如, 周 玲 (144)      |
| 一种防失足讲台探测器的设计                    | 汪 燕 (149)                          |
| 基于 STM32 的智能植物照料系统设计             | 陈 曦, 董玉华, 杨 姚, 李 莹, 涂 耸, 王宇航 (153) |
| 网络学习空间发展的研究                      | 江 红 (157)                          |
| 数字管道竣工图审核标准                      | 亢 健 (160)                          |
| 防空导弹的信号波束输出连通性测试技术优化             | 王艳庆 (163)                          |
| 基于 Spring MVC 的高校学院学工助理系统的设计与实现  | 李天赐, 李璟璐, 于姗姗, 刘梓艺 (167)           |
| 社区书籍分享手机 APP 系统的设计与实现            | 吴浩源 (170)                          |
| 基于 Wagtail 的校园信息分享系统的设计与实现       | 刘奇灿 (175)                          |
| 基于微信小程序的高校图书服务系统的设计              | 刘 霖, 李德帅, 胡家麟, 石建鑫 (178)           |
| Excel 在企事业单位中技能需求的探索研究           | 文 静 (182)                          |
| 物联网养老影响因素研究                      | 滕 婕, 顾亚楠 (185)                     |
| 基于 Java 的中小型宾馆管理系统的研发            | 杨优优, 郑向阳 (189)                     |
| 浅谈物联网在中国的发展                      | 杨晓静, 胡雅妮, 孙琦超 (192)                |
| Apriori 算法在大数据集上的高效应用            | 陈邦豪 (195)                          |
| 基于 SQL Server 与 C# 的图书管理系统的设计与开发 | 周 涛, 徐 晓 (199)                     |
| 基于 thLSH 的快速闭环检测方法               | 姜海洋, 朴松昊, 张祖亮 (203)                |
| 万方数据                             |                                    |

# Intelligent Computer and Applications

Vol.8 No.4 2018-8-28

## CONTENTS

|   |  |
|---|--|
| TK-HIS: An efficient algorithm for mining Top-K high utility itemsets over a stream sliding window<br>..... | <i>GUO Shiming, JIN Dailiang, GAO Hong</i> ( 1 )                                   |
| Solution of key technology of Web-based product collaborative design system<br>.....                        | <i>SHAO Xiuli, LI Huichao, WANG Jingjun, YAO Mengmeng</i> ( 10 )                   |
| An automatic control system of long distance on-line sand transport benefit optimization<br>.....           | <i>WANG Shuai, WANG Er-yong, XIANG Heng, HUANG Xianzhong</i> ( 17 )                |
| Research and implementation of the data service of electricity trading in cloud environment<br>.....        | <i>LING Zhiyang, YAN Hongman, ZHANG Hong</i> ( 22 )                                |
| Blind restoration of motion blurred image in single direction based on combination norm<br>.....            | <i>CHEN Wenbiao, SUN Shengzi, WAN Yuan</i> ( 27 )                                  |
| Research and implementation of the teaching resources vertical retrieval based on Lucene<br>.....           | <i>AN Qiannan, GAO Donghuai, LIU Jian</i> ( 33 )                                   |
| Research on dynamic heterogeneity redundant Web threat awareness technology<br>.....                        | <i>LI Weichao, FENG Junlong</i> ( 37 )   |
| Multi-feature detection identification and analysis of obfuscated malicious JavaScript code<br>.....        | <i>QU Wenpeng, ZHAO Lianjun, DENG Xu</i> ( 42 )                                    |
| Dynamic monitoring and control of compressor aerodynamic characteristics under different loads<br>.....     | <i>LU Jiawang, LI Hua</i> ( 48 )   |
| A word sense disambiguation method based on polysemy vector representation<br>.....                         | <i>LI Guojia, ZHAO Yingdi, GUO Hongqi</i> ( 52 )                                   |
| The design and implementation of a multi-tasks kernel on the IEA energy harvesting sensor node<br>.....     | <i>WEN Hao, GAO Hong, CHENG Siyao, ZHAO Xu</i> ( 57 )                              |
| Research on real-time virtual fitting system based on Kinect<br>.....                                       | <i>WAN Yan, CHEN Linxia</i> ( 63 )   |
| Characteristic comparison between Sina Weibo and Twitter<br>.....   | <i>QIN Hailong, LIU Ting</i> ( 69 )  |
| Research on digital media copyright protection method based on Blockchain<br>.....                          | <i>SHAO Na, LI Xiaokun, ZHENG Yongliang, CHEN Hongxu, LIU Lei, YANG Lei</i> ( 73 ) |
| Application of FCM clustering algorithm in rock image analysis .....  | <i>CHENG Guojian, SONG Bojing</i> ( 78 )   |
| Application research on group intelligence algorithm in the background of big data<br>.....                 | <i>ZHANG Minhui, YANG Jian</i> ( 81 )  |
| Research of bank card anti-fraud transaction based on deep learning<br>.....                                | <i>DOU Lulu, SHI Xiujin</i> ( 85 )   |
| Research and implementation of hash algorithm based on iterative principal component analysis<br>.....      | <i>LI Zhihan, WANG Hongya</i> ( 88 )   |
| Innovative research on logistics terminal distribution mode based on Internet technology<br>.....           | <i>ZHOU Bing</i> ( 92 )  |
| Denosing of point cloud based on Average Projections Onto Convex Sets<br>.....                              | <i>LI Gangsen, CHENG Yuanzhi</i> ( 96 )  |
| The implementation of Hadoop-based Web consulting medical data analysis system<br>.....                     | <i>ZHANG Guofeng</i> (103)   |
| Adaptive flower pollination algorithm based on Cauchy mutation<br>.....                                     | <i>WANG Xingfan, MENG Jizhi</i> (106)  |

|   |   |
|---|---|
| Crawler and anti-anti-crawler technology based on Python<br>.....   | <i>YU Haoshi, KUANG Fangjun</i> (112)                                     |
| Security analysis of WeChat based on OWASP<br>.....   | <i>ZHANG Jianzhen</i> (116)   |
| Anomaly detection for communication flows based on HMM<br>.....   | <i>ZHANG Tianxiang</i> (121)  |
| Research on crowdsourcing based drilling material DW ETL process system<br>.....  | <i>ZHOU Jie</i> (125)   |
| Research on urban public transport scheduling algorithm based on user needs<br>.....                                    | <i>YI Xing</i> (129)  |
| Implementation of specific service quality of QoS based on DiffServ system<br>.....                                     | <i>JIN Weichao</i> (132)  |
| The method of examination scores analysis based on R language<br>.....  | <i>LUAN Ruoxing</i> (136)   |
| Design of natural gas outlet flow detector based on embedded ARM<br>.....   | <i>GUO Jianliang, YANG Kai</i> (140)                                      |
| Implementation of data monitoring system of subway shielding gate based on Echarts<br>.....                             | <i>YANG Jiao, CHEN Qiang, WANG Jiabin, LIANG Jianru, ZHOU Ling</i> (144)  |
| Design of the platform edge detector to prevent slipping down<br>.....  | <i>WANG Yan</i> (149)   |
| Intelligent plant care system design based on STM32<br>.....  | <i>CHEN Xi, DONG Yuhua, YANG Yao, LI Ying, TU Song, WANG Yuhang</i> (153) |
| Research on the development of network learning space<br>.....  | <i>JIANG Hong</i> (157)   |
| Compilation of audit standards for digital pipeline completion drawings<br>.....  | <i>KANG Jian</i> (160)  |
| Optimization of signal beam output connectivity test technology for air defense missile<br>.....                        | <i>WANG Yanqing</i> (163)   |
| Design and implementation of the assistant system of students based on Spring MVC in universities and colleges<br>..... | <i>LI Tianci, LI Jinglu, YU Shanshan, LIU Ziyi</i> (167)                  |
| Design and implementation of mobile APP system for community books sharing<br>.....                                     | <i>WU Haoyuan</i> (170)   |
| Design and implementation of campus information sharing system based on Wagtail<br>.....                                | <i>LIU Qican</i> (175)  |
| The design of university library service system based on Wechat mini program<br>.....                                   | <i>LIU Lin, LI Deshuai, HU Jialin, SHI Jianxin</i> (178)                  |
| Research on the skill demand of Excel in enterprises and institutions<br>.....  | <i>WEN Jing</i> (182)   |
| Research on the influencing factors of the Internet of Things for the aged<br>.....                                     | <i>TENG Jie, GU Yanan</i> (185)   |
| Research and development of small and medium-sized hotel management system based on Java<br>.....                       | <i>YANG Youyou, ZHENG Xiangyang</i> (189)                                 |
| A brief discussion on the development of Internet of Things in China<br>.....   | <i>YANG Xiaojing, HU Yani, SUN Qichao</i> (192)                           |
| Application of Apriori algorithm on large datasets<br>.....   | <i>CHEN Banghao</i> (195)   |
| Design and development of library management system based on SQL Server and C#<br>.....                                 | <i>ZHOU Tao, XU Xiao</i> (199)  |
| Fast closed loop detection method based on thLSH<br>.....   | <i>JIANG Haiyang, PIAO Songhao, ZHANG Zuliang</i> (203)                   |
