

# Chinese Journal of Cancer

---

Volume 30 Issue 2 (Total 235) February 2011

## CONTENTS

### Focused Feature: NPC epidemiology and genetics

---

- 79 Nasopharyngeal carcinoma as a paradigm of cancer genetics  
Malcolm J. Simons
- 85 On the trails of markers and proxies: the socio-cognitive technologies of human movement, knowledge assemblage, and their relevance to the etiology of nasopharyngeal carcinoma  
David Turnbull
- 96 Ancient migration routes of Austronesian-speaking populations in oceanic Southeast Asia and Melanesia might mimic the spread of nasopharyngeal carcinoma  
Jean Trejaut, Chien-Liang Lee, Ju-Chen Yen, Jun-Hun Loo, and Marie Lin
- 106 Nasopharyngeal carcinoma in the Northeastern states of India  
Amal Chandra Katak, Malcolm J. Simons, Ashok Kumar Das, Kalpana Sharma, and Narinder Kumar Mehra
- 114 The prevalence and prevention of nasopharyngeal carcinoma in China  
Su-Mei Cao, Malcolm J. Simons, and Chao-Nan Qian
- 120 Detection of Stage I nasopharyngeal carcinoma by serologic screening and clinical examination  
Ming-Fang Ji, Yuan-Long Yu, Wei-Ming Cheng, Yong-Sheng Zong, Park Sze-Park Ng, Daniel Tsin-Tien Chua, and Mun-Hon Ng

### Review

---

- 124 Protein folding, protein homeostasis, and cancer  
John H. Van Drie

### Original Article

---

- 138 Association of a single nucleotide polymorphism at 6q25.1, rs2046210, with endometrial cancer risk among Chinese women  
Guoliang Li, Yong-Bing Xiang, Regina Courtney, Jia-Rong Cheng, Bo Huang, Ji-Rong Long, Hui Cai, Wei Zheng, Xiao-Ou Shu, and Qiuyin Cai

### Case Research

---

- 144 Nasal metastases from renal cell carcinoma are associated with Memorial Sloan-Kettering Cancer Center poor-prognosis classification  
Caroline Victoria Choong, Tiffany Tang, Wen Yee Chay, Christopher Goh, Miah Hiang Tay, Nor Azhari Mohd Zam, Puay Hoon Tan, and Min-Han Tan
