

Chinese Journal of Cancer

Volume 30 Issue 3 (Total 236) March 2011

CONTENTS

Editorial

149 Mouse models for cancer research

Wei Zhang, Lynette Moore, and Ping Ji

Review

153 Animal models of melanoma: a somatic cell gene delivery mouse model allows rapid evaluation of genes implicated in human melanoma

Andrea J. McKinney and Sheri L. Holmen

163 Oncogene interactions are required for glioma development and progression as revealed by a tissue specific transgenic mouse model

Lynette M. Moore, Kristen M. Holmes, Gregory N. Fuller, and Wei Zhang

173 Clinical microdialysis in neuro-oncology: principles and applications

J. Clay Goodman

182 Advancement and prospects of tumor gene therapy

Chao Zhang, Qing-Tao Wang, He Liu, Zhen-Zhu Zhang, and Wen-Lin Huang

Original Article

189 Pre-osteoblastic MC3T3-E1 cells promote breast cancer growth in bone in a murine xenograft model

Thomas M. Bodenstine, Benjamin H. Beck, Xuemei Cao, Leah M. Cook, Aimen Ismail,

J. Kent Powers, Andrea M. Mastro, and Danny R. Welch

197 Trends in outpatient breast cancer surgery among Medicare fee-for-service patients in the United States from 1993 to 2002

John Bian and Michael T. Halpern

204 Correlation of Skp2 overexpression to prognosis of patients with nasopharyngeal carcinoma from South China

Hui-Min Xu, Yi Liang, Qiong Chen, Qi-Nian Wu, Yun-Miao Guo, Guo-Ping Shen, Ru-Hua Zhang, Zhi-Wei He, Yi-Xin Zeng,

Fang-Yun Xie, and Tie-Bang Kang

213 Cost-benefit analysis of screening for esophageal and gastric cardiac cancer

Wen-Qiang Wei, Chun-Xia Yang, Si-Han Lu, Juan Yang, Bian-Yun Li, Shi-Yong Lian, and You-Lin Qiao
