

Chinese Journal of Cancer

- Liver cancer incidence and mortality in China
- Aging, stem cells, and cancer
- Identification of SNP-containing regulatory motifs
- Detecting and charactering regulatory elements
- Functional analysis with GO modules

CONTENTS

Editorial

- 153 **Cancer bioinformatics: detection of chromatin states, SNP-containing motifs, and functional enrichment modules**
Xiaobo Zhou

Review

- 155 **Discovery of molecular associations among aging, stem cells, and cancer based on gene expression profiling**
Xiaosheng Wang

Original Article

- 162 **Liver cancer incidence and mortality in China, 2009**
Wan-Qing Chen, Rong-Shou Zheng and Si-Wei Zhang
- 170 **Identification of SNP-containing regulatory motifs in the myelodysplastic syndromes model using SNP arrays and gene expression arrays**
Jing Fan, Jennifer G. Dy, Chungche Chang and Xiaobo Zhou
- 186 **Detection and characterization of regulatory elements using probabilistic conditional random field and hidden Markov models**
Hongyan Wang and Xiaobo Zhou
- 195 **GOMA: functional enrichment analysis tool based on GO modules**
Qiang Huang, Ling-Yun Wu, Yong Wang and Xiang-Sun Zhang
- 205 **The propensity for tumorigenesis in human induced pluripotent stem cells is related with genomic instability**
Yi Liang, Hui Zhang, Qi-Sheng Feng, Man-Bo Cai, Wen Deng, Dajiang Qin, Jing-Ping Yun, George Sai Wah Tsao, Tiebang Kang, Miguel Angel Esteban, Duanqing Pei and Yi-Xin Zeng
- 213 **Individualized leukemia cell-population profiles in common B-cell acute lymphoblastic leukemia patients**
Jian-Hua Yu, Jing-Tao Dong, Yong-Qian Jia, Neng-Gang Jiang, Ting-Ting Zeng, Hong Xu, Xian-Ming Mo and Wen-Tong Meng

Letter to the Editor

- 224 **sMICA and its emerging role as a prognostic and diagnostic indicator in systemic malignancies besides hepatocellular carcinoma**
Shailendra Kapoor
