

# Chinese Journal of Cancer

- The 150 most important questions in cancer research and clinical oncology
- Immunological effect of ablation combined with immunotherapy on solid malignancies
- Prognostic value of CD30 expression in extranodal natural killer/T-cell lymphoma

Volume 36 Issue 6 (Total 311) June 2017

## CONTENTS

### Research Highlight

- 245 **Rad51 inhibition sensitizes breast cancer stem cells to PARP inhibitor in triple-negative breast cancer**  
Dong Wang, Ruikai Du and Suling Liu

### Editorial

- 247 **The 150 most important questions in cancer research and clinical oncology series: questions 31–39**  
Edited by *Chinese Journal of Cancer*

### Review

- 252 **Immunological effect of local ablation combined with immunotherapy on solid malignancies**  
Yusuke Takahashi, Noriyuki Matsutani, Takashi Nakayama, Hitoshi Dejima, Hirofumi Uehara and Masafumi Kawamura

### Original Article

- 258 **CD30 expression in extranodal natural killer/T-cell lymphoma, nasal type among 622 cases of mature T-cell and natural killer-cell lymphoma at a single institution in South China**  
Yanfen Feng, Huilan Rao, Yiyang Lei, Yuhua Huang, Fang Wang, Yu Zhang, Shaoyan Xi, Qiuliang Wu and Jianyong Shao
- 267 **Association between DNA mismatch repair gene polymorphisms and platinum-based chemotherapy toxicity in non-small cell lung cancer patients**  
Jun-Yan Liu, Chen-Yue Qian, Yuan-Feng Gao, Juan Chen, Hong-Hao Zhou and Ji-Ye Yin
- 274 **Weekly taxane–anthracycline combination regimen versus tri-weekly anthracycline-based regimen for the treatment of locally advanced breast cancer: a randomized controlled trial**  
Qiu-Wen Tan, Ting Luo, Hong Zheng, Ting-Lun Tian, Ping He, Jie Chen, He-Lin Zeng and Qing Lv

### Correspondence

- 282 **Increased pathologic complete response are expected in HER2-positive and triple-negative locally advanced breast cancers**  
Kadri Altundag
