JOURNAL OF GUANGDONG UNIVERSITY OF TECHNOLOGY

Volume 41 Number 1 January 2024

CONTENTS

Feature Article
A Review of the Research Progress of Carbon Neutralization Technology in China
Smart Medical
Qualitative Analysis and Numerical Simulation of Generative Model of Tumor Lymphatic Vessels Under ECM Remodeling
Prediction of Adverse Drug Reactions Based on Knowledge Graph Embedding and Deep Learning Wu Ju-hua, Li Jun-feng, Tao Lei (19)
CT Diagnosis of Chronic Obstructive Pulmonary Disease Based on Slice Correlation Information
Liang Yu-chen, Cai Nian, Ouyang Wen-sheng, Xie Yi-ying, Wang Ping (27)
Individual Survival Analysis of Breast Cancer Based on Multi-task Recurrent Neural Network Banded Regression Model
Assessment of Causal Effects of Butylphthalide-acute Ischemic Stroke Based on Instrumental Variables
Lin Rong-ji, Chen Wei, Huang Zhi-xin, Cai Rui-chu (41)
Interference Suppression Method of Millimeter Wave Bioradar Based on Improved Singular Spectrum Analysis
Liu Zhen-yu, Li Cheng-guang, Wang Zi-bin (47)
Computer Science and Technology
Low Illumination Image Enhancement Algorithm Based on Generative Adversarial Network
Video Frame Anomaly Behavior Detection Based on Foreground Area Generative Adversarial Networks
Short Text Feature Extension and Classification Method Based on Semantic Embedding of Tags and Graph Convolution Network
A Least Squares Twin Support Vector Machine Method with Uncertain Data······ Liu Jin-neng, Xiao Yan-shan, Liu Bo (79)
Traffic Flow Prediction Based on Recurrent Independent Mechanisms······ Wen Wen, Jiang Jian-qiang, Cai Rui-chu, Hao Zhi-feng (86)
Comprehensive Studies
Optimized Design and Resource Allocation for Dual-server Mobile Edge Computing Systems
Li Yu-long, Liang Jing-xuan, Wang Feng (93)
The Implementation of Successive Cancellation Stack Decoder Based on Monotone Sorting and Parallel Comparison
Similarity Measure for String Sequences in Weighted Petri Net····································
Theoretical Study on Valence Band Structure of Strained Wurtzite GaN/AlN Quantum Well with Different Crystal Orientations
Liu Ya-qun, Li Xi-yue, Zhang Gary (119)
