# 广东化工

Guangdong Chemical Industry

第 37 卷 第 11 期 总第 211 期 1974 年 创刊 (月刊)

> ISSN 1007 - 1865 刊号 CN 44 - 1238/TQ

- ●全国石油与化工行业优秀期刊
- ●高、中级化工职称资格评审认定刊物
- ●中国核心期刊(遴选)数据库收录期刊

丰 管: 广东省广远石油化工集团有

限公司

主 办:广东省石油化工研究院

社 长: 麦裕良

主 编: 邹思民

出版发行:《广东化工》编辑部

发行范围: 国内外公开发行

地 址:广州市越秀区越华路 116 号

编: 510034

电话/传真: (020) 83302517 83336009

在线投稿: http://www.gdchem.com

#### 稿

二甲醚生产概况

印建和

#### 试验与研究

3 高取代度乙基纤维素的合成研究 谢传龙, 付时雨, 邢晓纯

5 分光光度法研究 Cr(VI)氧化苹果酸及乙二醇的催化反应动力学

范立,单金缓

7 嗜麦芽寡养单胞菌发酵产聚羟基烷酸酯的研究

李雪云, 付时雨, 李辉, 等

10 PbTe 微晶的水热法合成及表征 李金玉, 黄旭珊, 陈炜灿, 等 魏宏亮, 马存才, 楚晖娟, 等

13 壳聚糖缩糠醛 Schiff 碱合成研究 15 Zn(OAc)<sub>2</sub>/C-Al<sub>2</sub>O<sub>3</sub>催化乙炔气相法合成醋酸乙烯初探

蒋永州, 陈博, 何林, 等

17 一种共轭亚油酸抗脂减肥制剂的研究

李泳, 张兆霞

聚醚型阴离子水性聚氨酯乳液的合成及性能研究 19

苗丽芬,潘鹏,李伟,等

22 L-蛋氨酸多吡啶铜(Ⅱ)三元配合物的合成及与 DNA 的相互作用

池泉, 陈星

24 改性硅藻土对水体中 Pb2+的吸附性能研究 杨 丹,谢玉娟

26 超声波辅助提取朱砂七总蒽醌的工艺研究 王晓梅,苏安明,段虹,等

大孔树脂静态吸附 10-羟基癸酸特性的研究 张明月,高虹,王金凤,等 28

30 正交法对蓖麻油基混合生物柴油性能的研究 陈寅杰, 王标兵, 杨云峰, 等

33 黄连中小檗碱盐析法提取研究 王道武, 庞雪, 肖文, 等

35 纤维素黄原酸脂的制备及处理含铜废水的研究

李小保, 叶菊娣, 谭晓蕾, 等

37 山药多糖的抗衰老作用研究 梁亦龙,曾垂省,王允,等 向群, 廖业照

师传兴, 成兰兴

39 盐卤水生产阻燃剂氢氧化镁的工艺研究 41 王春燕,刘爱文,陈忻,等

超声波法提取紫苏中迷迭香酸条件的研究 夏枯草降糖成分提取工艺的优化

43 45 月桂酸的合成研究

郑清 张跃文

46 4-乙酰氨基苯甲酸乙酯的合成工艺研究

贺丽敏

陈宁

47 一种分散稳定剂的合成及应用

新型高效吸附剂 SA-1 的合成

马斐, 王颖, 陈昌青, 等

50 FCC 汽油加氢脱硫/降烯烃工艺技术的研究

苏国平,霍东亮,崔德强,等

52 双乙酸钠防霉剂的工艺研究

周孙进,谢彩梅,龙得金,等

丙烯酸树脂对光油乳液合成及性能的影响 张士军,郑军,梁文波,等 56

58 谭雪燕, 林杰喜 甘蔗黄原酸酯处理六价铬的研究

60 马内共聚物分子量分布的研究 李胜兵,刘玥,杨俊峰

62 头孢拉定的合成研究

离子交换树脂分离富集 Cr(VI)和 Cr(III)的研究和应用 高小龙

64 66 癸二酸二正己酯的催化合成 夏先伟, 王德堂, 刘焕

68 于雪云

一种新溶剂体系对改性氢氧化镁的分散性研究

#### 专论与综述

54

69 耐热 SAN 开发与应用进展 71

邱琪浩, 周文斌, 吴尔旭

氢键对有机取代反应和加成反应的影响 文婕英,白林,朱彦荣 73 吴林弟,伍明华

纳米 TiO<sub>2</sub> 制备方法的研究概述

75 水体中重金属处理防治方法及其研究进展 张健,任芸芸,何小茹,等

77 活性氧化铝制备及改性 马云杰, 黄高山

79 耐水硅胶材料的制备及研究进展 王力, 朱丽丽

81

孙义军, 黄乐, 何群, 等

蛋白激发子研究进展

李文明, 李红然, 付大友 84 空气净化器研究进展

85 中国涂料工业技术的发展今昔 谢彩梅, 周孙进, 龙得金, 等

87 CO 加氢合成低碳混合醇催化剂研究进展 唐星星,钱胜涛,肖二飞,等

89 5a-还原酶抑制剂度他雄胺的研究进展 付欢,赵蓉,李成

90	大然气制备合成气的技术进展 黄尿胜,		本期基金项目文章导读
92	新型实训技术-仿真工厂 李培,	מת	高取代度乙基纤维素的合成研究

         Fast Analysis of 11 Trace Chlorobenzene Compounds in Water by Capillary Gas Chromatography
  151
                                                                                                                                                           He Lizhi, Yang Zhimin, Zhou Chunyi
  153
         Evaluation on Uncertainty Measurement of Organic Matter in Soil
                                                                                                                                                                              Li Yongze, Xing Yan
         Determination of Carbonyl Compounds in Azelaic Acid by Spectrophotometry
                                                                                                                                                       Zeng Zhengce, Wu Hao, Su Jun, Zhu Jin
         The Microelement Zinc in Common Food was Determined by Atomic Absorption Spectrophotometry
                                                                                                                                                                             Yan Guifu, Xu Huigin

    Design & equipment

  159
        Selecting of Material is the Key to Pressure Vessel Design
                                                                                                                                                                                             He Min
        Technological Redesign for Natural Rubber Processing Wastewater Disposal System
  160
                                                                                                                                                            Li Zongliang, Jiang Yifan, Li Yanfei
         Application of Internal Circulation Anaerobic Reactor (IC) in Treating Wastewater
  163
                                                                                                                                                           Tian Peng, Lin Hongyong, Ma Weibo
  165
         Discussion about on the Management of Construction Machinery
                                                                                                                                                                                    Huang Yongrui
         Anti-interference Analysis of DCS System
  167
                                                                                                                                                                                         Wang Bing
       Experience communication
        Designing and Practice for Innovation of Physical Chemistry Experiment Mensuration of Surface Tension by Drop-weight Method
  169
                                                                                                     Wang Guangli, Pu Yinshi, Liang Xiujuan, Zheng Qiurong, Zhao Yong, Dong Yuming
         The Establishment and Application of Teaching System in Applied Chemistry Experimental Area Exploration in Analytical-chemistry Bilingual Teaching
  171
                                                                                                                                                 Wang Yi, Feng Huixia, Zhang Deyi, Li Siliang
  173
                                                                                                                                  Han Aixia, Lv Haitang, Ye Feian, Chen Haiying, Yang Yan
         Strengthen the Practical Teaching Section and Enhance the Engineering Accomplishment of the Students
  174
                                                                                                     Yu Xianglin, Chen Qiming, Guan Shilong, Fan Qingchun, Xiong Xiangzu, Yan Fuan
  175
         The Establishment of Experimental Teaching Model in Instrumental Analysis Course
                                                                                                                                                            Zhang Jin, Yao Sitong, Dong Siqing
  177
         Curriculum Setup of Specialty in Water Supply and Sewerage Engineering of Local Colleges and Universities at the New Period
                                                                                                                                                                                        Li Chuniuan
         Design and Application of Physical Chemistry Experiment Courseware in Pharmic Specialty
  178
                                                                                                                                      Xu Fei, Liu Xingping, Chen Jun, Wu Qinan, Chen Juan
         Construction and Practice on Material Chemistry Specialtyof the Colleges and Universities for Nationalities
  179
                                                                                                                                                                   Xie Guangyong, Zhang Aiqing
         The Application and the Development of the Technique of Chemical Engineering Simulation in Practice Teaching
  181
                                                                                                                                                                                          Liu Hailan
  182
        Engineering Education in Teaching Principles of Chemical Engineering Based on CDIO Model
                                                                                                                                                                         Ge Minglan, Song Yongji
        Exploration on Cultivation of ISO Internal Auditors to Materials Specialties in Application-Oriented Institutes—With Example of NanJing Institute of Technology
  184
                                                                                                                    Hang Zusheng, Ba Zhixin, Chu Yajie, Tan Linghua, Wang Zhangzhong
  186
         Exploring Innovation in Teaching the Principles of Chemical Engineering
                                                                                                                                                                            Li Zhizhou, Liu Junhai
  188
         Application Practice of Integrated and Design Experiment Methods in Food Biotechnology Teaching
                                                                                                                                    Xu Jinrui, Zheng Chuanjin, Huang Jianrong, Hou Fangli
  190
         Reformation and Innovation of Practical Teaching about Material Science and Engineering Specialty
                                                                                                                                             Yang Xuyu, Yang Ming, Nie Yujing, Zhu Xiufang
  192
         Neural Network and its Application on Analytic Chemistry
                                                                                                                                                                                       Zhu Qinglan
  194
         Study on Teaching of Chemistry English by Seminar Teaching Pattern
  196
         Research of Teaching Strategy on Principle of Chemical Engineering
                                                                                                                                                                                           Mu Feihu
  197
         Research and Practice on Specialty Construction of Nuclear Chemical Engineering and Nuclear Fuel Engineering
                                                                                                                                           He Chuhua, Liao Lifu, Peng Anguo, Xia Liangshu
  198
        Innovation and Practice of the Professional Comprehensive Chemistry Experimental Teaching System
                                                                                                                                             Tao Yanling, Guo Zhiyong, Wei Danyi, Wang Sui
  199
        The Teaching Reform of Chemical Basic Course in Independent Institute
                                                                                                                                                                     Xia Haoyun, Tang Xiaofang
  200
        Discussion of Inorganic and Analytical Chemistry Experiment
                                                                                                                                                                                      Guo Xiaogun
  202
        The Exploration for the Experimental Teaching of Chemical Engineering Principle
                                                                                                                       Yu Meiqiong, Yang Jinbei, Chen Guofen, Chen Xiuyu, Chen Wentao
  204
        The Exploration on Teaching Reform of Fermentation Engineering in College
                                                                                                                                                                            Li Sainan, Li Chongbi
  206
        Teaching and Practice of Chemical Reaction Process and Equipment
                                                                                                                                                                                       Zhou Guo' e
        The Cultivation of Students' Environmental Awareness in Chemical Experiment Teaching
  208
                                                                                                                                                                                    Zhang Zanyuan
 209
        Construction of the Chemical Experiment Teaching System for the Polymer Processing Major with Automative Specialty
                                                                                                                                                  Zhang Jun, Yang Ming, Nie Yujing, Li Zhihui
 211
        Exploration and Practice in Teaching Innovation of Basic Experimental Chemistry
                                                                                                                                                                                          Tang Ying
      New Technology & New craft
 213
        Present State and Trend in Development of Adhesive
                                                                                                                                                                                          Ye Zhiwei
        Ecological Environment Protection of Fangchenggang Coastal Waters
                                                                                                                                                                                    Zheng Daxiong
        A/O Bio-contact Oxidation Tank for Treatment and Reuse of Cellulose Industry Wastewater
                                                                                                                                                     Ruan Jun, Zhou Nanfang, Wang Changlin
 219
        Uncertainty of Total Nitrogen in Water by FI-Photometric Method
                                                                                                                                                                                           Pan Ling
        Analysis on Current Status of the Research of Acid Fluid System and Field Application
 221
                                                                                                                                                                                          Tang Lijie
        Brief Talk about Safety Management Deepened of City Gas
                                                                                                                                                                    Guo Changjiang, Li Yonghua
 225
        Food Contact Materials Exported to the USA-Investigation of Determination Conditions of the Extractives from Olefin Polymers
                                                                                                                              Yang Bei, Xu Jianfei, Liu Lifen, Fang Yongkang, Li Zhengjun
 227
        Bulk Mg-doped Spherical Lithium Cobalt Oxide Preparation and Characterization of Precursor
                                                                                Chen Mingfeng, Shen Hengguan, Zeng Yuewu, He Jinhua, Qian Zhiting, Cai Guoqiang, Shen Zhenlei
        New Process for the Synthesis of Ethylene Bis Stearamide
                                                                                                                                                                  Zhang Jianyu, Chen Changjian
 233
        Medicinal Grade Montmorillonite of Purification and Characterization
                                                                                                                                                                                           Hu Ailian
 237
        Treatment Design and Operation Management of the Cosmetics Sewage with High Concentrations
                                                                                                                                                                                     Su Zhaozhong
        Study on Preparation and Formation Mechanism of P(4HCA-co-DHCA) Copolymer Nanoparticles
                                                                                                                                   Shi Dongjian, Liu Xiaoya, Xu Yunsheng, Chen Mingqing
 241
        Study on Treatment of Copper-Containing Wastewater in Gold-Copper Deposit Field
                                                                                                                                                                                     Wu Luandong
 243
        Research Progress of Preparation and Application of Hyaluronic Acid
                                                                                                                                     Bai Huiyu, Xu Jing, Li Huijun, Yang Yiqun, Liu Xiaoya
 245
        Study on Inhibitive Effect of Complex Corrosion Inhibitors for Steel Rebar in SPS Solution
                                                                                                                                                                        Zeng Zhiwen, Chen Long
 247
        Parameter Measurement Method for PSA Design and Optimization
                                                                                                                                                                                      Long Chunxia
 249
        Study on Particle Size Determination of Fine Tale Powder by Laser Diffraction Method
                                                                                                                                                      Kuang Jiewei, Li Xuhui, Huang Huizhen
 251
        "Study on the Detection of Uric Acid by Electrochemical Sensor
                                                                                                                                                                          Zhang Ying, Ren Wang
 253
        The Measurements of Spray Characteristics
                                                                                                                                                                                       Liu Yuqiang
 255
        Vertical Oil Tank Bottom Leakage Field Distribution of Oil Seepage Based on Fluent Simulation
                                                                                                                                   Zheng Zhiwei, Zhao Lijun, Cheng Yuguan, Liu Hanming
 258
       Sample Pretreatment and Determination Methods for Polycyclic Aromatic Hydrocarbons in Soil
                                                                                                                                                                        Tu Yuehong, Liu Xixiang
 260
       IR Used for Research about Acid Number of In-used HTFs
                                                                                                                                                                                    Zhang Juguang
 262
       Progress of Nanomaterials by Sol-gel Process
                                                                                                                                                                     Jiang Hualin, Chen Pinghua
       Ultrasonic Extraction of Hyperforin and Its Assay with HPLC
                                                                                                                                          Liu Jianxiang, Li Yan, Wei Zhengxi, Fang Yinquan
 267
       On Exploration for Public Participation in Environmental Impact Assessment of Development Area
                                                                                                                                                                       Ling Weifeng, Li Huashou
eministration and the contraction of the contractio
