CONTENTS

Comprehensive Evaluation of Rigid Pavement Performance Based on Matter Element Model	ZHANG Luoli (1)
Study on Performance of Silica Fume Modified Rubberized Concrete	YANG Ruochong (6)
Study of Drainage Performance of Graded Crushed Stone and Base Drainage System	LI Wei (11)
Development of Heat Reflection Coating and Observation of Its Road Performance	FENG Decheng (17)
Research on Mechanism of Asphalt Film Transfer Based on Convective Mass Transfer Theory	TAO Xianghua (21)
Analysis on Pile-soil Lateral Dynamic Interaction under SH Harmonic Wave Excitation	LIU Linchao (25)
Analysis of Pile-soil Stress Ratio of Pile-supported and Geogird-reinforced Composite Foundation	ZHAO Minghua (29)
Comparative Study on Bridge Seismic Design Approaches in Different Specifications Based on Survey of Disaster in Wenchuan Earthquake (2)	GONG Jinxin (35)
Segment Method in Anchorage and Bearing Offset Design for Curved Cable-stayed Bridge	SUN Ceshi (47)
Study on Vertical Prestress Loss of PC Box Girder during Stretching and Anchoring Stage	YUAN Ming (53)
Experimental Study on Mechanical Behavior of Reinforced Concrete Flexural Beam with Corroded Deformed Bars ...	HAO Haixia (58)
Static Finite Element Analysis of Arch Bridge with V-shaped Rigid-frame	LIU Yuwen (66)
Numerical Identification of Wind Load Based on CFD Method for Rigid-frame Bridge with Long-spans and High-piers	WANG Runjian (72)
Finite Element Analysis on Ultimate Load of Alloy Aluminum I-beam	XIN Yabing (77)
Research on Torsion Behavior and Design Approach of Rectangular Concrete-filled Steel Tubular Members	WANG Wenda (83)
Study on Effect of Nitrogen Oxides on Tunnel Required Ventilation	WANG Yaqiong (89)
Study of Car-following Model Based on Minimum Safety Distance	XU Lunhui (95)
Analysis on Vehicle Driver's Driving Characteristics in Lane	LIN Guangyu (101)
Study on Hybrid Utility Model of Driver's Travel Choice	LIU Xinquan (107)
Research on Calculation Method of Bicycle Capacity at Signalized Intersection	YANG Xiaoguang (112)
Short-term Traffic Flow Forecasting Based on a Three-regime SETAR Model	LIU Tanqiu (122)
Dynamic Simulation and Implementation of Mixed Traffic Flow at Urban Road Intersection Based on Multi-Agent	YU Pei (128)
Requirements of Anti-glare Effect of Median Virescence under Different Conditions	XIAO Daiquan (133)
Research on Influencing Factors on Errors of Vehicle Fuel Consumption Measured by Carbon Balance Method Based on Vmas	ZHANG Xueli (138)
Analysis on Effectiveness of Fixed Partition Policy in Optimizing Inventory Routing	FU Chenghong (143)
Application of Extenics in Evaluation of Regional Logistics Development	LIU Jing (148)
Analysis on Planning of Shanghai-Nanjing Comprehensive Transportation Corridor Based on Economic Connection Potential Energy Model	WU Ming (153)
