**Trade Policy Uncertainty and Firm Saving Behavior : A Quasi-Natural
Experiment Study Based on China's WTO Accession**

Mao Qilin and Xu Jiayun

Based on the natural experiment of granting of Permanent Normal Trade Relation (PNTR) to China by the United States after China's accession to the WTO, this paper adopts a difference in difference method to empirically investigate the impact of trade policy uncertainty (TPU hereafter) on firm saving behavior. We find that TPU reduction significantly reduces firm saving rates, and such an impact is stronger after China's WTO Accession. The further Mechanism tests show that the promotion effect of TPU reduction on firm value added is larger than that on firm profit, furthermore, TPU reduction tends to raise firms' innovation intensity, increase intermediate imports as well as ease firms' financing constraints, thereby decreasing firm saving rates. We also find that the impacts of TPU reduction on firm saving rates depend on firm ownership and trade pattern; in addition, we provide evidence that TPU reduction via input-output linkages also contributes to the decline in firm saving rates, specifically, TPU reduction via downstream linkages significantly decreases firm saving rates, whereas the effect of upstream linkages is insignificant. This paper provides a novel explanation for Chinese manufacturing firm saving rates' evolution in the recent years from the perspective of trade policy variation, and it also enriches the literature on the economic effect of trade policy uncertainty.

Industrial Relocation, Elements Agglomeration and Regional Economic Development

Sun Xiaohua, Guo Xu and Wang Yun

Industrial relocation is an important way to optimize the spatial distribution of production factors and promote balanced development between regions. Different from previous research, this paper creatively constructs an industrial relocation index reflecting both scale and direction, and draws the industrial relocation map of labor-intensive, capital-intensive and technology-intensive industries based on the estimated results. Then the spatial characteristics of China's manufacturing industry relocation is summarized. Meanwhile, the agglomeration index based on the industrial linkage is designed, to estimate and compare the agglomeration level of manufacturing industries between the transferring and undertaking regions. Furthermore, with the sample of 30 Chinese provinces from 2004 to 2013, the intermediate mechanism of the influences of industrial relocation on the regional economic development through the factors agglomeration is tested. The results show that, with the increasing difference of regional cost, the "low-lying land effect", transferring to the surrounding developing regions, appears in the manufacturing industries of coastal developed regions. While the production factors of manufacturing industries in mid-west provinces continuously gather to the regional economic center, forming new comparative advantages. And the degree of manufacturing agglomeration keeps rising from 2004

管理世界杂志社与对外经济贸易大学联合举办 “纪念改革开放 40 周年学术研讨会” 通知

为全面回顾 40 年来波澜壮阔的伟大历史进程，深入总结改革开放和社会主义现代化建设新时期的成功实践经验与理论创新成果，推进经济和管理领域的政策研究与学术研究，管理世界杂志社与对外经济贸易大学将于 2018 年 9 月 15 日在北京举办“纪念改革开放 40 周年学术研讨会”。有关事宜通知如下：

一、围绕纪念改革开放 40 周年主题，征集经济和管理领域的政策研究与学术研究论文。征文投稿须是未公开发表或出版的原创论文，字数在 8000 字以上。征文投稿请登录《管理世界》网站 (www.mwm.net.cn)，在线投稿“纪念改革开放 40 周年”栏目。截稿日期：2018 年 8 月 31 日。

二、成立学术委员会，评选优秀论文。会议邀请优秀论文作者参会并就论文内容作学术交流，优秀论文经过修改完善后发表在《管理世界》2018 年第 10 期上。

三、组织召开“纪念改革开放 40 周年学术研讨会”。这次会议由管理世界杂志社与对外经济贸易大学主办，对外经济贸易大学国际经济贸易学院与《管理世界》经济研究院承办。上午举行开幕式，安排合影及茶歇，之后安排 5-6 位重量级专家做大会专题报告，下午安排“改革”、“开放”、“综合”三个分会场分别进行学术交流。

本次研讨会不收会务费，会议主办方为入选优秀论文提供一位作者的食宿费用，差旅费用自理。除入选论文作者外，本次研讨会还欢迎社会各界朋友参加会议，参会人员请填写参会报名表(请到管理世界杂志或对外经济贸易大学网站下载)后发送至：mingli@uibe.edu.cn(李老师)。报名截至 2018 年 8 月 31 日。

本次研讨会将在对外经济贸易大学举办，开幕式、学术交流会场及食宿安排将在正式议程中公布。
