关于举办“第三届中国家庭金融论坛”的启事

家庭金融作为微观金融的重要组成部分,正逐渐成为金融学的一个重要研究领域,其研究内容涵盖工商业、住房和金融资产、负债和信贷约束、收入和支出、社会保障和保险、代际转移支付、人口特征和就业、支付习惯等。在中国经济社会转型的重大时期,进行有关家庭金融的学术探讨具有重要意义。

本着为我国家庭金融研究方向学者提供一个高水平的学术交流平台,管理世界杂志社与西南财经大学经济与管理研究院定于2019年10月12日在成都举办“第三届中国家庭金融论坛”。

一、会议主题:围绕“家庭金融”相关领域,公开征集学术论文。不限主题,尤其欢迎使用中国家庭金融调查与研究中心(CHFS)数据撰写的论文。

二、投稿要求:征文投稿须是未公开发表和出版的原创论文,字数在15000字以上,格式按照《管理世界》杂志要求排版。征文投稿请登录《管理世界》官网(www.mwm.net.cn)投稿至“第三届中国家庭金融论坛”栏目,截稿日期为2019年9月15日。

三、会议论文评选:组织专家对应征论文进行匿名评审。组委会将在2019年9月30日前向入选会议论文作者发出正式邀请函。会议评选的优秀论文,推荐给《管理世界》接受审稿。符合要求的,优先安排发表。

四、会议流程:本次会议由管理世界杂志社与西南财经大学经济与管理研究院主办,中国家庭金融调查与研究中心承办。2019年10月12日上午举行开幕式,之后安排知名专家做大会主题报告,下午按研究主题进行分论坛学术交流。

五、参会方式:本次会议不收取会务费,交通和住宿费用自理。欢迎社会各界朋友参加会议,参会人员需填写报名表(请前往《管理世界》官网下载)后发送至: chfs_conference@sina.com,联系人:吴雨,联系电话:028-87352141。报名截止日期为2019年9月30日。

ABSTRACTS OF SELECTED ARTICLES

The Potential Fiscal Effects and Risk Prevention of the Tax Cut and Fee Reduction

Guo Qingwang

The tax cut and fee reduction policies that are continuously targeted, cost-reducing and long-lasting will undoubtedly reduce the burden on enterprises, and at the same time will bring enormous fiscal pressure on governments at all levels: not only will the size of the fiscal deficit be enlarged in the next three or four years, but also the extent to which the fiscal revenue system ruled by law will be weakened. In order to ensure the implementation of tax reduction and fee reduction policies and at the same time to prevent fiscal risks and ensure the healthy fiscal development, it is necessary to deepen fiscal reform and speed up the construction of a modern fiscal system.

Regional Inequality and Structural Change: China 1978~2016

Wang Chen, Wan Guanghua and Zhang Xun

This study constructs a theoretical model to explore how structural change affects regional inequality, showing an inverted U relationship between them. An analytical framework is then developed for decomposing a change in inequality into a component attributable to structural transformation and another to concentration or spatial agglomeration. Applying this framework to data from China confirms the inverted U pattern between structural change and regional inequality: First, after reforms, regional inequality decreased for a few years, and then depicted a rising trend. Second, structural change was the main driver of regional inequality before 2005. In addition, the agricultural sector was always inequality-reducing while the service sector was mostly dis-equalizing. These findings suggest policy measures be focused on the service sector and its balanced development, in order to contain China's overall inequality.

The Evolution and the Policy Selection in China's Industrial Upgrading:

Based on Product Space Perspective

Liu Shouying and Yang Jidong

Based on the Product Space Theory, this paper describes the China's products spatial change and industrial upgrading using export data from 1995 to 2016, which indicates the possible future direction of industrial transformation in China. The results show that: (1) China's export products with comparative advantages expand gradually from the periphery to the center in product space; (2) In compliance with the Principle of Proximity, the closer marginal products are to the existing products, the more likely they will transform into emerging products; (3) The China's export products spatial change strongly supports China's economic complexity and economic growth; (4) Chi-
