冶金流程工程学专刊

IRON&STEEL

CSM

中 国 金 属 学 会
钢 铁 研 究 总 院 主 办
北京钢研柏苑出版有限责任公司

目 次

编者按.....	(1)
----------	-----

专刊序言.....	(3)
-----------	-----

冶金流程工程学

冶金学的时代命题——打通流程,沟通层次,开新说	殷瑞钰 4
-------------------------------	-------

冶金流程工程学的典型应用.....	张福明, 顾建新 10
-------------------	-------------

高效低成本洁净钢生产实践探索	杨春政 20
----------------------	--------

棒材高效低碳生产技术与集成化应用	王新东, 常金宝, 李 杰 26
------------------------	------------------

钢铁制造流程系统节能与能效提升.....	张 琦, 蔡九菊 32
----------------------	-------------

培育产业发展新动能——打造钢铁竞争新优势	陈培敦, 亓海燕, 赵 刚, 刘 明, 殷齐敏, 张同同 43
----------------------------	---------------------------------

钢铁制造流程动态运行要素的认识与实践.....	连小圆, 郑 忠, 王永周, 高小强 53
-------------------------	-----------------------

钢铁制造流程物质流与能量流协同优化研究进展.....	胡正彪, 贺东风 61
----------------------------	-------------

钢铁生产流程的物质流仿真研究.....	吴双平, 徐安军 73
---------------------	-------------

论中国发展全废钢电炉流程的战略意义	上官方钦, 殷瑞钰, 李 煜, 周继程, 邴秀萍 86
-------------------------	-----------------------------

基于排队论的炼钢-连铸区段在线钢包数量优化	周继程, 丁 毅, 刘国平, 邓 勇, 上官方钦, 邴秀萍 93
-----------------------------	----------------------------------

炼钢-连铸区段多工序运行协同控制	邵 鑫, 杨建平, 王柏琳, 张江山, 高 山, 刘 青 101
------------------------	----------------------------------

基于 Flexsim 的炼铁-炼钢界面铁水罐数量配置优化	冯雨薇, 韩伟刚, 张玉柱, 胡长庆, 龙 跃 113
------------------------------------	-----------------------------

基于界面技术的钢渣热态转运路径优化	甄常亮, 于 恒, 赵 凯, 韩伟刚, 师学峰 119
-------------------------	-----------------------------

CONTENTS

Editor's Note	(1)
Preface	(3)
Metallurgical Process Engineering	
Topic of times of metallurgy—Get through process,communicate different levels and open up a new theory	YIN Rui-yu 4
Typical application of metallurgical process engineering	ZHANG Fu-ming, XIE Jian-xin 10
Practice and exploration of clean steel production with high efficiency and low cost	YANG Chun-zheng 20
High efficiency and low carbon production technology and integrated application of bar	WANG Xin-dong, CHANG Jin-bao, LI Jie 26
Systemic energy saving and energy efficiency improving of iron and steelmaking process	ZHANG Qi, CAI Jiu-ju 32
Cultivating new momentum for industrial development and creating new competitive advantages in steel in- dustry	CHEN Pei-dun, QI Hai-yan, ZHAO Gang, LIU Ming, YIN Qi-min, ZHANG Tong-tong 43
Understanding and practice of dynamic operation elements in steel manufacturing process	LIAN Xiao-yuan, ZHENG Zhong, WANG Yong-zhou, GAO Xiao-qiang 53
Research progress of collaborative optimization for material flow and energy flow in steel manufacturing process	HU Zheng-biao, HE Dong-feng 61
A review of mass flow simulation in steel production process	WU Shuang-ping, XU An-jun 73
Dissussion on strategic significance of developing full scrap EAF process in China	SHANGGUAN Fang-qin, YIN Rui-yu, LI Yu, ZHOU Ji-cheng, LI Xiu-ping 86
Number optimization of on-line ladle in BOF-CC section based on queuing theory	ZHOU Ji-cheng, DING Yi, LIU Guo-ping, DENG Yong, SHANGGUAN Fang-qin, LI Xiu-ping 93
Cooperative control of multi-process operation in steelmaking-continuous casting section	SHAO Xin, YANG Jian-ping, WANG Bai-lin, ZHANG Jiang-shan, GAO Shan, LIU qing 101
Quantity allocation optimization of hot metal ladles in ironmaking-steelmaking interface based on Flexsim	FENG Yu-wei, HAN Wei-gang, ZHANG Yu-zhu, HU Chang-qing, LONG Yue 113
Optimization on transport path of molten steel slag based on interface technique	ZHEN Chang-liang, YU Heng, ZHAO Kai, HAN Wei-gang, SHI Xue-feng 119
Information	(125)
Contribution Wanted and Subscription Announcement
