ORIGINAL PAPERS

Molecular Dynamics Simulations of Thermal Properties of Polymer Composites Enhanced by Cross-Linked Graphene Sheets

Y. Li · S. Wang · Q. Wang 673

The Particle Time Derivative of the Characteristic Geometric Quantities on Soft Curved Surface in Lagrangian Description

Y. Yin 683

Some Interesting Traveling Waves in a Transversely Isotropic Incompressible Hyperelastic Semi-infinite Rod

R. Wang · X. Yuan · H. Zhang · J. Xu · J. Zhang 698

Model of Underground Ant Nest Structure Using Static and Dynamic Finite Element Analysis

W. Qu · W. Zhou · P. Zhu · Z. Zhang 717

A Multi-scale Corrosion Fatigue Damage Model of Aluminum Alloy Considering Multiple Pits and Cracks

B. Sun · Y. Zheng · Z. Li 731

Investigation on the Anisotropic Transformation Surfaces of Super-Elastic NiTi Shape Memory Alloys Under Multiaxial Cyclic Loading Conditions

B. Qiu · Q. Kan · T. Zhao · X. Xie · G. Kang 744

A Model of Tangential Contact Damping Considering Asperity Interaction and Lateral Contact

W.P. Fu · Z.Q. Gao · W. Wang · J.B. Wu 758

Three-Phase Microstructure Topology Optimization of Two-Dimensional Phononic Bandgap Materials Using Genetic Algorithms

W. Xu · J. Ning · M. Zhang · W. Wang · T. Yang 775

A Network Decomposition Model for Rubber-Like Materials Considering Topological Constraints

B. Fu · X. Yang · Q. Li 785

Structural Damage Recognition Based on Perturbations of Curvature Mode Shape and Frequency

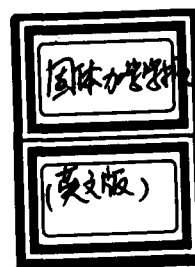

R. He · Y. Zhu · W. He · H. Chen 794
