ORIGINAL PAPERS

Tunability of Band Gaps of Programmable Hard-Magnetic Soft Material Phononic Crystals

B. Li · W. Yan · Y. Gao 719

Nonlinear Fractional-Order Dynamic Stability of Fluid-Conveying Pipes Constituted by the Viscoelastic Materials with Time-Dependent Velocity

Y. Tang · G. Wang · Q. Ding 733

Effective Energy Density of Glass Rejuvenation

G. Ding · F. Jiang · L. Dai · M. Jiang 746

Aeroelastic Properties and Nonlinear Vibration Control of a Simply-Supported Lattice Sandwich Beam Embedded with Nitinol-Steel Wire Ropes

Y. Zhang · X. Chen · D. Li · J. Zang 755

Effect of Interface Area on Nonlinear Magnetoelectric Resonance Response of Layered Multiferroic Composite Ring

J. Liu · L. Long · W. Li 765

Theoretical Modeling and Analysis of Vibroacoustic Characteristics of an Acoustic Metamaterial Plate

T. Wang · H. Guo · M. Chen · W. Dong 775

Adhesive Contact of a One-Dimensional Hexagonal Quasicrystal Half-Space Punched by a Spherical Indenter

P. Li · Y. Liu · S. Zhang · B. Shao · H. Fan · Q. Wang 787

Derivation of the Orthotropic Nonlinear Elastic Material Law Driven by Low-Cost Data (DDONE)

Q. Xiang · H. Yang · K.I. Elkhodary · Z. Sun · S. Tang · X. Guo 800

Peridynamic Meso-scale Modeling for Degradation in Transverse Mechanical Properties of Composites with Micro-void Defects

J. Wang · Y. Yu · Z. Mu · Y. Hu 813

Correction Factors of the Approximate Theories for Axisymmetric Modes of Longitudinal Waves in Circular Rods

L. Xie · C. Bian · J. Wang 824

Estimation of Fracture Toughness for A508-III Steel in Ductile-to-Brittle Transition Region Using a Strain-Energy-Density-Based Fracture Failure Model

Y. Wu · C. Bao · L. Cai · K. Wang · X. Liu 834

Theoretical Analysis of Crack Propagation Measurement for Brittle Materials Based on Virtual Principal Strain Field

L. Gu · X. Shao 842

Chemomechanical Properties of Electrospun Polyvinyl Acetate (PVAc) Fiber Mat and its Application in Water-Triggered Self-folding

D. Zhou · K. Jiang · Y. Mao · S. Hou 851

A New and Efficient Approach to Determining the Rate of the Second-Order Symmetric Tensor and Its Isotropic Function

C. Meng · M. Chen 867

Element-Free Modelling of Topological Gels with Peculiar Multiaxial Large Deformation Behavior

D.M. Li · J.-H. Liu · J.-X. Xie 880

Dynamic Biaxial Compression of CFRP Laminates Using Electromagnetic Loading

H. Kang · J. Liang · Y. Li · H. Cui · Y. Li 891

Abstracted/Indexed in BFI List, CLOCKSS, CNKI, CNPIEC, Dimensions, EBSCO Discovery Service, Ei Compendex, Google Scholar, INSPEC, Journal Citation Reports/Science Edition, Naver, Norwegian Register for Scientific Journals and Series, OCLC WorldCat Discovery Service, Portico, ProQuest-ExLibris Primo, ProQuest-ExLibris Summon SCImago, SCOPUS, Science Citation Index Expanded (SciSearch), TD Net Discovery Service, UGC-CARE List (India)
