CONTENTS

AFFAIR & REVIEW

- 1 Research on problems and countermeasures of water-saving enterprises for petroleum refining in China
Yu Weixing, Li Xiangjin, Gong Yan, et al

TESTING & RESEARCH

- 5 Development and application of a temperature control device for an old style heating furnace
Fu Ying
- 8 Optimization of production & dispatch process for multi storage depots
Gu Qiang
- 12 Feasibility study on application of waste heat refrigeration technology in gas transportation station
Zhang Xuan, Wang Huaqing, Xiang Yifan, et al
- 15 Research on inverter system for beam pumping unit based on controlled rectifier
Zhang Qingjun
- 19 Optimization of heat exchange network for atmospheric and vacuum distillation unit
Meng Shuo, Zhang Haibin and Zhang Jidong
- 22 Research on two oil wells driven by one pumping equipment for the cluster well
Tan Zhi

TECHNOLOGY & APPLICATION

- 24 Application of the skid-mounted oil absorption technology in Bei I-1 crude oil stabilization equipment
Ding Jiancheng, Liu Xiaodong and Dai Yong
- 26 Application of new technology in exhaust steam recovery
Tian Ailan
- 28 Feasibility study on application of small-sized gas generator set in No.7 oil production plant
Zhang Xiuxia
- 31 Technology research and application on submersible direct driving type screw pump
Peng Jinlong
- 33 Application of energy-saving oil pumping unit in oilfield
Zhu Wenguang

EQUIPMENT & PRODUCT

- 35 Application of portable-multifunctional maintenance instrument for frequency conversion system in oilfield
Fu Li
- 41 Optimization of glycol dehydration system in Sanan shallow refrigeration plant
Ding Jiancheng, Huang Xueqing and Wei Guangmin

MANAGEMENT & PRACTICE

- 44 Production-increasing & consumption-reducing realized by optimizing work parameters on water blending process for heavy oil well
Shi Zhixiang, Cai Fengke, Qi Shengcai, et al
- 48 Effect analysis on reducing mixed water for oil well
Zhu Feng
- 51 Discussion on enhancing energy-consumption management for oil & gas gathering and transportation system
Chang Qingqing

OTHERS

- 53 Decreasing the test error of thermal conductivity coefficient for heat preservation material
Guo Jiangchuan
