《工业建筑》2010年总目次

1	Vigorous Promoting Building Energy Efficiency Based on the Premise of Fairness	Zhang Weihua Liu Jiaping
4	Building Energy-Saving Eco-Clubs: Reconstruction Program of Old Factory Building in Huainan	Li Yan
8	Energy Efficiency Reformation for External Structures of Old Factory Buildings in Severe Cold Region	Wu Weidong Li Rui Li Lianke
13	Energy Conservation Design of High-Rise Office Building	Li Xueping
16	The Technical Trial in the Constructing of Energy-Saving Cottages and Some Experience	Lin Chuan Fang Zhiyong
19	The Design and Study of Northeast Rural Solar House	Zhuang Yu Zhang Xiuli Cui Zhenglong
22	Investigation and Analysis of Use of Passive Solar Heating Technology in Arctic Areas	Yu Hancheng Dang Jianguo
25	Prefabricated Creative Energy-Saving Panels of Insulation and Decoration for Building Facade	Wen Yanfang Ning Lianwang
28	Stochastic Response Analysis of Corridors of Connected High-Rise Structures Under Multi-Support Earthquake Excitations	Gui Guoqing Li Yonghua
34	Impact of Filled Wall on Horizontal Stiffness of Frame Structure	Huang Hua Ye Yanxia Zhu Qin, et al
39	Study on Magnification Coefficient of Beam Moment in Reinforced Concrete Frame	Wu Erjun Yan Wei
43	Study on An Innovation Tensile-Resistant Device for Laminated Rubber Bearing	Su Jian Wenliuhan · Heisha Zhou Fulin
47	Experimental Study on Shear Performance of Recycled Concrete Beam Contained with Web Bar	Deng Zhiheng Yang Haifeng Luo Yanming, et al
51	Experimental Study on Seismic Damage Process of HRBF500 RC Column	Zheng Jikun Wang Quanfeng
55	Effect of Variation of Pressure in Soil on the Coefficient of Elastic Uniform Compression of Base	Wang Xikang Liu Jingzheng
60	Calculation Method of Ground Surface Deformation Considering Influences of Shield Tunnel Depth and Rock-Soil Characteristics	Zhao Honghua Chen Guoxing
65	Influence of Nonlinear Strength of Rockfill on Slope Stability of High Fills in Mountainous Regions	Zhang Xinlian Song Erxiang Xu Ming
70	Experimental Research on Recycled Aggregate Concrete Tensile and Shear Strength	Liu Feng Bai Guoliang Chai Yuanyuan, et al
75	An Experimental Study on the Bond Behavior Between Steel Bar and Frozen Concrete During Winter Construction	Wang Jue Ren Huitao Liu Lixia
79	Integral Sliding Form Construction Technology of Six Connected Silos	Wu Wenhai
84	Application Study of Steel-Concrete-Prestressed Long Cantilever Composite Structures	Zeng Bin Lü Zhitao
87	Finite Element Analysis of Displacement of Complex Wall Cladding in Horizontal Load	Li Jiuyang Wang Ying Liu Na
90	Flexibility-Based Fiber Beam-Column Element and Its Parametric Analysis	Zhang Chuanchao Zheng Shansuo Li Lei, et al
95	Finite Element Analysis and Research on Anti-Deformation for A Steel Box Beam	Tang Yonggang Chen Qianqing
98	The Consideration of Disaster Prevention for Multistory Buildings in Non-Earthquake Protection Region	Huang Liang Liu Yan Zhou Jing
102	Analysis of Anti-Seismic Performance of RC Frame Structure Reinforced with CFRP	Liu Haiqing Li Haijing Zhao Jianjun
107	Study on Bearing Capacity of Concrete Column Reinforced by CFRP and Angle Steel	Yu Feng He Shuanhai
110	Experimental Study on Fatigue Property of Steel Crane Beam Strengthened by CFRP	Hu Liang Ouyang Yu Tu Mufa
113	A Study on Application of Strengthening of Frame Beam with Carbon Fiber Reinforced Polymer After Fire	Tang Xiaoping
118	Strategy Studies on Industrial Heritage Conservation and Regeneration of Shanxi Jinhua Textile Mill	Feng Meiyu Wang Xiujing
123	Promotion of Solar Houses During Construction of New Rural Areas	Cao Hui Liao Qiuyang
125	An Initial Study on the Application Modes of Daylight in the Underground Space	Yang Jieru Wang Shan
