(2010 年 10 月)

## 目 次

### 第六届全国省级钢结构行业组织经济技术协会暨钢结构产业链中原高峰论坛专题

|                                  |     |         |         |
|----------------------------------|-----|---------|---------|
| 基于深层分析方法的 Inventor 二次开发 .....    | 魏 群 | 姬广坤     | 尹伟波(1)  |
| 高温(火灾)环境下斜梁的静力特性分析 .....         | 孙 强 | 韦新刚(6)  |         |
| 高温下具有弹性支座钢构件的动力稳定荷载 .....        | 孙 强 | 吴经纬(9)  |         |
| 某高层大跨度联体钢构吊装及变形控制施工方法 .....      | 王新武 | 卫永胜     | 李道山(13) |
| 虚拟仿真技术在大型桥梁工程中的应用 .....          | 魏鲁双 | 姜 华     | 彭运动(16) |
| 高强钢轴压构件稳定性研究 .....               | 张银龙 | 苟明康     | 梁 川(21) |
| 扣件式钢管脚手架结构的可靠度分析 .....           | 刘 飞 | 邹 翔(25) |         |
| 双腹板顶底角钢梁柱连接受力性能分析 .....          | 李凤霞 | 布 欣     | 王新武(29) |
| 混合气体保护焊技术在石武高铁专线架桥机上的应用 .....    | 宋统战 | 邓 环     | 王 良(33) |
| 鄂尔多斯博物馆内部 GRG 钢结构龙骨设计及施工探讨 ..... | 卢 雷 | 秦海琴     | 秦文刚(35) |
| 冷弯薄壁型钢结构住宅的设计原理及施工工艺流程 .....     | 勾朝伟 | 石 宇     | 聂少锋(40) |
| 钢箱梁在浮桥承压舟中的应用 .....              | 邵 杰 | 王 泽(44) |         |
| 大跨度空间管桁架结构施工技术 .....             |     | 左 钊(47) |         |

### 水利与土木工程

|                               |     |         |         |
|-------------------------------|-----|---------|---------|
| 重力坝三维有限元分析 .....              | 温中华 | 李 欣(51) |         |
| CFD 软件在龙子湖泵站设计中的应用 .....      | 潘 强 | 王 锋(55) |         |
| 特小流域设计洪水汇流参数分析 .....          | 吴婉玲 | 谢华伟     | 沈宇翔(58) |
| 联邦凯威特型弦支穹顶结构稳定性分析 .....       | 屈讼昭 | 王志骞(62) |         |
| 附加质量法反演中体积相关法的研究 .....        | 李晓磊 | 裴少英     | 杨红云(65) |
| 温博段 I 标段倒虹吸施工工期温控防裂技术研究 ..... | 郑晨晖 | 汪伦焰     | 郭 磊(68) |
| 齐村南公路桥预应力箱梁施工技术 .....         |     | 孙 建(72) |         |
| 南水北调渠道混凝土衬砌施工技术 .....         |     | 张跃松(75) |         |
| 泵送混凝土的原材料及配制要求 .....          |     | 张玉山(77) |         |

### 动力与机械工程

|                                     |      |          |         |          |
|-------------------------------------|------|----------|---------|----------|
| 反应堆堆芯强化通道内超临界水流动传热特性数值研究 .....      | 王为术  | 张红生      | 华勤成     | 刘 军(79)  |
| PEMFC 发电机三相恒频恒压逆变方案研究 .....         | 王 巍  | 王金全      | 陈向锋     | 郭香静(84)  |
| 基于 Matlab/Simulink 的太阳能电池特性分析 ..... |      | 吴茜琼      | 常晓颖     | 常晓颖(90)  |
| 基于 Matlab 的电力系统短路故障分析与仿真 .....      |      | 常晓颖      | 吴茜琼     | 吴茜琼(93)  |
| 柔性多体系统动力学研究方法及其发展 .....             | 姚林晓  | 师素娟      | 董贵恒(97) |          |
| 门式起重机的虚拟样机建模与动力学仿真 .....            | 郑淑娟  | 费建涛(101) |         |          |
| 基于 SolidWorks 2009 的动画制作技术 .....    | 上官林建 | 孔垂雨      | 邵金华     | 纪占玲(104) |

### 计算机应用

|                                |     |     |          |          |
|--------------------------------|-----|-----|----------|----------|
| 基于 ATmega 64 单片机智能导盲系统设计 ..... | 曹文思 | 巩鲁洪 | 陈建明      | 邱道尹(106) |
| 基于特征向量跟踪的数据压缩 MMSE 多用户检测 ..... | 魏志强 | 李艳玲 | 陈招迪(110) |          |
| 基于 GDI 的远程屏幕图像实时传输 .....       | 朱国仲 | 陈海涛 | 陆桂明(113) |          |
| 基于十进量化的 SPIHT 算法改进 .....       |     |     | 黄 同(115) |          |

### 岩土工程

|                            |     |          |          |
|----------------------------|-----|----------|----------|
| 水工隧洞支护特性研究 .....           | 孙常新 | 高 峰(118) |          |
| 高密度电阻率法在采空区探测中的应用 .....    | 石林珂 | 刘洪一      | 冷元宝(122) |
| 高地热条件下引水隧洞的降温措施及爆破方案 ..... | 罗雪阳 | 贾建华      | 陈立顺(125) |
| 新疆大石峡水电站厂址区泥石流危险性评价 .....  |     |          | 毛会永(128) |
| 幸福河倒虹吸基坑降水方法 .....         |     |          | 刘光第(133) |
| 渠道基础处理工程砂挤密桩施工技术 .....     |     |          | 解小峰(136) |

### 环境工程与工程管理

|                            |     |          |  |
|----------------------------|-----|----------|--|
| 焦化废水曝气生物滤池深度处理试验 .....     | 孙丰英 | 唐文锋(139) |  |
| 企业竞争力的多级模糊综合评价模型及应用 .....  | 程玉芳 | 刘海斌(143) |  |
| R&D 项目价值评估的灰色 B-S 模型 ..... | 罗 党 | 许丽君(146) |  |

### 数理研究

|                         |     |          |  |
|-------------------------|-----|----------|--|
| 变精度覆盖粗糙集模型近似算子的性质 ..... |     | 梁俊奇(150) |  |
| 波在多层介质缓变波导中的传播 .....    | 李 鹏 | 蔡洪涛(153) |  |
| 复合开弧上的散射问题 .....        |     | 郝元元(157) |  |

## CONTENTS

|                                                                                                                                                        |                                                                   |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|
| Secondary Development of Inventor Based on Deep Analysis Method .....                                                                                  | WEI Qun, JI Guang-kun, YIN Wei-bo(1)                              |
| Analysis of the Static Characteristic of Inclined Beam under High Temperature Conditions .....                                                         | SUN Qiang, WEI Xin-gang(6)                                        |
| Critical Load of Dynamic Stability of Steel Structure Members with Elastic Support Abutments in High Temperature Conditions .....                      | SUN Qiang, WU Jing-wei(9)                                         |
| Installation Technology and Deformation Control of a High-level Large-span Steel Hoisting Structure .....                                              | WANG Xin-wu, WEI Yong-sheng, LI Dao-shan(13)                      |
| Application of Virtual Simulation Technique in Large Bridge Engineering .....                                                                          | WEI Lu-shuang, JIANG Hua, PENG Yun-dong(16)                       |
| Research on Stability of the Axial Compressed Member of High Strength Steel .....                                                                      | ZHANG Yin-long, Gou Ming-kang, LI Ning, LIANG Chuan(21)           |
| Reliability Analysis on Steel Tubular Scaffold with Couplers .....                                                                                     | LIU Fei, ZOU Xiang(25)                                            |
| Analysis on Mechanical Behavior of Top and Seat Angle with Double Web Angles Steel Beam-Column Connection .....                                        | LI Feng-xia, BU Xin, WANG Xin-wu(29)                              |
| Application of Mixed Gas Shielded Welding Technology for from Shijiazhuang to Wuhan High-speed Railway Bridge Machine .....                            | SONG Tong-zhan, DENG Huan, SONG Ming-xia, WANG Gen(33)            |
| Design and Construction Discussion of GRG Light-gauge Steel Inside Ordos Museum .....                                                                  | LU Lei, QIN Hai-qin, QIN Wen-gang(35)                             |
| Design Principles and Construction Process of Cold-formed Thin-walled Steel Residential Buildings .....                                                | GOU Chao-wei, SHI Yu, NIE Shao-feng(40)                           |
| Application of Steel Box Girder in Double Bearing Boat .....                                                                                           | SHAO Jie, WANG Ping(44)                                           |
| Construction Technology of Large-span Space Pipe Truss .....                                                                                           | ZUO Zhao(47)                                                      |
| Three-dimensional Finite Element Method Analysis of Gravity Dam .....                                                                                  | WEN Zhong-hua, LI Xin(51)                                         |
| Application of CFD Software in the Pumping Station Design in Longzi Lake .....                                                                         | PAN Qiang, WANG Feng(55)                                          |
| Analysis of the Minibasin Design Flood Convergence Parameters .....                                                                                    | WU Wan-ling, XIE Hua-wei, SHEN Yu-xiang(58)                       |
| Stability Analysis of Lamella-Kiewitt Suspend-dome Structures .....                                                                                    | QU Song-zhao, WANG Zhi-qian(62)                                   |
| Research on the Volume Correlated Method in the Inversion of Additive Mass Method .....                                                                | LI Xiao-lei, PEI Shao-ying, YANG Hong-yun(65)                     |
| Study on Concrete's Temperature Control and Crack Prevention Measures for Wenxian-Bo'ai I Section during Inverted Siphons in Construction Period ..... | ZHENG Chen-hui, WANG Lun-yan, GUO Lei(68)                         |
| Construction Technology of the Prestressed Box Girder of the Highway Bridge in the South of Qicun Village .....                                        | SUN Jian(72)                                                      |
| Concrete Lining Construction Technology of Channels in South-to-North Water Transfer Project .....                                                     | ZHANG Yue-song(75)                                                |
| Raw Materials and Preparation Requirements of Pumping Concrete .....                                                                                   | ZHANG Yu-shan(77)                                                 |
| Numerical Study on the Flow and Heat Transfer Characteristics of Supercritical Water in Rectangular Enhanced Flow Channels in Reactors .....           | WANG Wei-shu, ZHANG Hong-sheng, BI Qin-cheng, LIU Jun(79)         |
| Research on Three Phase CFCV Inverter Plan of PEMFC Generator .....                                                                                    | WANG Wei, WANG Jin-quan, CHEN Xiang-feng, GUO Xiang-jing(84)      |
| Analysis of Characteristics of Solar Cells Based on Matlab/Simulink .....                                                                              | WU Qian-qiong, LI Xiao-guang(90)                                  |
| Simulation and Analysis of Power System Short Circuit Fault Based on Matlab .....                                                                      | CHANG Xiao-ying, WU Qian-qiong(93)                                |
| Research Methods and Development of Flexible Multi-body System Dynamics .....                                                                          | YAO Lin-xiao, SHI Su-juan, DONG Gui-heng(97)                      |
| Modeling and Dynamic Simulation of Virtual Prototype of Gantry Crane .....                                                                             | ZHENG Shu-juan, JIA Jian-tao(101)                                 |
| Animation Technique Based on SolidWorks 2009 .....                                                                                                     | SHANG-GUAN Lin-jian, KONG Chui-yu, TAI Jin-hua, JI Zhan-ling(104) |
| Design of Intelligent Guiding System Based on ATmega 64 Single-chip Microprocessor .....                                                               | CAO Wen-si, Gong Lu-hong, Qiu Dao-yin, CHEN Jian-ming(106)        |
| Data Compression MMSE Multiuser Detection Based on Eigenvector Tracking .....                                                                          | WEI Zhi-qiang, LI Yan-ling, CHEN Zhao-di(110)                     |
| Real-time Transmission for Remote Screen Images Based on GDI .....                                                                                     | ZHU Guo-zhong, CHEN Hai-tao, LU Gui-ming(113)                     |
| SPIHT Algorithm Improvement Based on Denary Quantization .....                                                                                         | HUANG Tong(115)                                                   |
| Research on Support Characteristic of Hydraulic Tunnel .....                                                                                           | SUN Chang-xin, GAO Feng(118)                                      |
| Application of High Density Resistivity Method in Mined-out Cod Area Detecting .....                                                                   | SHI Lin-ke, LI Hong-yi, LENG Yuan-buo(122)                        |
| Cooling Measures and Blasting Program of the Diversion Tunnel in High Geothermal Conditions .....                                                      | LUO Xue-yang, JIA Jian-hua, CHEN Li-shun(125)                     |
| Debris Flow Hazard Assessment on the Site of Dashixia Hydropower Station in Xinjiang .....                                                             | MAO Hui-yong(128)                                                 |
| Dewatering Method of Foundation Pit on Xingfu River Inverted Siphon .....                                                                              | LIU Guang-di(133)                                                 |
| Construction Technology of Sand Stone Compaction Pile in the Channel Foundation Treatment Project .....                                                | XIE Xiao-feng(136)                                                |
| Experiment on Advanced Treatment for Coal Coking Wastewater by Biological Aerated Filter .....                                                         | SUN Feng-ying, TANG Wen-feng(139)                                 |
| Fuzzy Comprehensive Evaluation Model of Enterprise Competitiveness and Application .....                                                               | CHENG Yu-fang, LIU Hai-bin(143)                                   |
| Grey B-S Model of R&D Project Evaluation .....                                                                                                         | LUO Dang, XU Li-jun(146)                                          |
| Properties of Approximation Operators for Variable Precision Covering Rough Set Models .....                                                           | LIANG Jun-qi(150)                                                 |
| Wave Propagation in Weakly Rangedependent Multi-layered Waveguides .....                                                                               | LI Peng, CAI Hong-tao(153)                                        |
| Scattering Problems for the Compound Open Arc .....                                                                                                    | GAO Yuan-yuan(157)                                                |
