Viewing the Creative Education in China from Intel ISEF	An Qi(1)
Constructing Innovative Education Platform for Enhancement of Creativity and Practical Ability of the University Students	Feng Lin et al.(5)
The Training of Undergraduate's Innovative and Practical Abilities Based on "Extensive Practice"	Tang Weixiao et al.(11)
Teachers' Role on Enhancing the Undergraduates' Innovative Ability	Liu Yan et al.(14)
Exploration of the Process Equipment and Control Engineering Students' Innovation Based on Seven Dimensions	Guo Fuping, Liu Yan(17)
Study on the Innovation Ability Training for the College Students of Process Equipment and Control Engineering	Li Yi et al.(19)
Entrance Education Should Be Paid Attention to in the Practical Teaching of Engineering Education	Liu Liyan et al.(22)
Fostering and Practicing of Engineering Quality and Innovative Spirit	Liu Ying et al.(25)
Problems Confronting Production Practice of Higher Engineering Colleges and Countermeasures	Gao Bingjun et al.(28)
On the Study of Cultivating General-mechanic Major Students' Engineering Practice Talents based on the Idea of Large-scale Engineering	Wang Dacheng et al.(31)
The Comprehension and Thought to the Opening Experiment	Song Jitian et al.(34)
On Teaching Approach for Training Applied and Innovative Talents of Process Equipments and Control Engineering Specialty	Yang Hong et al.(37)
Insist on Fostering the Ability of Engineering Cartography and Improve the Students' Ability of Engineering Practice	Chen Bing, Fan Yuguang(41)
Thinking on Culturing Excellent Engineers of Process Equipment and Control Engineering	Chen Guohua, Liang Jun(45)
Research on the Construction of Featured-Specialty of the Process Equipment & Control Engineering and Studies on Innovation Education	Zhang Bin, Zhang Shiwei(50)
Strengthening Professional Construction of Process Equipment and Control Engineering for the Requirement of Industry Development	Li Xuebin et al.(54)
Exploration of Cultivation Mode of the Applied and Innovative Talents for Undergraduates Majored in Process Equipment and Controlling Engineering	Liu Wei(57)
Research and Practice with Application-Oriented Talents Nurturance of Process Equipment and Controlling Engineering ——Exploration in Guangdong Petrochemical College	Liu Yan, Guo Fuping(60)
Research on the Development of Course Design System of "Machine Components" Based on Internet	Yan Jianxin, Zhang Xingming(63)
Promoting Teaching Reform to Develop Innovative Practical Engineering Talent	Zhang Sufeng, Li Zheng(68)
Arrangements for Teaching Contents and Exploration in the Teaching of Separation Technology of Bio-products	Wu Bin et al.(72)
Reflections on Curriculum Construction of Opening Elective Course in Large Category "Membrane Science and Technology"	Yang Zuoguo(77)
The Reformation and Practice of Course Construction and Teaching Content in the Lecture of Light Chemistry Engineering	Wu Zanmin(80)
Practice on the Construction and Teaching Reform of the Principles of Chemical Engineering	Long Yi et al.(82)
New Approach for the Integration of Teaching-Study-Research in Training Undergraduates	Zhang Sufeng, Li Mei(85)
Study on the Experimental Teaching Reformation in Light Chemical Engineering Specialty	Chen Qijie et al.(88)
Exploration of Teaching Mode in Graduation Practice of Light Chemical Engineering	Han Ying et al.(92)
Enhancing Humanistic Quality of Students on Light Chemical Engineering in Cultivating Innovative talents	Li Peiyi et al.(94)
Optimizing of Practice Education System for Light Chemical Engineering	Li Peiyi et al.(98)
Teaching Practice and Research on Plant Fiber Chemistry	Liu Na et al.(102)
