CONTENTS

Review of shock wave detection method in CFD post-processing	
Z. Wu, Y. Xu, W. Wang and R. Hu	501
Static aeroelastic analysis of very flexible wings based on non-planar vortex lattice method	
C. Xie, L. Wang, C. Yang and Y. Liu	514
Gaseous plume flows in space propulsion	
L. Wang and C. Cai	522
Improvement of Baldwin–Lomax turbulence model for supersonic complex flows	
R. Zhao, C. Yan, J. Yu and X. Li.....	529
Panel/full-span free-wake coupled method for unsteady aerodynamics of helicopter rotor blade	
J. Tan and H. Wang.....	535
Influence of thermal inhibitor position and temperature on vortex-shedding-driven pressure oscillations	
W. Su, S. Li, Q. Zhang, J. Li, Q. Ye and N. Wang.....	544
Hybrid calibration method for six-component force/torque transducers of wind tunnel balance based on support vector machines	
Y. Ma, S. Xie, X. Zhang and Y. Luo.....	554
Numerical study of unsteady starting characteristics of a hypersonic inlet	
W. Wang and R. Guo	563
Numerical analysis on noise of rotor with unconventional blade tips based on CFD/Kirchhoff method	
B. Wang, Q. Zhao, G. Xu, L. Ye and J. Wang	572
Effect of tip geometry and tip clearance on aerodynamic performance of a linear compressor cascade	
J. Zhong, S. Han, H. Lu and X. Kan	583
Infrared radiation signature of exhaust plume from solid propellants with different energy characteristics	
W. Wang, S. Li, Q. Zhang and N. Wang.....	594
Fatigue crack propagation of new aluminum lithium alloy bonded with titanium alloy strap	
Z. Sun and M. Huang	601
Study on ballistic penetration resistance of titanium alloy TC4, Part II: Numerical analysis	
T. Zhang, W. Chen, Y. Guan, D. Gao and S. Li	606
Safety estimation of structural systems via interval analysis	
X. Wang, L. Wang and Z. Qiu.....	614
Stability analysis of an aeroelastic system with friction	
T. Tan, M. Li and B. Liu	624
Reliability analysis of aero-engine blades considering nonlinear strength degeneration	
J. Lin, J. Zhang, S. Yang and F. Bi	631
A novel LAAS pseudo-range error over-bound method based on improved pseudo-range error distribution model	
R. Xue and Z. Wang	638

Adaptive path planning for unmanned aerial vehicles based on bi-level programming and variable planning time interval	
W. Liu, Z. Zheng and K. Cai	646
Relay selection based on MAP estimation for cooperative communication with outdated channel state information	
W. Ding, L. Fei, Q. Gao and S. Liu	661
Aircraft-on-ground path following control by dynamical adaptive backstepping	
B. Chen, Z. Jiao and S. S. Ge	668
Closed-loop dynamic control allocation for aircraft with multiple actuators	
W. Gai and H. Wang.....	676
Composite control method for stabilizing spacecraft attitude in terms of Rodrigues parameters	
H. Sun and S. Li.....	687
A robust solution for hesitate phenomenon in pick up process of aerospace electromagnetic relay	
X. Ye, J. Deng, Y. Ma, G. Zhai and J. Yan	697
A satellite schedulability prediction algorithm for EO SPS	
J. Li, J. Li, N. Jing, W. Hu and H. Chen	705
Real-time fault detection method based on belief rule base for aircraft navigation system	
X. Zhao, S. Wang, J. Zhang, Z. Fan and H. Min.....	717
Model-based robustness testing for avionics-embedded software	
S. Yang, B. Liu, S. Wang and M. Lu.....	730
Adaptive block dynamic surface control for integrated missile guidance and autopilot	
M. Hou, X. Liang and G. Duan.....	741
Codes cross-correlation analysis and data/pilot code pairs optimization for Galileo E1 OS and GPS L1C	
Z. Yang, Z. Huang and S. Geng	751
A novel approach of testability modeling and analysis for PHM systems based on failure evolution mechanism	
X. Tan, J. Qiu, G. Liu, K. Lv, S. Yang and C. Wang	766
Design of face-hobbed spiral bevel gears with reduced maximum tooth contact pressure and transmission errors	
V.Simon	777
A novel autonomous self-assembly distributed swarm flying robot	
H. Wei, N. Li, M. Liu and J. Tan	791
Yield anisotropy and tension/compression asymmetry of a Ni ₃ Al based intermetallic alloy	
L. Chen, W. Wen, H. Cui, H. Zhang and Y. Xu.....	801
Investigations on damage resistance of carbon fiber composite panels toughened using veils	
L. Zhu	807
Friction compensation for low velocity control of hydraulic flight motion simulator: A simple adaptive robust approach	
J. Yao, Z. Jiao and S. Han	814
Mechanistic identification of cutting force coefficients in bull-nose milling process	
G. Gao, B. Wu, D. Zhang and M. Luo	823
