CONTENTS

Special Column: Hommage to Prof. Francis Leboeuf and his Contribution to the Sino-French Research Collaboration

(Guest Editors: Mohamed Ichchou, Lu Lipeng; Managing Editor: Ge Jianping)

A high-order SPH method by introducing inverse kernels

L. Fang, J.C. Marongiu, J. Leduc, A. Amicarelli and J. Caro 1

Parameter study on numerical simulation of corner separation in LMFA-NACA65 linear compressor cascade

F. Gao, W. Ma, J. Sun, J. Boudet, X. Ottavy, Y. Liu, L. Lu and L. Shao 15

Experimental investigation of flow field in a laboratory-scale compressor

H. Ma, W. Wei and X. Ottavy 31

Modelling and simulation of flight control electromechanical actuators with special focus on model architecting, multidisciplinary effects and power flows

J. Fu, J.-C. Maré and Y. Fu 47

Investigation of dynamics of discrete framed structures by a numerical wave-based method and an analytical homogenization approach

C. Zhou, X. Sun, M. Ichchou, A.-M. Zine, J.-P. Lainé, S. Hans and C. Boutin 66

Enhanced wave and finite element method for wave propagation and forced response prediction in periodic piezoelectric structures

Y. Fan, M. Collet, M. Ichchou, L. Li, O. Bareille and Z. Dimitrijevic 75

Hysteresis and the nonlinear equivalent piezoelectric coefficient of MFCs for actuation

Z. Xue, L. Li, M.N. Ichchou and C. Li 88

Sound insulation performance of plates with interconnected distributed piezoelectric patches

K. Yi, L. Li, M. Ichchou and M. Collet 99

Review

Review on monolayer CBN superabrasive wheels for grinding metallic materials

W. Ding, B. Linke, Y. Zhu, Z. Li, Y. Fu, H. Su and J. Xu 109

Control techniques of tilt rotor unmanned aerial vehicle systems: A review

Z. Liu, Y. He, L. Yang and J. Han 135

Fluid Mechanics and Flight Mechanics

Optimization and design of an aircraft's morphing wing-tip demonstrator for drag reduction at low speed, Part I – Aerodynamic optimization using genetic, bee colony and gradient descent algorithms

A. Koreanschi, O. Sugar Gabor, J. Acotto, G. Brianchon, G. Portier, R.M. Botez, M. Mamou and Y. Mebarki 149

Optimization and design of an aircraft's morphing wing-tip demonstrator for drag reduction at low speeds, Part II - Experimental validation using Infra-Red transition measurement from Wind Tunnel tests

A. Koreanschi, O.S. Gabor, J. Acotto, G. Brianchon, G. Portier, R.M. Botez, M. Mamou and Y. Mebarki 164

Developing an engineering-statistical model for estimating aerodynamic coefficients of helicopter fuselage

H. Sheikhi and A. Saghaie 175

An experimental system for release simulation of internal stores in a supersonic wind tunnel

W. Liu, X. Ma, Z. Jia, W. Lu, Z. Wang, L. Chen, W. Liu and J. Lu 186

Flutter analysis of hybrid metal-composite low aspect ratio trapezoidal wings in supersonic flow

S. Saeed and S. Salman 196

A coupling VWM/CFD/CSD method for rotor airload prediction

Y. Shi, Y. Xu, G. Xu and P. Wei 204

Effect of Coriolis and centrifugal forces on flow and heat transfer at high rotation number and high density ratio in non orthogonally internal cooling channel

B. Berrabah and M. Aminallah 216

Discretized Miller approach to assess effects on boundary layer ingestion induced distortion E. Valencia, V. Hidalgo, D. Nalianda, P. Laskaridis and R. Singh	235
Influence of coupled boundary layer suction and bowed blade on flow field and performance of a diffusion cascade Z. Cao, B. Liu, T. Zhang, X. Yang and P. Chen	249
A novel surface mesh deformation method for handling wing-fuselage intersections M.J. Martín-Burgos, D. González-Juárez and E. Andrés-Pérez	264
Experimental investigation on a cavity-step-actuated supersonic oscillating jet X. Luo, B. Sun and X. Wang	274
Solid Mechanics and Vehicle Conceptual Design	
Analytical solution methods for eigenbuckling of symmetric cross-ply composite laminates Y. Xing and W. Xiang	282
Gust load alleviation wind tunnel tests of a large-aspect-ratio flexible wing with piezoelectric control Y. Bi, C. Xie, C. An and C. Yang	292
Study on segmented distribution for reliability evaluation H. Li, H. Zuo, Y. Su, J. Xu and Y. Yin	310
Electronics and Electrical Engineering and Control	
Identifying vital edges in Chinese air route network via memetic algorithm W. Du, B. Liang, G. Yan, O. Lordan and X. Cao	330
Identification of reduced-order model for an aeroelastic system from flutter test data W. Tang, J. Wu and Z. Shi	337
Formation tracking control for time-delayed multi-agent systems with second-order dynamics L. Han, X. Dong, Q. Li and Z. Ren	348
Start-up current adaptive control for sensorless high-speed brushless DC motors based on inverse system method and internal mode controller Y. He, S. Zheng and J. Fang	358
Multi-EAP: Extended EAP for multi-estimate extraction for SMC-PHD filter T. Li, J.M. Corchado, S. Sun and H. Fan	368
Drogue detection for autonomous aerial refueling based on convolutional neural networks X. Wang, X. Dong, X. Kong, J. Li and B. Zhang	380
Relay selection in cooperative communication systems over continuous time-varying fading channel K. Geng, Q. Gao, L. Fei and H. Xiong	391
Automatic landing system using neural networks and radio-technical subsystems R. Lungu and M. Lungu	399
Angular velocity determination of spinning solar sails using only a sun sensor K. Zhai	412
Spacecraft attitude maneuver control using two parallel mounted 3-DOF spherical actuators G. Li, H. Li and B. Li	419
An adaptive attitude algorithm based on a current statistical model for maneuvering acceleration M. Wang and H. Wang	426
Material Engineering and Mechanical Manufacturing	
Drilling load modeling and validation based on the filling rate of auger flute in planetary sampling Q. Quan, J. Tang, F. Yuan, S. Jiang and Z. Deng	434
Stress analysis and damage evolution in individual plies of notched composite laminates subjected to in-plane loads J. Hu, K. Zhang, H. Cheng, P. Liu, P. Zou and D. Song	447
Anti-plane problem of four edge cracks emanating from a square hole in piezoelectric solids S. Fan, J. Guo and J. Yu	461
