Vol.30 No.2 Apr. 2017

中国航空学报（英文版）

CHINESE JOURNAL OF AERONAUTICS

Chinese Society of Aeronautics and Astronautics

Beihang University

Volume 30, No.2, April 2017

CONTENTS

Special Column: Complexity Science in Air Transportation (Managing Editor: Su Lei)

Dynamics of air transport networks: A review from a complex systems perspective

L.E.C. Rocha469

ATM performance measurement in Europe, the US and China

A. Cook, S. Belkoura and M. Zanin.....479

Network analysis of Chinese air transport delay propagation

M. Zanin, S. Belkoura and Y. Zhu.....491

Robustness analysis metrics for worldwide airport network: A comprehensive study

X. Sun, V. Gollnick and S. Wandelt500

Evolution of airports from a network perspective – An analytical concept

M. Azzam513

Methods for determining unimpeded aircraft taxiing time and evaluating airport taxiing performance

Y. Zhang and Q. Wang523

A data-driven approach to modeling high-density terminal areas: A scenario analysis of the new Beijing, China airspace

M.Z. Li and M.S. Ryerson538

Analyzing the multilevel structure of the European airport network

O. Lordan and J.M. Sallan.....554

Fluid Mechanics and Flight Mechanics

Proportional fuzzy feed-forward architecture control validation by wind tunnel tests of a morphing wing

M.J.T. Kammege, R.M. Botez, L.T. Grigorie, M. Mamou and Y. Mébarki.....561

Tracking characteristics of tracer particles for PIV measurements in supersonic flows

F. Chen, H. Liu, Z. Yang and H. Hu.....577

Experimental study of curvature effects on jet impingement heat transfer on concave surfaces	
Y. Zhou, G. Lin, X. Bu, L. Bai and D. Wen	586
Thermal behavior of an isolator with mode transition inducing back-pressure of a dual-mode scramjet	
Q. Yang, W. Bao, C. Khaled, S. Zhang and G. Nicolas	595
Initial virtual flight test for a dynamically similar aircraft model with control augmentation system	
L. Guo, M. Zhu, B. Nie, P. Kong and C. Zhong	602
Automatic differentiation based discrete adjoint method for aerodynamic design optimization on unstructured meshes	
Y. Gao, Y. Wu and J. Xia.....	611
Dynamic response analysis under atmospheric disturbances for helicopters based on elastic blades	
T. Liu, Y. Dai, G. Hong and L. Wang.....	628
Static aeroelastic analysis including geometric nonlinearities based on reduced order model	
C. Xie, C. An, Y. Liu and C. Yang.....	638
A new model to simulate infrared radiation from an aircraft exhaust system	
Y. Zhou, Q. Wang and T. Li	651
Experimental characteristics of oblique shock train upstream propagation	
C. Wang, L. Xue and X. Tian	663
Numerical investigation on adiabatic film cooling effectiveness and heat transfer coefficient for effusion cooling over a transverse corrugated surface	
L. Qu, J. Zhang, X. Tan and M. Wang.....	677
Influence of SPS casing treatment on axial flow compressor subjected to radial pressure distur- tion	
F. Li, J. Li, X. Dong, D. Sun and X. Sun.....	685
A study on optimal control of the aero-propulsion system acceleration process under the super- sonic state	
F. Sun, Y. Du and H. Zhang.....	698

Matching mechanism analysis on an adaptive cycle engine	
J. Zheng, M. Chen and H. Tang.....	706
Hybrid uncertainty-based design optimization and its application to hybrid rocket motors for manned lunar landing	
H. Zhu, H. Tian and G. Cai	719

Solid Mechanics and Vehicle Conceptual Design

An experimental study of elastic properties of dragonfly-like flapping wings for use in biomimetic micro air vehicles (BMAVs)	
P.N. Sivasankaran, T.A. Ward, E. Salami, R. Viyapuri, C.J. Fearday and M.R. Johan.....	726
Process of establishing design requirements and selecting alternative configurations for conceptual design of a VLA	
B. Y. Bae, S. Kim, J. W. Lee, N. Van Nguyen and B. C. Chung	738
Change rules of a stratospheric airship's envelope shape during ascent process	
S. Zhao, D. Liu, D. Zhao, G. Wu, S. Yin and P. Zhou.....	752
Influence of aircraft surface distribution on electromagnetic scattering characteristics	
D. Liu, J. Huang, L. Song and J. Ji	759
A method of determining effective elastic properties of honeycomb cores based on equal strain energy	
C. Qiu, Z. Guan, S. Jiang and Z. Li	766

Electronics and Electrical Engineering Control

Fault-tolerant control with mixed aerodynamic surfaces and RCS jets for hypersonic reentry vehicles	
J. He, R. Qi, B. Jiang and R. Zhai	780
Constrained adaptive neural network control of an MIMO aeroelastic system with input nonlinearities	
Y. Gou, H. Li, X. Dong and Z. Liu	796
Adaptive formation control of quadrotor unmanned aerial vehicles with bounded control thrust	
R. Wang and J. Liu.....	807

Material Engineering and Mechanical Manufacturing

Variable stiffness design of redundantly actuated planar rotational parallel mechanisms

K. Li, H. Jiang, Z. Cui and Q. Huang818

Impact of lubricant traction coefficient on cage's dynamic characteristics in high-speed angular contact ball bearing

W. Zhang, S. Deng, G. Chen and Y. Cui827

Analysis and control of the compaction force in the composite prepreg tape winding process for rocket motor nozzles

X. He, Y. Shi, C. Kang and T. Yu836

High-temperature tribological behaviors of a Cr-Si co-alloyed layer on TA15 alloy

H. Lu, Q. Miao, W. Liang, F. Wang, Z. Ding and J. Xia.....846

The First Editorial Committee Youth Members of *Chinese Journal of Aeronautics* and *Acta Aeronautica et Astronautica Sinica* was founded856
