Ice Tolerable Wing

Optimization design for UAV
Haoran LI, Yufei ZHANG, Haixin CHEN

CONTENTS

Overview of current design and analysis of potential theories for automated fibre placement mechanisms (<i>Review</i>)	
<i>W. ZHANG, F. LIU, T. JIANG, M. YI, W. CHEN and X. DING</i>	1
Recent progress of machine learning in flow modeling and active flow control (<i>Review</i>)	
<i>Y. LI, J. CHANG, C. KONG and W. BAO</i>	14
Effect of Martian atmosphere on aerodynamic performance of supersonic parachute two-body systems	
<i>X. XUE, H. JIA, W. RONG, Q. WANG and C.-Y. WEN</i>	45
A learning-based approach for solving shear stress vector distribution from shear-sensitive liquid crystal coating images	
<i>J. ZHAO, J. ZHANG and B. WANG</i>	55
Reduced-dimensional MPC controller for direct thrust control	
<i>S. PANG, S. JAFARI, T. NIKOLAIDIS and Q. LI</i>	66
Unsteady characteristic research on aerodynamic interaction of slotted wingtip in flapping kinematics	
<i>D. LIU, B. SONG, W. YANG, D. XUE and X. LANG</i>	82
An automatic isotropic/anisotropic hybrid grid generation technique for viscous flow simulations based on an artificial neural network	
<i>P. LU, N. WANG, X. CHANG, L. ZHANG and Y. WU</i>	102
Optimization design of airfoils under atmospheric icing conditions for UAV	
<i>H. LI, Y. ZHANG and H. CHEN</i>	118
Pressure distribution feature-oriented sampling for statistical analysis of supercritical airfoil aerodynamics	
<i>R. LI, Y. ZHANG and H. CHEN</i>	134
Design method of optimal control schedule for the adaptive cycle engine steady-state performance	
<i>Y. XU, H. TANG and M. CHEN</i>	148
Using tandem blades to break loading limit of highly loaded axial compressors	
<i>B. LIU, C. ZHANG, G. AN, D. FU and X. YU</i>	165
Oblique detonation wave triggered by a double wedge in hypersonic flow	
<i>H. TENG, Y. ZHANG, P. YANG and Z. JIANG</i>	176
Bayesian uncertainty analysis of SA turbulence model for supersonic jet interaction simulations	
<i>J. LI, S. CHEN, F. CAI, S. WANG and C. YAN</i>	185
A multi-fidelity simulation method research on front variable area bypass injector of an adaptive cycle engine	
<i>Z. XU, M. LI, H. TANG and M. CHEN</i>	202
Heat transfer characteristics in a narrow confined channel with discrete impingement cooling	
<i>Y. LI, T. LIU, J. TAO, W. YANG and L. DONG</i>	220
Investigations of entrainment characteristics and shear-layer vortices evolution in an axisymmetric rear variable area bypass injector	
<i>G. HUANG, C. LI, C. XIA and Q. LI</i>	230
Promotional effect of silica on the combustion of nano-sized aluminum powder in carbon dioxide	
<i>B. ZHU, J. WANG, Q. WANG, Y. SUN, W. CHEN and J. WANG</i>	245
A serialized civil aircraft R&D cost estimation model considering commonality based on BP algorithm	
<i>Y. ZHANG, K. CAO, K. LIANG, Y. ZENG and W. DONG</i>	253
Impact of aperture on dynamic response of sandwich plates with aluminium face-sheets and PMI core based on an alternative finite element formulation and experiments	
<i>Z. WU, Y. LI, D. ZHANG, J. MEI, X. REN and R. MA</i>	266

Detail fatigue rating method based on bimodal Weibull distribution for DED Ti-6.5Al-2Zr-1Mo-1V titanium alloy	
<i>T. WANG, X. HE, J. WANG and Y. LI</i>	281
Distributed fixed-time attitude coordinated control for multiple spacecraft with actuator saturation	
<i>H. GAO, Y. XIA, X. ZHANG and G. ZHANG</i>	292
Three-dimensional time-varying sliding mode guidance law against maneuvering targets with terminal angle constraint	
<i>X. WANG, H. LU, X. HUANG, Y. YANG and Z. ZUO</i>	303
Optimal predictive sliding-mode guidance law for intercepting near-space hypersonic maneuvering target	
<i>B. ZHANG and D. ZHOU</i>	320
Inter-satellite link augmented BeiDou-3 orbit determination for precise point positioning	
<i>L. ZHAO, X. HU, C. TANG, S. ZHOU, Y. CAO, Q. WANG and R. SU</i>	332
A hybrid deep neural network based on multi-time window convolutional bidirectional LSTM for civil aircraft APU hazard identification	
<i>D. ZHOU, X. ZHUANG and H. ZUO</i>	344
Warhead power assessment based on double hierarchy hesitant fuzzy linguistic term sets theory and gained and lost dominance score method	
<i>T. YAO, W. WANG, R. MIAO, Q. HU, J. DONG and X. YAN</i>	362
Unintentional modulation evaluation in time domain and frequency domain	
<i>L. SUN, X. WANG and Z. HUANG</i>	376
Periodic acoustic source tracking using propagation delayed measurements	
<i>H. HAO and Z. DUAN</i>	390
A multiscale transform denoising method of the bionic polarized light compass for improving the unmanned aerial vehicle navigation accuracy	
<i>D. ZHAO, J. TANG, X. WU, J. ZHAO, C. WANG, C. SHEN and J. LIU</i>	400
Sea fog detection based on unsupervised domain adaptation	
<i>M. XU, M. WU, J. GUO, C. ZHANG, Y. WANG and Z. MA</i>	415
Study of RCS characteristics of tilt-rotor aircraft based on dynamic calculation approach	
<i>Z. ZHOU and J. HUANG</i>	426
Influence and optimization of parameters of prepreg viscosity during placement	
<i>L. ZU, X. XIA, Q. ZHANG, X. JIA, H. WANG, G. ZHANG and J. LU</i>	438
Interfacial characteristics in CNTs-AgCuTi systems	
<i>D. LIU, B. CHEN, G. JIN, Y. SONG, Q. ZHANG, X. SONG and J. CAO</i>	450
Design and optimization of electrolyte flow fields in electrochemical machining of cross-channel array with tool vibration	
<i>Y. LIU, J. LIU, D. ZHU and H. WANG</i>	461
Trajectory optimisation in electrical discharge machining of threedimensional curved and twisted channels	
<i>J. ZHAO, Y. QIU, J. YUAN and C. LIU</i>	473
Design and development of a five-axis machine tool with high accuracy, stiffness and efficiency for aero-engine casing manufacturing	
<i>Y. WANG, D. WANG, S. ZHANG, Z. TANG, L. WANG and Y. LIU</i>	485
Pose-free assembly retrieval based on spatial-contact skeleton	
<i>J. YU, J. PANG, J. ZHANG and Y. LI</i>	497
A trajectory planning method on error compensation of residual height for aero-engine blades of robotic belt grinding	
<i>C. LV, L. ZOU, Y. HUANG, X. LIU, Z. LI, M. GONG and H. LI</i>	508
Investigations on femtosecond laser-induced surface modification and periodic micropatterning with anti-friction properties on Ti6Al4V titanium alloy	
<i>X. PAN, W. HE, Z. CAI, X. WANG, P. LIU, S. LUO and L. ZHOU</i>	521
