Aims and Scope

*Chinese Journal of Aeronautics (CJA)* is an open access, peer-reviewed international journal which publishes papers of outstanding scientific and technological work monthly.

The main Aim of the Journal is to report the scientific and technological achievements frontiers in aeronautic and astronautic engineering, in both theory and practice, such as theoretical research papers, experiment ones, research notes, comprehensive reviews, technological briefs and other reports on the latest development, and all are related to the fields of aeronautics and astronautics, as well as those ground equipment concerned.

The Scope of the Journal is considerably wide, including

- Fluid mechanics
- Flight mechanics
- Aeroengine
- Solid mechanics
- Structure and flight vehicle design
- Material science and engineering
- Mechanology and manufacture technology
- Electronics and electrical engineering
- Control
- Equipment concerned with flight vehicle

The Journal serves readers and welcomes papers from all over the world.
