CONTENTS

Fluid Mechanics and Flight Mechanics

Numerical and experimental study of bleed impact in multistage axial compressors
B. LIU, X. ZHUANG, G. AN and X. YU 1

A practical filter error method for aerodynamic parameter estimation of aircraft in turbulence
Q. WANG, F. ZHENG, W. QIAN and D. DING 17

A power and thermal management system for long endurance hypersonic vehicle
L. GUO, L. PANG, X. YANG, J. ZHAO and D. MA 29

Optimization of multi-element airfoil settings considering ice accretion effect
J. DAI, H. LI, Y. ZHANG and H. CHEN 41

Dynamics, stability, and control of a four-cable mount system for wind tunnel test
Z. ZHAO, Z. ZHAO, Y. YAN, K. ZENG, X. SHI and H. WU 58

Improving aircraft aerodynamic performance with bionic wing obtained by ice shape modulation
L. XIE, H. LIANG, H. ZONG, Y. WU, Y. LI, Z. SU and X. LIU 76

Geometrical and electrical optimization of NS-SDBD streamwise plasma heat knife for aircraft anti-icing
Z. SU, H. LIANG, H. ZONG, J. LI, X. FANG, B. WEI, J. CHEN and W. KONG 87

Solid Mechanics and Vehicle Conceptual Design

Nonlinear modal electromechanical coupling factor for piezoelectric structures containing nonlinearities
Y. WU, Y. FAN and L. LI 100

Nonlinear characteristic investigation of magnetorheological damper-rotor system with local nonlinearity
J. WANG, Y. LIU, Z. QIN, L. MA and F. CHU 111

Optimization of fixed aviation support resource station configuration for aircraft carrier based on aircraft dispatch mission scheduling
Y. LIU, W. HAN, X. SU and R. CUI 127

Electronics and Electrical Engineering and Control

Variable structure multiple model fixed-interval smoothing
B. ZHANG, Y. GAO and Z. DUAN 139

A method for satellite time series anomaly detection based on fast-DTW and improved-KNN
L. CUI, Q. ZHANG, Y. SHI, L. YANG, Y. WANG, J. WANG and C. BAI 149

Design of hybrid-electric aircraft with fault-tolerance considerations
V. MARCIELLO, F. OREFICE, F. NICOLOSI, D. CILIBERTI and P. DELLA VECCHIA 160

A robust Poisson multi-Bernoulli filter for multi-target tracking based on arithmetic average fusion
Z. SU, H. JI, C. TIAN and Y. ZHANG 179

Image motion and experimental study of a 0.1 space pointing measuring instrument for micro-vibration conditions
L. LI, L. YUAN, L. WANG, M. WANG, X. GONG, J. SUI, Y. WU and R. ZHENG 191

Experimental research on aero-propulsion coupling characteristics of a distributed electric propulsion aircraft
X. ZHANG, W. ZHANG, W. LI, X. ZHANG and T. LEI 201

万方数据

Surrogate role of machine learning in motor-drive optimization for more-electric aircraft applications
Y. GAO, B. CHEONG, S. BOZHKO, P. WHEELER, C. GERADA and T. YANG 213
Reachable set estimation for spacecraft relative motion based on bang-bang principle
L. SHAO, H. MIAO, R. HU and H. LIU 229
Event-triggered and consensus-based attitude tracking alignment for discrete-time multiple spacecraft system exploiting interference
P. LI, X. WEN, H. LIU and Y. LU 241
Adaptive vector field based accurate homing control of aerial delivery systems
Y. GUO, J. YAN, C. WU, X. WU and B. XIAO 256
Aerial-ground collaborative routing with time constraints
J. XING, L. SU, W. HONG, L. TONG, R. LYU and W. DU 270
Reinforcement learning based dynamic distributed routing scheme for mega LEO satellite networks
Y. HUANG, S. WU, Z. KANG, Z. MU, H. HUANG, X. WU, A.J. TANG and X. CHENG 284

Material Engineering and Mechanical Manufacturing

Analysis of Chang'e-5 lunar core drilling process (*Cover article*)
Y. ZHENG, M. YANG, X. DENG, S. JIN, J. PENG, Y. SU, Z. GU, L. CHEN, Y. PANG and N. ZHANG 292
Stress corrosion behavior of 2195-T8 Al-Li alloy with an artificial pit exposed to a 30vol% HNO_3 solution
D. LIU, G. TIAN, Z. YANG, G. JIN, W. ZHANG, Y. WANG and H. WEI 304
Improving Mode II delamination resistance of curved CFRP laminates by a Pre-Hole Z-pinning (PHZ) process
X. TENG, Y. XU, W. ZHANG, X. HUI, W. LIU and C. MA 316
Application of dynamic recrystallization model in AZ12 magnesium alloy rolling process
Y. NIU, Y. SHI, X. ZHAO, Q. LE, Y. WANG, S. REN and N. WANG 325
Combustion mechanism of fluorinated organic compound-modified nano-aluminum composite particles: Towards experimental and theoretical investigations
S. ZHANG, Y. SUN, J. CHEN, T. SUN and B. ZHU 334
Influence of lunar regolith compressibility on sampling performance of thick wall spiral drills
Y. PANG, T. ZHANG, H. WEI, T. ZENG, Y. ZHANG, G. MO, K. XU, S. YIN, G. WANG, X. ZHANG, X. LAI and X. DING 350
Influence and experiment of cable-net manufacturing errors on surface accuracy of mesh reflector antennas
Z. SUN, B. DUAN, Y. Zhang and D. YANG 363
Analysis of oil shedding and ligaments formation on bearing rotary elements
D. ZHU, G. CHEN, Y. LI, C. ZHANG and L. WANG 377
Experimental investigation of rotary sinking electrochemical discharge milling with high-conductivity salt solution and non-pulsed direct current
X. YUE, Y. MA, N. QU and H. LI 388
Workspace, stiffness analysis and design optimization of coupled active-passive multilink cable-driven space robots for on-orbit services
J. PENG, H. WU, T. LIU and Y. HAN 402
