Volume 36, No.3, March 2023

CONTENTS

Fluid Mechanics and Flight Mechanics

Performance measurement and evaluation of an ionic liquid electrospray thruster (*Cover article*)
C. HUANG, J. LI and M. LI..... 1

Compressor geometric uncertainty quantification under conditions from near choke to near stall
J. WANG, B. WANG, H. YANG, Z. SUN, K. ZHOU and X. ZHENG..... 16

Oblique shock train motion based on schlieren image processing
L. XUE, C. CHENG, C. WANG, L. ZHANG, K. LI and K. CHENG..... 30

Numerical study of a trapezoidal bypass dual throat nozzle
S. HUANG, J. XU, K. YU, Y. WANG, R. PAN, K. CHEN and Y. ZHANG..... 42

Numerical simulation of hypersonic thermochemical nonequilibrium flows using nonlinear coupled constitutive relations
S. ZENG, Z. YUAN, W. ZHAO and W. CHEN..... 63

Hypersonic shock wave and turbulent boundary layer interaction in a sharp cone/flare model
F. TONG, J. DUAN, J. LAI, D. SUN and X. YUAN..... 80

Transitional wave configurations between Type III and Type IV oblique-shock/bow-shock interactions
J. PENG, S. LI, F. YANG, M. LIN, G. HAN and Z. HU..... 96

Numerical simulation method of surge experiments on gas turbine engines
X. ZHENG, H. ZENG, B. WANG, M. WEN, H. YANG and Z. SUN..... 107

Capturing transition and non-transition flows with a new shear stress transport model
M.M. RAHMAN..... 121

Solid Mechanics and Vehicle Conceptual Design

Influence of stealth aircraft dynamic RCS peak on radar detection probability
X. LU, J. HUANG, Y. WU and L. SONG..... 137

Macro-phenomenological high-strain-rate elastic fracture model for ice-impact simulations
J. FAN, Q. YUAN, F. JING, G. BAI and X. SHEN..... 146

A novel compilation method of comprehensive mission spectrum of aero-engine maneuvering load based on use-related mission segment
X. NIU, Q. LU, Z. SUN and Y. SONG..... 161

Conceptual design and analysis of legged landers with orientation capability
R. LIN, W. GUO, C. ZHAO and M. HE 171

A new interpretable fault diagnosis method based on belief rule base and probability table
Z. MING, Z. ZHOU, Y. CAO, S. TANG, Y. CHEN, X. HAN and W. HE 184

Preload relaxation analysis and reliable life prediction of space connection and separation device based on accelerated degradation tests
G. LIU, Q. WU, Z. WANG, Y. LUO and Y. QI 202

Selective thermal emission and infrared camouflage based on layered media
Q. JI, X. CHEN, V. LAUDE, J. LIANG, G. FANG, C. WANG, R. ALAEE and M. KADIC..... 212

万方数据

Spatial transformation of general sampling-aliasing frequency region for rotating-blade parameter identification with emphasis on single-probe blade tip-timing measurement
J. CAO, Z. YANG, G. TENG, S. TIAN, G. YE and X. CHEN 220
Improving accuracy of damage quantification based on two-level consistency control of PZT layers
Y. REN, Q. XU and S. YUAN 241

Electronics and Electrical Engineering and Control

Optimal crater landmark selection based on optical navigation performance factors for planetary landing
Y. XIU, S. ZHU, R. XU and M. LI..... 254
Information space of sensor networks: Lagrangian, energy-momentum tensor, and applications
M. TAO, S. WANG, H. CHEN, H. PAN, J. SHI and Y. ZHANG..... 271
Design and analysis of a novel hybrid cooling method of high-speed high-power permanent magnet assisted synchronous reluctance starter/generator in aviation applications
H. GUO, X. HE, J. XU, W. TIAN, X. DING, L. JU and D. LI..... 285
Conditional self-attention generative adversarial network with differential evolution algorithm for imbalanced data classification
J. NIU, Z. LIU, Q. PAN, Y. YANG and Y. LI 303
STABC-IR: An air target intention recognition method based on bidirectional gated recurrent unit and conditional random field with space-time attention mechanism
S. WANG, G. WANG, Q. FU, Y. SONG, J. LIU and S. HE 316
Close relative motion on distant retrograde orbits
C. YANG, M. WANG and H. ZHANG..... 335
A geographical and operational deep graph convolutional approach for flight delay prediction
K. CAI, Y. LI, Y. ZHU, Q. FANG, Y. YANG and W. DU..... 357
Distributed formation control of multiple aerial vehicles based on guidance route
J. CHEN, R. ZHOU, G. SUN, Q. LI and N. ZHANG..... 368

Material Engineering and Mechanical Manufacturing

Effect of hygrothermal aging on moisture diffusion and tensile behavior of CFRP composite laminates
Y. DU, Y. MA, W. SUN and Z. WANG..... 382
Thermo-mechanical properties of RTM-made carbon fibre/polyimide composite attaching collar under transient heating
S. JIANG, C. LUO, P. ZHANG, J. BAO, P. CAI and X. XIA 393
Higher-order vibration of thick composite and sandwich plates based on an alternative higher-order model
J. DENG, T. WU, Z. WU, Z. LIU and X. REN 406
Influence of mandrel-cores filling on size effect of cross-section distortion of bimetallic thin-walled composite bending tube
Y. ZHU, M. WAN, W. CHEN, Y. WANG, W. TU and F. XU 421
A policy iteration method for improving robot assembly trajectory efficiency
Q. ZHANG, Z. XIE, B. CAO and Y. LIU..... 436
Digital twin model of gas turbine and its application in warning of performance fault
M. HU, Y. HE, X. LIN, Z. LU, Z. JIANG and B. MA..... 449
Characteristics of surface and subsurface of formed thread parts by axial-infeed thread rolling process
S. ZHANG, D. ZHANG, S. ZHAO, F. JIANG and M.G. LEE 471

Guide for Authors

About Journal

Chinese Journal of Aeronautics (*CJA*) is a comprehensive academic journal dealing with the fields of aeronautics and astronautics. It reports researches concerning the two fields in China and abroad to promote the academic exchange. Founded in 1988 and sponsored by the Chinese Society of Aeronautics and Astronautics and Beihang University, *CJA* publishes papers monthly.

The intended readers of the journal are specialized technical workers, teachers and students in colleges and universities and the related personnel of management, and they devote themselves to or are interested in the scientific research, teaching, design, experimentation, manufacture or application in the industries of aeronautics and astronautics.

Manuscript Requirement

The contributed manuscripts should reflect the latest developments of the aerospace discipline, with emphasis on academic novelty and thoughtfulness, as well as practicability. The contributions should highlight the main points, with the dull narration and ordinary derivation reduced or deleted as much as possible. The same statements should not be repeated in Abstract, Introduction and Conclusions.

The writing style should be simple and straightforward, the data should be reliable, and any undue self-appraisal must be abandoned. Manuscripts of low quality, of poor English writing or with tedious quotations will be directly returned by the Editorial Office without peer review.

Submission

All the manuscripts should be submitted online on the website www.journal-aero.com or www.elsevier.com/cja/. Authors should download and fill in the relevant forms, including Title Page (for all authors) and Confidentiality Examination Form (for authors with Chinese affiliation), which are available at http://hkxb.buaa.edu.cn/CN/column/column86.shtml. Papers already submitted to conferences should not be submitted to *CJA*. One manuscript (including the case of slight revision) should not be submitted to two journals. Strict examination and investigation will be exerted in case that one paper is classified into several ones with the same central idea. Papers already published with other languages should not be submitted to *CJA*.

Review

All the manuscripts will be reviewed critically by at least two independent and anonymous referees. This procedure will be followed even if the manuscript is the result of solicitation or encouragement by the editors. The final decision on publication is made by the Editor-in-Chief upon recommendation of an Associate Editor. The acceptance of the manuscript will be notified by the Editorial Office and review comments will be provided for those rejected ones.

Publication

CJA has adopted "**article in press**" since 2013, i.e., once the manuscript is accepted, it will be immediately published online at Elsevier's ScienceDirect platform. Meanwhile, all the articles will be **"open access"** for wider dissemination.

According to the related regulations, there is publication fee for each accepted article. Color printing will incur additional charges. Please consider this cost when submitting the manuscripts. Privileges of the above expenses will be offered to those manuscripts highly appraised by referees. Reviewers who return their reviews in time with good quality and are in support of the journal development will enjoy discount.

Any comment and divergence from readers concerning the published papers of different kinds in the journal will be dealt with seriously. The Editorial Office will make arrangements for its reappraisal, and an open academic discussion will be held. The Laws of Copyright are strictly observed and implemented, and the citation of other papers must be included with their source mentioned in References.
