(Huaxue Xuebao)

第 77 卷 第 7 期 2019 年 7 月 15 日

## 目次

### 综述

- 多糖化学合成研究进展 ..... 吴勇, 叶新山\*, 化学学报, 2019, 77(7), 581-597
- 酯的均相催化氢化研究进展 ..... 顾雪松, 李校根, 谢建华\*, 周其林, 化学学报, 2019, 77(7), 598-612
- OH 自由基总反应性的实地测量 ..... 杨新平, 王海潮, 谭照峰, 陆克定\*, 张远航\*, 化学学报, 2019, 77(7), 613-624

### 研究论文

- 钾掺杂对钒酸钠纳米片储钠性能的影响 ..... 宋学霞, 李继成, 李朝晖\*, 李喜飞\*, 丁燕怀, 肖启振, 雷钢铁, 化学学报, 2019, 77(7), 625-633
- 硬碳材料电极首周嵌钠过程的电化学阻抗谱研究 ..... 渠璐平, 任彤, 王宁, 史月丽, 庄全超\*, 化学学报, 2019, 77(7), 634-640
- 纳米 ZnO 的表面增强拉曼散射效应来源研究 ..... 倪宇欣, 张晨杰, 袁亚仙\*, 徐敏敏, 姚建林\*, 化学学报, 2019, 77(7), 641-646
- 铝离子聚合物固态电解质 ..... 康树森\*, 范少聪, 刘岩, 魏彦存, 李营, 房金刚, 孟垂舟\*, 化学学报, 2019, 77(7), 647-652
- 具有分级纳米结构的  $\text{In}_2\text{S}_3/\text{CdIn}_2\text{S}_4$  在可见光下催化苯甲胺的氧化偶联反应 ..... 刘茹雪, 何小燕, 牛力同, 吕柏霖, 余菲, 张哲, 杨志旺\*, 化学学报, 2019, 77(7), 653-660
- 氮掺杂碳包覆  $\text{Cu-ZrO}_2$  催化剂的制备及其催化脱氢性能研究 ..... 王永胜, 赵云鹭, 赵珍珍, 兰小林, 徐金霞, 徐伟祥, 段正康\*, 化学学报, 2019, 77(7), 661-668

\* 通信联系人.

**On the cover:** Chemical pre-intercalation of  $K^+$  ion renders the layered  $Na_5V_{12}O_{32}$  material to possess expanded interlayer spacing and stable structure. The obtained  $Na_5K_xV_{12}O_{32}$  shows good rate capability and long-term cycling stability when used as cathode material for Na-ion batteries. [Li, Zhaohui *et al.* on page 625-633.]

### Review

#### Recent Advances in Chemical Synthesis of Polysaccharides

Wu, Yong; Ye, Xin-Shan\*

*Acta Chim. Sinica* **2019**, 77(7), 581-597

Some representative methods and strategies for saccharide synthesis are summarized in this review, and highlights their applications in the chemical synthesis of complex polysaccharides.

#### Recent Progress in Homogeneous Catalytic Hydrogenation of Esters

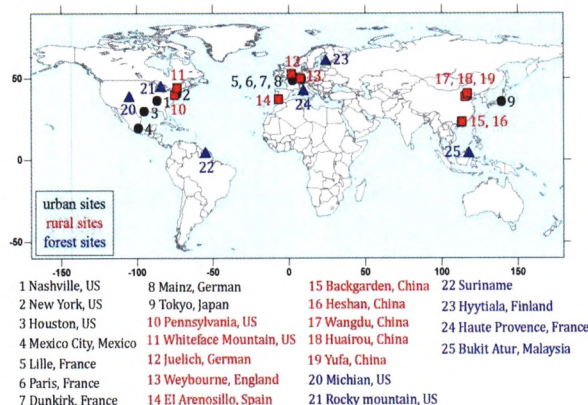

Gu, Xuesong; Li, Xiaogen; Xie, Jianhua\*; Zhou, Qilin

*Acta Chim. Sinica* **2019**, 77(7), 598-612

A brief overview on the progress in homogeneous catalytic hydrogenation of esters achieved in last ten years is presented from two aspects: (1) the development of ligands and transition-metal catalysts; (2) the advances of catalytic asymmetric hydrogenations.

## Observations of OH Radical Reactivity in Field Studies

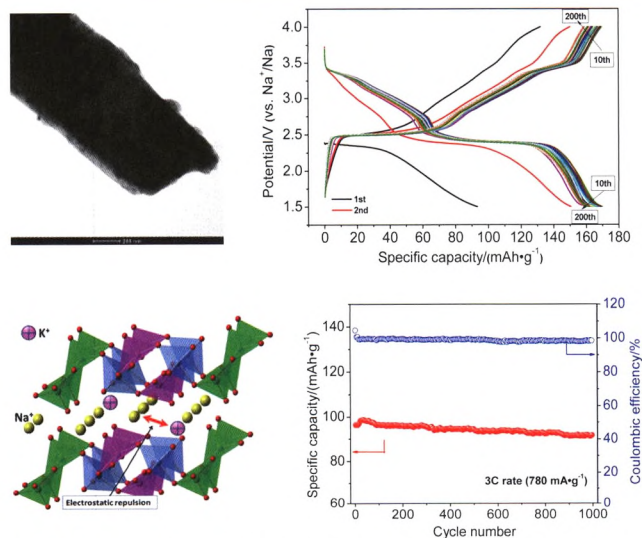

The observation sites of OH radical reactivity globally were summarized in the above figure, including urban, rural and forest areas. The sites are mainly distributed in East Asia, Europe and North America, and the sites in China are mainly concentrated in Beijing-Tianjin-Hebei region and the Pearl River Delta region. The OH radical reactivity varies significantly on spatial, diurnal and seasonal bases. A quantitative study of OH radical reactivity in different environmental conditions will provide an opportunity for the improvement of atmospheric chemical mechanism.

Yang, Xinping; Wang, Haichao; Tan, Zhaofeng; Lu, Keding\*; Zhang, Yuanhang\*

*Acta Chim. Sinica* 2019, 77(7), 613-624

## Article

### Effect of K-Doping on the Sodium-storage Performance of Sodium Vanadate Nanoplates

Song, Xuexia; Li, Jicheng; Li, Zhaohui\*; Li, Xifei\*; Ding, Yanhuai; Xiao, Qizhen; Lei, Gangtie

*Acta Chim. Sinica* 2019, 77(7), 625-633

K<sup>+</sup>-doped sodium vanadate ( $\text{Na}_5\text{K}_x\text{V}_{12}\text{O}_{32}$ ) was successfully prepared by a hydrothermal method, and used as cathode material for Na-ion batteries. The as-prepared cathode displayed significant improvements upon rate capability and cyclability by pillar role of K<sup>+</sup> ions which are doped into interlayer of crystal.

### Electrochemical Impedance Spectroscopy Study on the First Sodium Insertion Process of Hard Carbon Material Electrode

Qu, Luping; Ren, Tong; Wang, Ning; Shi, Yueli; Zhuang, Quanchao\*

*Acta Chim. Sinica* 2019, 77(7), 634-640

The electrode interface characteristics of hard carbon material electrode in sodium ion battery were discussed by electrochemical impedance spectroscopy, and the electrochemical impedance spectroscopy (EIS) experimental results were fitted by selecting appropriate equivalent circuit. The variation of SEI film resistance and electron resistance with electrode polarization potential in the first week of hard carbon electrode was obtained.

### Determination on Origination of Surface Enhanced Raman Scattering Effect on Nano ZnO Substrate

Laser/nm	EF		
	PNTP	TP	PATP
532	9.36	35.42	27.33
638	14.01	25.23	22.36

The SERS enhancement effect of different *para* substituent probes on the broom-like nano-ZnO at different excitation wavelengths was tested, the surface enhancement factor was calculated, and the possible enhancement mechanism was proposed. The enhancement effect of ZnO on *p*-nitrophenylthiophenol (PNTP) is mainly derived from the non-resonant chemical mechanism, while the enhancement effect of ZnO on phenylthiophenol (TP) and *p*-aminophenylthiophenol (PATP) is mainly derived from the charge transfer mechanism.

Ni, Yuxin; Zhang, Chenjie; Yuan, Yaxian\*; Xu, Minmin; Yao, Jianlin\*

*Acta Chim. Sinica* **2019**, 77(7), 641-646

### Al-Ion Polymer Solid Electrolyte

Kang, Shusen\*; Fan, Shaocong; Liu, Yan; Wei, Yancun; Li, Ying; Fang, Jingang; Meng, Chuizhou\*

*Acta Chim. Sinica* **2019**, 77(7), 647-652

By using crown ether as both functional additive and coordination group as well as PEO as basement through a solution casting method, a new kind of solid Al-ion electrolyte is prepared, which has a high ion-conductivity and broad electrochemical potential window.

### Hierarchical In<sub>2</sub>S<sub>3</sub>/CdIn<sub>2</sub>S<sub>4</sub> Heterostructured Nanohybrids as Photocatalyst for Coupling of Benzyl Amines under Visible Light

Liu, Ruxue; He, Xiaoyan; Niu, Litong; Lv, Bolin; Yu, Fei; Zhang, Zhe; Yang, Zhiwang\*

*Acta Chim. Sinica* **2019**, 77(7), 653-660

Hierarchical In<sub>2</sub>S<sub>3</sub> nanotubes were prepared from NH<sub>2</sub>-MIL-68(In) and thiourea, and a cation exchange method was used to synthesize hierarchical In<sub>2</sub>S<sub>3</sub>/CdIn<sub>2</sub>S<sub>4</sub> heterostructured composites. The activity of the as-prepared samples under light illumination was investigated through the photooxidation coupling of benzyl amines. The results revealed that the product of imines could be detected not only in air but also in N<sub>2</sub> conditions, which make the condition of the conversion become milder.

### Study on Preparation of Cu-ZrO<sub>2</sub> Catalyst Coated by Nitrogen-Doped Carbon and Catalytic Dehydrogenation Performance

Wang, Yongsheng; Zhao, Yunlu; Zhao, Zhenzhen; Lan, Xiaolin; Xu, Jinxia; Xu, Weixiang; Duan, Zhengkang\*

*Acta Chim. Sinica* **2019**, 77(7), 661-668

A nitrogen-doped carbon-coated copper-zirconium catalyst was successfully prepared by simple pyrolysis method, and showed good oxygen-free dehydrogenation catalytic performance in the reaction of diethanolamine dehydrogenation to prepare iminodiacetic acid. Compared with ordinary copper zirconium catalysts, it had more Lewis basicity and the reaction time was reduced by 40%.

ACTA CHIMICA SINICA

- 同行评审
- 中国创刊最早的化学期刊(始于1933年)
- 中国第一个被SCI收录的化学期刊
- 中国“百强科技期刊”
- 高水平、高质量、高效率
- 免费投稿、审稿、发表
- 免费阅读、开放获取
- SCI影响因子最高的中文期刊

Tel.: +86-21-54925242
