第 81 卷 第 2 期 2023 年 2 月 15 日

目 次

研究通讯

- 可见光促进(氮杂)芳香胺与重氮乙酸乙酯的 *N*-烷基化反应
..... 赵亚婷, 刘帆, 汪秋安*, 夏吾炯*, 化学学报, 2023, 81(2), 111-115

研究论文

- 载药蛋白质/聚苯硼酸复合纳米微球制备及其释药性能研究
..... 殷雪旸, 顾恺, 邵正中*, 化学学报, 2023, 81(2), 116-123
多共振热激活延迟荧光过程的理论研究
..... 张少秦, 李美清, 周中军*, 曲泽星*, 化学学报, 2023, 81(2), 124-130

综述

- 有机太阳能电池热失效机制及三元共混提升其热稳定性研究进展
..... 查汉, 房进, 闫翔鹏*, 杨永珍*, 马昌期*, 化学学报, 2023, 81(2), 131-145
晶态多孔材料合成方法的研究进展
..... 陈俊畅, 张明星, 王殳凹*, 化学学报, 2023, 81(2), 146-157
机器学习在新材料筛选方面的应用进展
..... 戚兴怡, 胡耀峰, 王若愚, 杨雅清, 赵宇飞*, 化学学报, 2023, 81(2), 158-174
生物基聚酯单体的定向催化制备
..... 于璐瑶, 任祯, 杨宇森*, 卫敏, 化学学报, 2023, 81(2), 175-190
有机共晶非线性光学材料及应用研究进展
..... 郝良朦, 朱伟钢*, 化学学报, 2023, 81(2), 191-206
层状复合氢氧化物的有机改性方法及应用研究进展
..... 杨娜, 马建中*, 石佳博*, 郭旭, 化学学报, 2023, 81(2), 207-216

ACTA CHIMICA SINICA

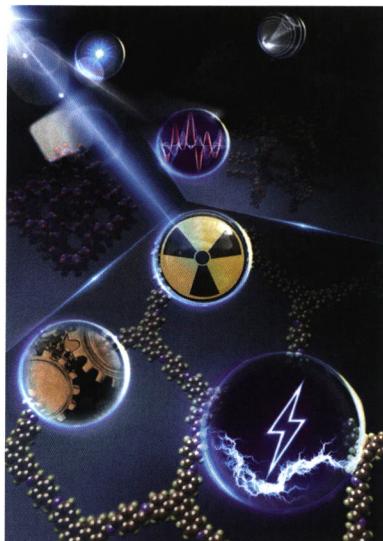

Vol. 81, No. 2 February 15, 2023

Contents

On the cover: Thermal stability is a roadblock on the road to commercialization of organic solar cells, and ternary doping of the active layer is certainly an effective strategy. [Yan, Lingpeng *et al.* on page 131-145.]

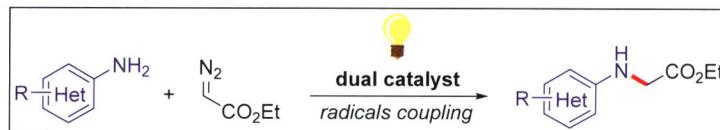

On the inside front cover: Zeolites, metal-organic frameworks (MOFs), and covalent organic frameworks (COFs) are the most representative crystalline porous materials. This review mainly focuses on the synthesis methodologies of crystalline porous materials and provides an overview of the various synthesis methods. [Wang, Shuaoh *et al.* on page 146-157.]

Communication

Visible-Light-Promoted *N*-Alkylation Reactions of (aza)Aromatic Amines with Ethyl Diazoacetate

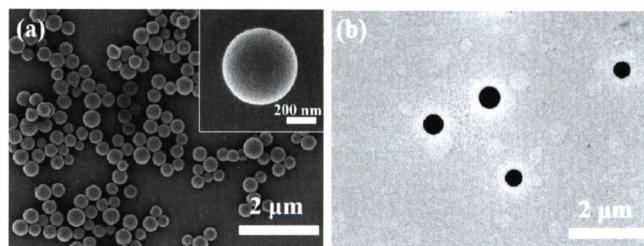

Zhao, Yating; Liu, Fan; Wang, Qiuhan*; Xia, Wujiong*

Acta Chim. Sinica 2023, 81(2), 111-115

Visible-light-promoted *N*-alkylation reactions of (aza)aromatic amines with ethyl diazoacetate were reported herein. A series of α -amino acid derivatives were synthesized by the combination of photocatalyst and Lewis-acid catalyst. This method featured in mild reaction conditions, good functional group tolerance and wide range of substrate scope. Mechanism experiments indicated the reaction involved in alkyl radical intermediate that formed by the proton-coupled electron transfer (PCET) step between ethyl diazoacetate and excited photocatalyst. Radicals cross-coupling then occurred to produce the final *N*-alkylation products under the coordination of Lewis-acid.

Article

Preparation of the Protein/Polyphenylboronic Acid Nanospheres for Drug Loading and Unloading

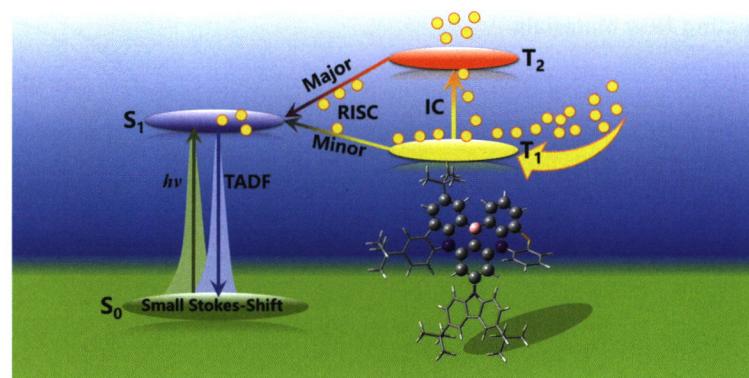

Yin, Xueyang; Gu, Kai; Shao, Zhengzhong*

Acta Chim. Sinica 2023, 81(2), 116-123

Silk protein/polyphenylboronic acid nanospheres of 540 nm in size with high drug loading and encapsulation rates were prepared by a simple and rapid method to achieve controlled drug release for about seven days and its slow release behavior was pH-responsive. It synergized with the main drug to improve its free radical scavenging rate and scavenging efficiency, which was superior to the direct drug delivery group.

Theoretical Study on the Multiple Resonance Thermally Activated Delayed Fluorescence Process

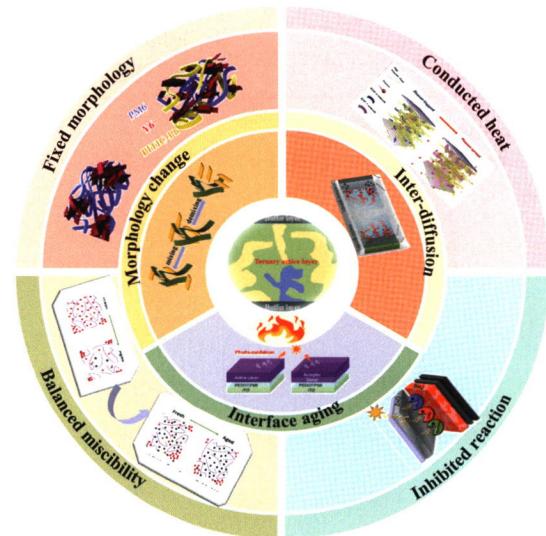

Zhang, Shaoqin; Li, Meiqing; Zhou, Zhongjun*; Qu, Zexing*

Acta Chim. Sinica 2023, 81(2), 124-130

Review

Research Progress of Thermal Failure Mechanism and Ternary Blending to Improve Thermal Stability of Organic Solar Cells

Zha, Han; Fang, Jin; Yan, Lingpeng*; Yang, Yongzhen*; Ma, Changqi*

Acta Chim. Sinica 2023, 81(2), 131-145

The highly triplet excited state T_2 is found to play an important role in the multiple resonance thermally activated delayed fluorescence (MR-TADF), and MR-TADF follows $T_1 \rightarrow T_2 \rightarrow S_1 \rightarrow S_0$ pathway.

The mechanism of thermal degradation of organic solar cells (OSCs) is summarized in this review. On this basis, the progress of the application of ternary strategy in improving the thermal stability of OSCs and its mechanism of action are highlighted. Finally, the development of the application of ternary strategy in OSCs is prospected.

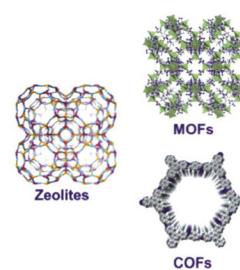

Research Progress of Synthesis Methods for Crystalline Porous Materials

Chen, Junchang; Zhang, Mingxing; Wang, Shua*

Acta Chim. Sinica 2023, 81(2), 146-157

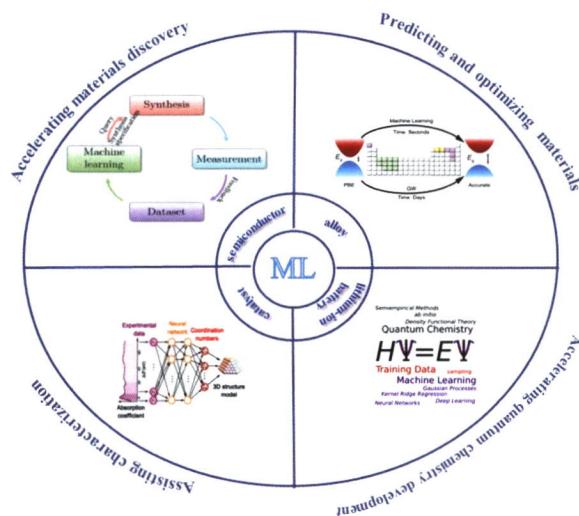

Research Progress of Various Synthesis Methods for Crystalline Porous Materials:

- Mechanochemical Synthesis
- Sonochemical Synthesis
- Microwave-Assisted Synthesis
- Electrochemical Synthesis
- Photochemical Synthesis
- Radiation chemical Synthesis
- Other Methods

This review mainly focuses on the synthesis methodologies of crystalline porous materials and provides an overview of the various synthesis methods.

Recent Advance of Machine Learning in Selecting New Materials

Qi, Xingyi; Hu, Yaofeng; Wang, Ruoyu; Yang, Yaqing; Zhao, Yufei*

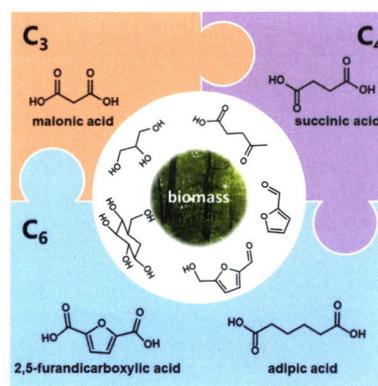

Acta Chim. Sinica 2023, 81(2), 158-174

In this review, the basic process of machine learning and its application in materials science are summarized. This review focuses on the application of machine learning in different functions, as well as the performance prediction in the fields of catalyst materials, lithium-ion batteries, semiconductor materials and alloy materials, presenting the latest progress in materials development.

Directed Preparation of Biomass-based Polyester Monomers by Catalytic Conversion

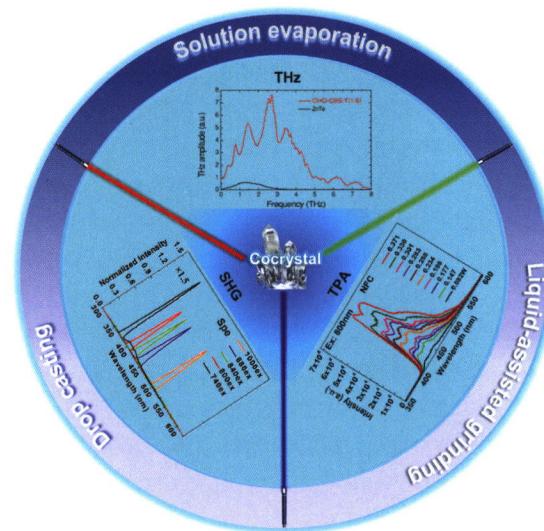

Yu, Luyao; Ren, Zhen; Yang, Yusen*; Wei, Min

Acta Chim. Sinica 2023, 81(2), 175-190

In this review, the catalytic systems for the preparation of C₃~C₆ dicarboxylic acid, including malonic acid, succinic acid, 2,5-furandicarboxylic acid and adipic acid, are reviewed from the aspects of biomass raw materials, catalyst performance evaluation and reaction mechanism, and the development of biomass dicarboxylic acid preparation are prospected.

Research Progress on Organic Co-crystals Nonlinear Optics Materials and Applications

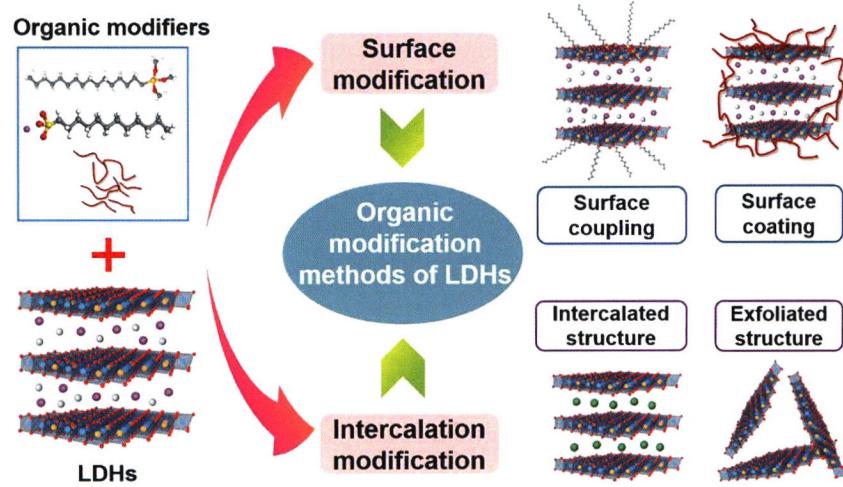

Hao, Liangmeng; Zhu, Weigang*

Acta Chim. Sinica 2023, 81(2), 191-206

Organic molecular cocrystals synthesized by the solution evaporation, drop casting and liquid-assisted grinding have been used in nonlinear optics such as two-photon absorption, second harmonic generation and terahertz wave.

Organic Modification of Layered Double Hydroxides and Its Applications

Yang, Na; Ma, Jianzhong*; Shi, Jiabo*; Guo, Xu

Acta Chim. Sinica 2023, 81(2), 207-216

The recent research progress in the organic modification methods of layered double hydroxides and their applications in the fields of flame retardancy, adsorption, catalysis, gas barrier, luminescence, energy storage and biomedicine are summarized in this review.

“《化学学报》2021 年度最有影响力论文奖”揭晓

为推动促进国内外化学期刊发展、加强化学工作者交流，根据《化学学报》编委会决议，设立“《化学学报》XX 年度最有影响力论文奖”。该奖对获奖人的国籍、居住地、单位、年龄等没有任何限制，由《化学学报》编委会根据文章年度 SCI 引用情况评出（参考影响因子计算规则，兼顾当年发表当年引用情况，按第 $n-2$ 年至第 n 年发表的文章在第 n 年引用情况排序），奖励通信作者荣誉证书、文章第一作者荣誉证书和奖金 1000 元。奖励 10 篇左右。已获奖的论文次年不再重复奖励。

“《化学学报》2021 年度最有影响力论文奖”获奖列表：

14 次：

廖港, 吴勇杰, 史炳锋
非共价作用在过渡金属催化的选择性碳
氢键活化中的应用
化学学报 2020, 78 (4), 289-298
