CONTENTS

The application and development of composite sonar domes on foreign naval warships	LI Nan, XIE Hui-chao, <i>et al</i> (1)
Research on new ship bulkhead structure under impact damage load	YIN Qun, LI Shu, <i>et al</i> (6)
Experimental investigation on aluminum foam sandwich structure under medium and high velocity bullet impact	FANG Zhi-wei, HOU Hai-liang, <i>et al</i> (12)
Non-uniform modulation feature of ship propeller cavitation noiseand its application	LIU Qi-jun, QIU Jia-xing, <i>et al</i> (18)
The numerical analysis of non-cavitations noise of the propeller in steady flow	ZHU Jiang-bo, FU Jiang-yan, <i>et al</i> (23)
Numerical simulation of structural strength of icebreaker in the crash-breaking process	FENG Wei-yong, LI Hui (28)
Structural dynamic response of the ice navigating ship in level ice	JIN Yan, HU Jia-jun, <i>et al</i> (33)
Coupling hydrodynamic response analysis of wind generator tower and maintenance ship	XIE Yun-ping, XU Xiao-sen, <i>et al</i> (38)
Dynamical structure optimization based on a 48 000 dwt training vessel	XU Si-hao, LIU Hong-min, <i>et al</i> (43)
Analysis of cavity flow characteristics by hole distribution	ZHANG Hang, FENG Da-kui, <i>et al</i> (48)
Experimental study on infrared signature of thermal wake of remote control submarine	HU Ri-cha, GUO Liang, <i>et al</i> (53)
Strength assessment and reinforcements of self-unloading bulk carrier	CUI Hong-kui, XIA Li-juan, <i>et al</i> (57)
Noise and vibration reduction effects of gas-bag coating stiffened by steel wires	DUAN Jia-xi, ZHOU Qi-dou, <i>et al</i> (62)
Experiment and numerical simulation research on vibration character of flow induced cavity on sail	ZHANG Han-qin, ZHENG Guo-yin, <i>et al</i> (66)
Simulation analysis of seabed seismic wave generated by different depth of sound sources	WANG Xu, LV Jun-jun (72)
Research on the effect of γ -Al ₂ O ₃ for the catalytic properties of mesoporous rare-earth composite oxides	GUO Jun-wu, DONG Li-hua, <i>et al</i> (77)
Reverberation suppression based on fractional fourier transform	LI Xi-you, HUANG Fu-jin (83)
Research on the equivalence and modelling of the nonmetallic isolator with complicate structure	SONG Yong, JING Jian-quan (88)
Numerical compute about near distance bottom reverberation of typical sound speed profiles in shallow sea	CAO Yu-lu, YANG Xiao-gang, <i>et al</i> (94)
Method of impedance calculation of three-way pipe with arbitrary supports and branch angles considering fluid-structure interaction	LI Yan-hua, HUANG Bing-yang (98)
Simulation research based on AMESim for a double-acting reciprocating pump	WANG Shun, HUANG Ya-nong, <i>et al</i> (105)
Optimal design of touch-sensitive human-computer interaction of ship maneuvering simulator	FU Bin, REN Hong-xiang, <i>et al</i> (110)
Design and implementation of the air quality evaluation monitoring system in marine engine room	LI Fei, HAN Xiao-kun, <i>et al</i> (115)
Modeling and analysis of bus network in the integrated ship electronic system using deterministic and stochastic petri net	MA Shao-hui, HAI Ben-zhai, <i>et al</i> (119)
Noise control design and test study of high differential pressure equalizing system	CAI Biao-hua, FANG Chao, <i>et al</i> (125)
Fatigue life predication of rudder structure under transient shock load	LI Yun-xiang (129)
Research on hydrogen generation system by water electrolysis under wide power fluctuation	NING Nan (133)
Development on the multifunctional accessorial device for injecting lubricating oil into certain marine special equipment	YANG Shun-cheng, WANG Jian-bing, <i>et al</i> (137)
Research on the different kinds of speed sensorless induction machine flux observer control technology	WANG Xian-ming, HE Lu, <i>et al</i> (142)
Design and implementation of ship security system	JIANG Hui-fang (146)
Management discussion on the audio visual archives of scientific research work for shipbuilding industry	DUAN Yan (150)
Research on the design philosophy and evolution of the U.S. aircraft carrier flight deck	LI Jing-xi (153)
