CONTENTS

Research of the fabrication of micro channels in a fused silica substrate using laser-induced plasma	FENG Cai-ling et al. (433)
Photoelectric detection system for measuring the overprint deviation of printing press ...	SUN Yuan-yuan et al. (436)
Chaos synchronization in coupled semiconductor lasers of multiple modulated time delays	Hu Ju-ju et al. (440)
Research of densification of 316L stainless steel powder in selective laser melting process	SUN Ting-ting et al. (443)
Impact of inter-layer scan strategy on quality of direct fabrication metal parts in SLM process	WANG Di et al. (447)
Low-amplitude screening-photovoltaic spatial solitons in two-photon photorefractive media	JI Xuan-mang et al. (452)
Optical characteristics study of the Cu-doped ZnO thin films	YU Ye-mei et al. (456)
AZ91 magnesium alloy welding based on YAG pulsed laser	LIU Shun-hong et al. (459)
Preparation of durable hydrophobic and antireflective silica coating	YAN Liang-hong et al. (463)
Simulation of 4FSK and performance analysis of bit error rate in the RoFSO system	KE Xi-zheng et al. (466)
Influence of system jitter on far field of coherently combined beams propagation in turbulent atmosphere	SHI Xiao-gang et al. (470)
Influence of random fluctuation of field phase on contrast ratio of far field coherent combined laser beams	LI Song-bai et al. (475)
Indoor simulation experiment study about transmission characteristics of dual wavelength laser	YUAN Zong-heng et al. (478)
Numerical study on fatigue crack growth of CT specimens treated by laser shot peening ...	YE Hong-wei et al. (482)
Filtering properties of 1-D photonic crystals with symmetrical and asymmetrical structures	ZHANG Fen et al. (486)
Modulation instability of silicon optical waveguide considering linear loss and biphotonic absorption	ZHOU Wei-lin et al. (489)
Grid fringe pattern Fourier transform profilometry	YANG Chu-ping et al. (493)
Designation of backscattering optical signal of ship wake	LIANG Rui-tao et al. (497)
Application of reflecting real-time digital holography in thermal stress field of rock	FAN Mei-xia et al. (502)
Study on process of laser spot welding for ultra-thin copper	LUO Zi-yi et al. (506)
Contrastive experimental research of soft-damage on CCD irradiated by XeF laser and YAG frequency-doubled laser	MA Lian-ying et al. (510)
Microstructure and property of 1.6% C ultrahigh carbon steel after laser surface treating	YUE Yun et al. (514)
Point measurement of absorptivity of 30CrMnSiA steel at different	

temperature in atmosphere ZHANG Yong-qiang et al. (517)

Focusing properties of Gaussian beams through two thin plano-convex
lens optical system YANG Qiu-ping et al. (520)

Research and design of discharge tube structure of fast-axial-flow CO₂ lasers LI Qing et al. (525)

Optimization of gas performance of the compact excimer laser DENG Guo-qing et al. (529)

Experimental study about laser beam wander in atmosphere ZHAO Qi et al. (532)

Research of measurement of laser reflectivity on sea surface ZANG Shou-hong et al. (535)

Target detection based on synthetic aperture ladar WANG En-hong et al. (538)

Propagation properties of partially coherent flat-topped beam array
in a turbulent atmosphere ZHONG Yan-li et al. (542)

Effect of temperature on the self-deflection of two-photon bright
screening photovoltaic solitons JIANG Qi-chang et al. (548)

Effects of laser shock processing on mechanical properties of AZ91 magnesium alloy PEI Xu et al. (552)

Study on capability of omni-direction laser warning systems based on
diffusive reflection detection CHEN Yu-dan et al. (557)

Effect of laser energy density on the dimension of nylon12/HDPE product REN Nai-fei et al. (561)

Propagation properties of J₀-correlated partially coherent flat-topped beams
in a turbulent atmosphere ZHU Zhuo-wei et al. (565)

Theoretical study and simulation of double beams combination system ZHANG Qiang et al. (569)

Research of analog signal's cross phase modulation in SOA LI Ya-jie(573)
