CONTENTS

Study on high-speed all-optical clock extraction using an amplified feedback laser	WANG Li et al. (1)
Effect of Y_2O_3 on microstructure and property of laser surface alloying on 40Cr steel	WU An-qi et al. (4)
Design and analysis of cell for automotive body in white laser welding production line	CHEN Gen-yu et al. (7)
Simulation and modeling of lidar waveforms returned from obscure targets	HUANG Tao et al. (11)
Study of the structure and photoluminescence property of Eu ³⁺ and Li ⁺ co-doped ZnO film	XIE Xiao-jun et al. (15)
Dynamic characteristics of thin aluminum under high pressure loading measured by shading principle	YUAN Bei et al. (19)
Design of sunshade on photonic band gap	RONG Chui-cai et al. (22)
Characteristic analysis of gain guided index antiguided large-mode-area fiber lasers	YU Xiao-qiu et al. (25)
New median filtering method based on statistic analysis	JIANG Jie et al. (29)
Application of heat source model based on ray tracing method in laser welding	WANG Ren-ping et al. (31)
Influence of laser parameters on etching performance during 157nm laser micromachining ...	DAI Yu-tang et al. (36)
Technique of laser shot peening to improve the metal resistance of stress corrosion cracking	CHEN Ju-fang et al. (39)
Modulation instability in relativistic laser plasmas	LIU Yong et al. (43)
Research of RS codes over GF(17)-field in atmospheric laser communication systems	KE Xi-zheng et al. (47)
Model of 60W picosecond laser oscillator pumped by 888nm LD	PENG Run-wu et al. (51)
Experimental measurement of absorptivity of sapphire at 532nm laser radiation	HE Guang-tao et al. (54)
Passively mode-locked Er-doped fiber laser with a semiconductor saturable absorber mirror	OU Pan et al. (58)
Design of photonic crystal fiber with flat dispersion and low confinement loss	JIANG Ling-hong et al. (61)
Research progress of laser-arc hybrid welding processing parameters	CUI Li et al. (65)
Incoherently coupled spatial soliton pairs in biased centrosymmetric photorefractive media with a resistance	JI Xuan-mang et al. (70)
Temperature and density property of 1-D time-varying magnetized plasma photonic crystals	ZHANG Hai-feng et al. (74)
Relationship between nonlinear optical property and molecular structures of three organometallic complexes	ZHANG Peng-fei et al. (79)
16-pass pumped micro-channel cooled Yb:YAG thin disk lasers	MA Yi et al. (82)
Light-emitting physical mechanism of broadband modulated dye HA in new laser light sources	GAO Bo-wen et al. (86)

Diffraction fields of combined cosine-gratings LIU You-ju (89)

Transient thermal analysis of Nd:YAG crystal end-pumped by pulsed diode laser LI Long et al. (94)

Influence of multiple-beam interference on transmittance of yttrium vanadate prisms CAI Sheng-jing et al. (99)

Design and experimental study of multi-hole coaxial powder feeding
system for laser cladding ZHOU Yu et al. (102)

Analysis of transmission spectrogram of quartz rotary crystal at normal temperature KONG De-fu et al. (106)

Optical system design of a portable laser Doppler velocimeter XIE Hong-bo et al. (109)

Research on dispersion compensation for OFDM signal fiber transmission FAN Zhe et al. (112)

Stimulated Brillouin scattering in Yb³⁺-doped double clad
single-frequency fiber amplifier YANG Chun-bo et al. (117)

Study on a hybrid method about measuring the concentration of carbon monoxide
gas based on 1.58μm diode laser GUO Jian-qiang et al. (122)

Study on the cut-off frequency of 1-D plasma photonic crystals KONG Xiang-kun et al. (126)

Effect of oxygen pressure on structure of Zn_{1-x}Al_xO thin film and laser-induced voltages LI Yong et al. (130)

Effect of laser shock wave on electrical property of ZnO varistor ceramics HUA Yin-qun et al. (133)

Positron acceleration in the wakefield of symmetric and asymmetric laser pulses ZAKIR Arkin et al. (137)

Infrared target tracking based on fissile bootstrap particle filters WANG Qi-hua et al. (141)
