

Jiguang Jishu

Vol. 40, No. 2(Series No. 222) March 25, 2016 (经国家科委批准出版) 1971 年创刊 双月刊 第 40 卷第 2 期 (总第 222 期) 2016 年 3 月 25 日出版

目 次

光学差分参量放大布里渊时域分析优化研究	秦祖军	梁国令	张文涛等(232)
一种基于星间光链路的帧同步与频偏估计方法	邓博于	赵尚弘	李勇军等(264)
基于高斯型点扩展函数的红外图像热源复原	陈树越	朱双双	蒋 星等(270)
基于量子点光放大器波长转换的啁啾特性研究	陈廷廷	王海龙	刘 松等(292)
基于相位一致性改进的活动轮廓分割模型	郑 伟	张 晶	李凯玄等(296)

CONTENTS

Pulse laser injection seeded state detector and experimental research
Application of laser detection of underwater acoustic signals based on wavelet transform LI Zhimin et al. (157)
Long point FFT design for frequency domain equalization
of few-mode fiber communication
Laser preparation and characterization of NiCr-MoS ₂ -M
self-lubricating wear-resistant coating
Comparison analysis of cloud boundary detection by means
of millimeter wavelength cloud radar and lidar
A phase-change lithography system based on a fast autofocusing method
Research of carrier suppression label of optical packet switching system
Repair techniques of dies with laser based on image morphological processing ······ ZHANG Weijie et al. (189)
Design of a reflective cavity for laser enhancement of the fourth harmonic generation KE Da et al. (195)
Simulation of magnetically switched compression discharge circuits
for pulsed gas lasers YUAN Xinrong et al. (199)
Study on Si doped with supersaturated Ti induced by continuous wave Nd: YAG laser FAN Baodian et al. (205)
Opened suspended core fiber chip based on surface plasma
resonance enhancement mechanism
Study on stochastic resonance gas weak signal detection
Selective laser melting Al-Si aluminum alloy and the crack formation mechanism WANG Mengyao et al. (219)
Study on expansion characteristics of tin plasma plume produced
by CO ₂ laser and Nd:YAG laser
Visible light image enhancement based on polarization imaging
Optimization of Brillouin optical time-domain analysis based on
optical differential parametric amplification
Study on filtering characteristics based on tooth-shaped photonic crystal waveguide LIU Yunfeng et al. (237)
Research of detection of aerosol extinction coefficient based on
pulse cavity ring-down technology
Optimum incident angle to Faraday wedge of multi-oscillator ring laser gyroscope
Model of scattering measurement for 1-D micro- and nano-periodic structure SHANG Hai et al. (250)
Research of microstructure and properties of tungsten based alloy fabricated
by laser solid forming
Research progress of graphene passively Q-switched Nd ³⁺ -doped lasers LIN Hongyi et al. (259)
A approach of frame synchronization and frequency offset estimation
based on optical satellite link
Heat source restoration of infrared images based on Gaussian point spread function CHEN Shuyue et al. (270)

Temperature field analysis and experiment study about paint irradiated

by moving laser based on FEM
Design of novel tunable semiconductor lasers in optical fiber communication systems
3-D lidar echo decomposition based on particle swarm optimization
Change of surface integrity of Ti-6Al-4V titanium alloy by laser shock processing
at middle and high temperatures
Theoretical study on chirp of wavelength conversion based on QD -SOA CHEN Tingting et al. (292)
Improved active contour segmentation model based on phase consistency ZHENG Wei et al. (296)
Research of laser diode side-pumped all-solid-state Nd:YAG ultraviolet lasers LIU Hui et al. (303)

(本期供稿编辑 赵颖彦)
