03 Study on the method of data analysis during environmental monitoring XIAO Qiu-yu
06 Application research of environmental engineering construction in eco-city construction ZHUANG Zhi-gu
09 A configuration method based on reliable energy storage capacity················· ZHANG Jin-ya
13 Study on disk permanent magnet generator based on vertical axis wind turbine  KE Yun, YUAN Chun-wang, JIANG Jia-wei, et a
17 Research of condition-based maintenance of communication room in electric power bureau  CAI Tie-lin, WU Hao, GAN Chun, etc.
20 Study on natural ventilation for the effect of relative position of door and window in buildingLIN Jia-ht
27 Simulation analysis on radiant celing panel air conditioning system of direct expansion in hot and humid area LIU Long-bin, DING Yun-fei, NIE Wen-qin
31 Thermal simulation performance of air conditioning compressor in carbon dioxide automotive
34 The application of high RAP doped regenerated asphalt mixture in white-modified black project  XIAO Guang-yu, XU Peng, LI Quan, et a
38 Pitot and flowmeter in the application of the non-full pipe flow measurement WU Wei-fen
40 Application of direct heat transfer heat pump system in waste heat utilization of oil recovery  MENG Xiang-fen
44 Experiment and application of double-suction gas blower LIU Jun, CAO Ping, LU Jian-jun, et al
50 Analysis on the optimization design and energy saving for high voltage frequency conversion fan transformation of metallurgical enterprises LI Xue-jun, ZHANG Jian-hua, LIU Cai-qin, et a
54 Performance comparison of solar-air source heat pump based on R1234yf and R134a refrigerant  WANG Hong-li, ZHANG Shuai-hua, KAN De-mi
59 Study on chilled water circulation and energy saving of indirect natural air-cooled chiller JIANG Yao-chua
63 Technical and economic analysis of a pure condensing steam generator set in thermal power plant
65 Technical and economical comparison and selection of 1000 MW pure condensing unit for heat supply CHEN Jing, DENG Mian, GAO Xin-yon
68 The application case of intelligent heating network technology in a residential communityWANG Hong-shi, CAO Xing-o
72 The application of sintering flue gas circulation process in sintering of a steel mill  WANG Long-gang, ZHOU Xiao-qing, TAN Cheng, et a
75 Numerical simulation and reconstruction of air caps for 220t/h circulatings fluidized bed SONG Chang-zhi, LI Rui-yu, LI Shu-xue, et a
80 Experience on building low carbon city in Qinhuangdao······ AN Ta
85 Six strategies of Japan science and technology innovation WANG B
89 New concept of thermodynamics and its applicationXIE Hong-xi, XIE Bao-gang, LI Ya-yun, et a
