2011, You HOLD It?

Since the second quarter of 2011, the national macro-control carriage has passed on, and then the impact of monetary tightening began to show. That caught investors in construction machinery off guard. On one hand, they continue to expand the scale of equipments; on the other hand, they tighten the projects. Facing the helpless situation of short supply, everyone has their solution. Users with financial strengths continue to buy equipments and aim at the new areas and opportunities, which few people can reach, and expect industry reshuffle; more ones are slow in action, waiting for the arrival of spring; sadly, some had to quit.

2011, in the complex domestic and international economic situation, do you HOLD it?

The Heroism of Staking

—Exclusive Interview with Liu Dongwang, the President of XiangQi Group in Guizhou

After two conversations with Liu Dongwang, our reporter tried to draw his DNA profile: compared with the arrogance of people becoming rich overnight, he was more low-key and containing; Compared with profiteers image of swindle, he prefers to go with the flow of doing business; Compared with small scales of intensive cultivation, he believes in the heroism of "staking". His temperament has been demonstrated most vividly. With this charm, he established his authority in the business field of Guizhou, which is not a mere formality but everywhere. He and his enterprises have been easily written into the memory of the times of Guizhou.

Up Close

—Test Drive YUTONG YT3621

In recent years, with the gradual standardization of the domestic mining, demands for mining dump trucks have been growing rapidly. A number of construction machinery manufacturers also seize the market of the mining dump truck in succession. Since then, the competition and development of mining dump truck have entered a new era. In this market trend, the reporter selected YUTONG YT3621 mining dump truck which has good performance in market to test drive and bring the new test drive experience to users.

Survival Status Report of Road Construction Machinery Operator

Road Machinery in China has formed the basic scale since its development beginning from the late 1960s. In this process, the machinery industry nurtured an essential role, that is, the road construction machinery operator. They can directly affect the quality of road construction. Then, what is the survival status of these operators? And what will be in the future? This article will focus on introducing such a group to readers.
