工程机械 服务外包的学问

人类社会已进入服务经济时代，
推广服务经济的理念有利于
我国经济的健康、快速发展。
服务外包是服务经济的一种实施模式，
可以分为生活型服务外包和生产型服务外包两大类，
我们关心的是生产型服务外包。

COVER STORY 26

Knowledge on the Outsourcing of Mechanical Engineering Services

Human society has entered the era of service economy. Promoting the concept of the service economy will help China's economy develop healthily and rapidly. Services outsourcing is an implementation model of the service economy, which can be divided into two categories: life outsourcing services and production outsourcing services, and here we're mainly concerned with the latter one. Mechanical engineering outsourcing is a reasonable and effective outsourcing style which has developed in last decade and is not familiar to the public, thus it should be studied and applied in the more extensive areas.

The Rise of the "State-owned"

——XCMG super crawler crane leading practical application of domestic lifting engineering equipment

On Oct 26th, 2001, the XCMG 1000t crawler crane once completed full-loaded lifting operations successfully once again in a hydrocracking project site having a 2 million annual output in Huangdao, Shandong, which belongs to Sinopec Qingdao. In less than have a year, 2 XCMG super crawler crane has performed 9 perfect and shocking lifts in 5 different sites.

Changing the Height of Asia

——Asia's first 1000t all-terrain crane SAC12000 presents a perfect premiere to the world in a wind power project

On October 31, 2011, three 1000t SAC12000 all-terrain crane completed the installation of fan tower and cabin successfully lifting China Huadian Corporation's 2.0MW wind turbine generator in Wei County, Zhangjiakou, Hebei Province. The condition of this life is extremely rare to wheeled all-terrain crane, which is the first time on the global scale.
