当GPS遭遇吐槽

如今，越来越多业内人士向记者提及GPS，游走各大工程机械用户论坛发现，关于GPS的话题分成两派，一派是讨论是否有必要加装GPS，利用GPS可以实现怎样的功能；另外一派则是讨论如何私自拆掉GPS。

COVER STORY 26

When GPS Suffered Tucao

GPS arises in the Construction Machinery Today cover story and themes is an unexpected things. Five or six years ago, the construction machinery industry media reports on the GPS just stay at described in scientific articles in a similar function, there is not much of humane things, you can read clear or can also be read after do not know. Today, more and more people in the industry talk about GPS to reporter, through major construction machinery user forum, the reporter found that the GPS is definitely popular, user forums on the topic of GPS is divided into two factions, one is to discuss whether it is necessary to install GPS, they can realize what kind of functionality using GPS; another to discuss how to secretly removed the GPS, this barely able to escape the brand. Now, the second faction is hotter than the former faction .

The Shantui Complex on Line 10

—Test Drive Shantui SL50W Loader

The biggest highlight of Shantui SL50W loader is a good fuel economy performance, another good performance in power, agility, speed and passing ability, etc., Weichai Steyr blue engine second generation standard engine compared to other domestic brand engines in quality and performance has obvious advantages, the panoramic glass cab for the operator can provide a broader perspective, this loader is a performance of earth-type loader.

The current test drive, will bring us the story of the Beijing subway line construction in the 10th Shantui SL50W loader and Guizhou operator Nie Tang Wei.

Traning on the Way

—Crawler Friends of the Alliance for Operator Training Camp Held in Xingtai

With the construction machinery industry competition shift to service, from business model to diversify, and operator being more important as the industry chain, the position will become increasingly high. The forward-looking agents have to seize the operator resources in order to develop a new business model.
