JIANGSU SHIP

Vol. 27, No. 5 (Serial 139), Oct 2010 (Bimonthly)

TRANSACTIONS OF JIANGSU PROVINCIAL SOCIETY OF NAVAL ARCHITECTURE AND MARINE ENGINEERING

CONTENTS

- JS 2010-5-01 Research and manufacture of a quick search and rescue boat on Taihu Lake** Han Hailin, Wang Jianping (1)
..... Li Zhenyu, Chen Songtao (5)
The paper introduces the research and manufacture background and its general arrangement of a new-type search and rescue boat on lakes, it emphasizes on the introduction of the technic difficulty during research and manufacture and the innovation point during design, validates the feasibility of project through ship model test and guarantees the quick performance of the ship. It proves the ship can sail quickly and search and rescue during bad sea conditions that real ship is manufactured and put into using, and enhances the emergency response capacity of maritime sector on lakes greatly. The ship has mature technics, obvious effect, and has better promotional value.
- JS 2010-5-02 General design of a new-type 60m z-propeller car and passenger ferry** Li Zhenyu, Chen Songtao (5)
..... Li Zhenyu, Chen Songtao (5)
The 60m new-type z-propeller car and passenger ferry is researched and developed by Jiangsu Ship Design and Research Institute Co., Ltd. It improves the overall performance of the new-type ship greatly through the research of the ship type, mould lines, structure, equipment etc, and has obvious economic benefit and society benefit, provides experience and reference for the same type ship.
- JS 2010-5-03 Risk evaluation research of FPSO during oil offloading** Li Qinghan, Yin Qun (9)
..... Li Qinghan, Yin Qun (9)
It leads to disastrous consequences that FPSO (Floating Production Storage (Offloading)) is failure, so it is urgent that evaluates the risk of FPSO during oil offloading. The paper established the mathematics model of collision between FPSO and shuttle oil tanker firstly, and calculates the collision probability between FPSO and Shuttle oil tanker during oil offloading, and then simulates the transient effects of oil spill using the Unified Dispersion Model, Concentration vs Distance, Maximum Concentration etc module of DNV. Neptune software, at last researches and analyzes the results.
- JS 2010-5-04 Longitudinal strength calculation of a 2 500t floating crane** ... Song Jian, Han Hailin (12)
- JS 2010-5-05 Analysis of round bilge boat propeller over loading on shallow water channel** Sun Li (15)
..... Sun Li (15)
- JS 2010-5-06 Research of application Tribon Profile Nesting to profile nesting** Zhang Xiang, Zhou Weipeng, Wang Peiyu (18)
..... Zhang Xiang, Zhou Weipeng, Wang Peiyu (18)
- JS 2010-5-07 Research of a 58.7m anchor for the supply vessel shafting torsional vibration calculation** Zhang Shaokai (20)
..... Zhang Shaokai (20)
- JS 2010-5-08 Problem analysis and system design of ship fueled with low sulfur fuel oil** Wu Fang (23)
..... Wu Fang (23)
- JS 2010-5-09 Car ferry engine room automation on Changjiang river** Bao Qing (26)
- JS 2010-5-10 Anti - static measures of oil tanker** Wang Feng (29)
- JS 2010-5-11 Technic performance of low smoke and halogen-free cable using for ships and ocean engineering** Li Yongjiang, Lu Yunchun, Zhao Ailin (32)
..... Li Yongjiang, Lu Yunchun, Zhao Ailin (32)
- JS 2010-5-12 Comprehension and countermeasure of "target type criterion"** Chen Guiping (34)
..... Chen Guiping (34)
- JS 2010-5-13 Launching safety management of new ships in shipbuilding enterprises** Jiang Guangzhong (37)
..... Jiang Guangzhong (37)
- JS 2010-5-14 Failure analysis and countermeasure of small type marine diesel engine** ... Li Haixing (40)
- JS 2010-5-15 Manufacture technics of a 20 500 DWT offshore bulk carrier** Wang Xuefeng, Zhang Bin (42)
..... Wang Xuefeng, Zhang Bin (42)
