封面说明

关于连续式沥青搅拌设备与间歇式设备的优劣之辩,从上世纪九十年代中后期以来,在国内公路建设行业已经有过很多次。但由于种种原因,连续式沥青搅拌设备在国内的应用仅寥寥数台。

2009年12月15日,我国最大的强制间歇式沥青混合料搅拌设备生产企业中交西筑与全球知名的ASTEC公司在西安正式签定连续式沥青搅拌设备技术合作协议,成为了沥青搅拌设备市场又一个焦点性事件。这是否意味着市场风向有变?或者是ASTEC投石问路,再次测试中国市场的“水温”?这次技术合作,能否带动我国连续式沥青搅拌技术的应用进入新阶段?为此,本刊记者约访了行业众多著名专家学者共同探讨以上问题。封面图片为ASTEC双滚筒连续式沥青搅拌设备。

XRMC Cooperated With ASTEC Continuous Asphalt Mixing Plant Became Focus

Continuous asphalt mixing plant is not strange to domestic road construction industry, from 1990s, there is numerous argument on the application of batch asphalt mixing equipment compared to continuous asphalt mixing plant and technological development. However, there was only a very few number of successful application of continuous asphalt mixing plant.

December 15th, 2009, China largest batch asphalt mixing equipment manufacturer- Xi'an Road Construction Machinery Co., Ltd. signed continuous asphalt mixing equipment and technology cooperation agreement with USA world-famous continuous asphalt mixing plant manufacturer ASTEC. This has become focus of asphalt mixing equipment market. Does this mean a change in the market? Or it's ASTEC's test in Chinese market? Could this technical cooperation lead China continuous asphalt mixing technology into a new period? Our reporter invited several famous experts to discuss these topics.

The 9th China-Japan-Korea Asia Crane Safety Forum Opened in Beijing

May 12th-13th, The 9th China-Japan-South Korea Asia cranes Safety forum was held in Beijing International Exhibition Center, about 150 participants of industry experts from China, Japan, South Korea and domestic users

attended the forum. The forum was sponsored exclusively by 60-year tower crane manufacturing history company- Shenyang Sanyo Building Machinery Co., Ltd.

The forum is organized by China Construction Machinery Industry Association Information Committee, "Construction Machinery Technology & Management" magazine, on the theme of "Technique Guarantee Safety and Communication Promote Progress". Experts from China, Japan and South Korea introduced their country's crane management system, related regulations, security management and case study.

The 10000th Domestic Volvo Excavators

May 6th, Volvo Construction Equipment (VOLVO CE) acrossed its development milestone in China-the 10000th domestic production excavator. Olof Persson, Volvo Construction Equipment Global CEO, Eberhard Wedekind, President of Asia Pacific, Suk wisoo, President of Asia-Pacific operation, Luo Dong, President of China and staff representatives from China, medias from China Construction Machinery Industry witnessed this grand moment. This marks the development of Volvo construction equipment in China has entered the fast-growing channel. Data show that Volvo Construction Equipment grew business in China in the first quarter of 2010, sales in March created the historical record in a single month sales record. After years of struggle, Volvo Construction Equipment has become one of Volvo Group's most successful business in China.
