- 1 Research on Numerical Simulation of Depressurized Mining Design for Inclined Medium thick Ore-body
- 5 Pillar Recovery and Covering Layer Formation Technique During Transferring from Open Stope into Caving Method
- 8 Safety Protection Technique of Open-stope & Caving Mining Method in Gongchangling Iron Ore
- 12 Research on Interaction Mechanism of Water and Rock in Water Inflow of Long and Large Tunnel
- 15 Optimization of Ore Block with FLAC^{3D} Mechanics Analysis
- 19 BI-Based Operations Plan Management System for Metallurgical Mining Enterprises
- 24 Analysis on the Stability of Bolts for Reinforcement of Rock Slope with Fissure Water Pressure
- 27 Study on Optimization of Bolt Support of Crushed Wall Rock Lane
- 31 A Numerical Simulation of Low Dilution Ore Drawing in Jinshandian Iron Mine
- 35 Application of BP Artificial Neural Network in Optimization of Open-pit Slope Angle
- 38 Selection of Mining Method with Application of Engineering Economic Principle
- 42 Optimization of Heap Parameters of Open-pit Waste Dump
- 45 Test Research on Beneficiation of Hezhang Oolitic Hematite in Guizhou Province
- 49 Experiments of Impurity Reduction by Flotation on a High Potassium-sodium Iron Concentrate
- 51 Investigation of Mineral Processing of a Fine Low-grade Refractory Iron Ore
- 54 Research Progress on the Development of Siderite Resource and its Comprehensive Application
- 57 Study on Pellet Preparation Technology of Ferruginous Powder Ore
- 60 Experimental Research on a New Combinational Collector for Bauxite Ore
- 64 Investigation on Properties and Structure of Pyrrhotite and the Difference of its Floatability
- 68 Study of Chalcopyrite-marmatite Self induced and Controlled Electric Potential Flotation
- 72 Experimental Study on the Cyclonic Static Micro-bubble Flotation Column for a Copper Ore
- 75 Research on Vat Bioleaching of Low-grade Primary Copper Sulfide Ore Under Catalysis Conditions
- 78 Experimental Research on Beneficiation of Pusong Gold Mine of Nye-mo County, Tibet
- 81 Progress on Flotation Technique of Non-ferrous Metals in China
- 85 Visualization and Incision of Geo-body Based on Tetrahedral Network
- 89 3Dmine-Based Three Dimensional Modeling of High Phosphorous Hematite Mine of Liangshuijing Orefield in West Hubei
- 93 Reserves Estimation for Yunfu Gaochang Deposit based on 3D Geological Modeling of Ore-body
- 98 Application of Support Vector Regression in GPS Height Transformation in Mining Area
- 102 Application of Controlled-Source Audiomagnetotellurics (CSAMT) in Prospecting of Xishimen Iron Mine
- 104 Development and Application of Three New Type High Efficiency Magnetic Separators
- 109 Experimental Research on Compression Crushing Process of Granular Layer
- 112 Modal Characteristic Analysis and Dynamic Strength Checking of the Vibrating Screen Box
- 117 Experiments and Application of D4FMVSK1014 Dual Vibration Screen in Shirengou Iron Ore
- 120 Application of Fluent Software to the Optimal Design of Agitator in Gravity Separator
- 124 Experimental Research on the Acid Mine Wastewater Treatment with Sulfate-reducing Bacteria
- 128 The Influence of Sulphide Tailing Water on the Flotation Performance of Pyrite
- 132 Simulation and Prediction of Land Utilization Evolution in Coal Mining Area
- 136 Application of GPS Technique in the Slope Safety Monitoring of Open-cast Uranium Mine based on VBA
- 139 Study of Three-dimensional Risk Assessment Model for Gob
- 142 Research of Comprehensive Control Measures for Tailings Dust
- 147 Application of Direct-reverse Flotation in Reconcentration of Iron Ore-tailings from Reverse Flotation
- 150 Experimental Researches on Comprehensive Utilization of Roasting-cyanided Tailings
- 153 Impact of Ammonia on Alkaline Copper Tailings Bioleaching
- 158 Effect of High Efficient Super Plasticizer on Performance of Iron Tailing High-quality Concrete
- 162 Preparation of Micro-porous Calcium Silicate with Coal Series Kaolin
