This special issue is dedicated to academician LI Yu for his 80th birthday

LI Yu, a famous mycologist, the academician of Chinese Academy of Engineering, and the foreign academician of the Russian Academy of Sciences, is affectionately known as the “mushroom academician”. He is the pioneer of “small agaric, big industry”, advocating and proposing the edible mushroom industry development strategy of “expanding the north agaric to the south” and “moving the south mushrooms to the north” firstly in China. This special issue is dedicated to academician LI Yu for his 80th birthday. Happy birthday and good health to academician LI Yu!
