CHINESE JOURNAL OF MECHANICAL ENGINEERING

Vol. 28, No. 3, 2015

Contents

- 437 **Position, Singularity and Workspace Analysis of 3-PSR-O Spatial Parallel Manipulator**
SHAO Jiejie, CHEN Wenyu, and FU Xin
- 451 **Drilling Power Consumption and Soil Conveying Volume Performances of Lunar Sampling Auger**
TIAN Ye, TANG Dewei, DENG Zongquan, JIANG Shengyuan, and QUAN Qiquan
- 460 **Effects of Joint Controller on Analytical Modal Analysis of Rotational Flexible Manipulator**
CHU Ming, ZHANG Yanheng, CHEN Gang, and SUN Hanxu
- 470 **Interaction of In-wheel Permanent Magnet Synchronous Motor with Tire Dynamics**
SONG Ziyou, LI Jianqiu, WEI Yintao, XU Liangfei, and OUYANG Minggao
- 479 **Control Algorithm of Electric Vehicle in Coasting Mode Based on Driving Feeling**
SUN Daxu, LAN Fengchong, ZHOU Yunjiao, and CHEN Jiqing
- 487 **Establishment and Validation for the Theoretical Model of the Vehicle Airbag**
ZHANG Junyuan, JIN Yang, XIE Lizhe, and CHEN Chao
- 496 **Experimental Study on the Ride Comfort of a Crawler Power Chassis Scale Model Based on the Similitude Theory**
ZHAO Jianzhu, WANG Fengchen, YU Bin, TONG Pengcheng, and CHEN Kuifu
- 504 **Statistical Linearization on 2 DOFs Hydropneumatic Suspension with Asymmetric Non-linear Stiffness**
DONG Mingming and LUO Zhenxing
- 511 **Analysis of Thermoelastohydrodynamic Performance of Journal Misaligned Engine Main Bearings**
BI Fengrong, SHAO Kang, LIU Changwen, WANG Xia, and ZHANG Jian
- 521 **Analysis and Numerical Simulation of Rolling Contact between Sphere and Cone**
ZHAO Yanling, XIA Chengtao, WANG Hongbo, XUAN Jiaping, XIANG Jingzhong, LIU Xianli, and SU Xiangguo
- 530 **Effects of Floating Ring Bearing Manufacturing Tolerance Clearances on the Dynamic Characteristics for Turbocharger**
WANG Longkai, BIN Guangfu, LI Xuejun, and ZHANG Xuefeng
- 541 **Influence of Particles on the Loading Capacity and the Temperature Rise of Water Film in Ultra-high Speed Hybrid Bearing**
ZHU Aibin, LI Pei, ZHANG Yefan, CHEN Wei, and YUAN Xiaoyang

- 549 **Mathematical Model and Geometrical Model of Double Pitch ZN-type Worm Gear Set Based on Generation Mechanism**
SHU Linsen, CAO Huajun, LI Xianchong, ZHANG Chenglong, and LI Yuxia
- 556 **Strip Layer Method for Analysis of the Three-Dimensional Stresses and Spread of Large Cylindrical Shell Rolling**
LIU Hongmin, CHEN Suwen, PENG Yan, and SUN Jianliang
- 565 **Approximate-model Based Estimation Method for Dynamic Response of Forging Processes**
LEI Jie, LU Xinjiang, LI Yibo, HUANG Minghui, and ZOU Wei
- 573 **Control Method for Steel Strip Roughness in Two-stand Temper Mill Rolling**
LI Rui, ZHANG Qingdong, ZHANG Xiaofeng, YU Meng, and WANG Bo
- 580 **Hot Granules Medium Pressure Forming Process of AA7075 Conical Parts**
DONG Guojiang, ZHAO Changcai, PENG Yaxin, and LI Ying
- 592 **Adiabatic Shear Mechanisms for the Hard Cutting Process**
YUE Caixu, WANG Bo, LIU Xianli, FENG Huize, and CAI Chunbin
- 599 **Machinability of Hastelloy C-276 Using Hot-pressed Sintered Ti(C₇N₃)-based Cermet Cutting Tools**
XU Kaitao, ZOU Bin, HUANG Chuanzhen, YAO Yang, ZHOU Huijun, and LIU Zhanqiang
- 607 **Rock Breaking Performance of a Pick Assisted by High-pressure Water Jet under Different Configuration Modes**
LIU Songyong, LIU Xiaohui, CHEN Junfeng, and LIN Mingxing
- 618 **Variants of Secondary Control with Power Recovery for Loading Hydraulic Driving Device**
LI Wanguo, FU Yongling, CHEN Juan, and QI Xiaoye
- 634 **Hydraulic Optimization of a Double-channel Pump's Impeller Based on Multi-objective Genetic Algorithm**
ZHAO Binjuan, WANG Yu, CHEN Huilong, QIU Jing, and HOU Duohua
- 641 **Effect of Cone Angle on the Hydraulic Characteristics of Globe Control Valve**
LIN Zhe, WANG Huijie, SHANG Zhaohui, CUI Baoling, ZHU Chongxi, and ZHU Zuchao
- 649 **Metal Sealing Performance of Subsea X-tree Wellhead Connector Sealer**
ZHAO Honglin, CHEN Rui, LUO Xiaolan, DUAN Menglan, LU Yinghui, FU Guowei, TIAN Hongping, and YE Daohui

Guide for Authors

Aims and Scope

Chinese Journal of Mechanical Engineering (CJME) is an innovative, comprehensive and authoritative academic journal that reports on cutting-edge technologies, research advances and pioneering developments in mechanical engineering, both in China and around the globe, and provides a medium of communication between scientists and engineers engaged in research and development within the field.

Manuscript Requirements

All articles in CJME are peer reviewed, including academic articles, research reports, and general reviews concerning theoretical or experimental approaches along with their practical applications. Authors are welcome to submit original contributions related to all fields of mechanical engineering and relevant disciplines. Original works presenting new ideas or significant breakthroughs in the field of mechanical engineering are especially encouraged.

All authors should adhere to ethical standards and the manuscripts submitted to the Journal should have neither been published in nor submitted to any other journals.

Manuscripts submitted to the Journal should be written in professional English and carefully prepared. The instructions and the template available at www.cjmenet.com or www.editorialmanager.com/cjme should be strictly adhered to.

Submissions

Manuscript should be submitted in electronic form (Microsoft Word 2007(.docx)) via the Journal's website at www.cjmenet.com or www.editorialmanager.com/cjme. For Chinese authors, manuscripts may also be submitted at www.cjme.com.cn. For international authors, manuscripts can also be emailed directly to Editorial Office as a "New Contribution", though this method is not recommended.

Review

The Editorial Office of the Journal will implement a pre-review to check the manuscript quality in terms of its format, typing and language quality, etc. Manuscripts displaying poor written English, an insufficient introduction or citations, and possible similarities will be directly rejected prior to the peer review process. Accepted manuscripts will then be assigned to at least two reviewers for peer review.

Revision

The corresponding Executive Editor will inform the corresponding author about the reviewers' comments once they are available (it normally takes 3 months). For manuscripts that need a revision, the revised version should be resubmitted within 60 days and will be carefully examined by the Executive Editor before the final decision can be made. If the authors have any difficulties accomplishing the revision on time, they are advised to contact the Executive Editor promptly.

Publication

For accepted manuscripts, all further paperwork will first be processed by the Editorial Office. The manuscript will first be published online on the platforms such as SpringerLink, CNKI, CJME, etc., and then in a printed issue.

According to the relevant regulations, publication fees will be charged for accepted manuscripts. For the Chinese authors, an additional fee paid to the reviewers will be charged as well. Also, the corresponding author should decide in advance whether he/she would like the manuscript to be published open access, which will result in additional charges.

The Journal will provide the corresponding author with three hard copies (or an e-journal) and an e-copy (a PDF file) once the work has been published.
