| Structure of Grinder for Repairing the Scratch on the Surface of Liquid Crystal Glass .....                              | Li Jiang(55)                   |
| Application of Potential Failure Mode and Consequence Analysis of Machining Equipment .....                              | Wu Qiang, Wu Yan(57)           |
| Key Link of Gas Transmission and Distribution Network Decompression System .....                                         | Han Peng(59)                   |
| Finite Element Analysis of Rotary Mechanism of ebz220SD800/11C Roadheader .....                                          | Wu Guoping(61)                 |
| Structure and Principle of Hydraulic Retarder for Heavy Duty Commercial Vehicle Gearbox .....                            | Lu Wei(63)                     |
| Temperature Control of Defoaming Process for Flexible AMOLED Mobile Phone Display Panel .....                            | Geng Tao(65)                   |
| Processing Quality Improvement for Small Diameter Deep Hole of Stainless Steel Material .....                            | Wang Ning(67)                  |
| Study on the Synchronicity between the Two Ends of the Movable Roof of a Railway Covered Hopper Car .....                | Yan Suqun, Liu Junlei(69)      |
| Application of Supporting Construction Technology of Underground Roadway in Coal Mines .....                             | Li Pingsheng, Wang Juan(71)    |
| Research on Support Technology of Roadway in Close Distance Coal Seam Face .....                                         | Lyu Chen(73)                   |
| Simulation Study on Welding Thermal Performance of High Strength Structural Steel with Mine Hydraulic Support .....      | Zhang Yuanyuan(76)             |
| Study on Automatic Offset Adjustment Device of Belt Machine Tail .....                                                   | Lei Ruifang(79)                |
| Analysis on Application of Guardrail Formwork Car in Highway and Bridge Construction .....                               | Yang Jianghua(81)              |
| Optimization and Improvement of Cutting Head of Cantilever Roadheader .....                                              | Xue Xianchao(83)               |
| Design and Application of the Mine Belt Conveyor with Anti-sway Function .....                                           | Cao Qiong(86)                  |
| Analysis Application of New Airborne Advance Support Device for Roadway .....                                            | Chang Wei(88)                  |
| Research on the Installation and Debugging Technology of DTL120 Belt Conveyor .....                                      | Guo Peng(90)                   |
| Research on Design of Anchor Support in Coal Mine Roadway .....                                                          | Li Chengwen(92)                |
| Research on Balanced Drive Control System of Belt Conveyor Based on Torque Balance .....                                 | Zhang Minmin(95)               |
| Analysis and Calculation Program Design of Structural Strength in Use of DTIIA Mining Belt Conveyor Frame .....          | Xu Mang(97)                    |
| Research on Causes of Deviation of Mine Belt Conveyor and Correction Performance of Self-aligning Idler .....            | Jiao Rong(99)                  |
| Study on Structure Optimization of Coiling Device of Mine Hoist .....                                                    | Wang Changsheng(102)           |
| Based on the Intelligent Control of Dust Concentration Limit Spray Dust Removal Device .....                             | Wang Changjian(104)            |
| Selection and Application Effect Analysis of Mine Main Ventilation Fan Equipment .....                                   | Yu Xiaoxia(106)                |
| Cause Analysis and Improvement of Rocker Head Damage of Shearer .....                                                    | Guo Xiaoming(108)              |
| Modal Analysis of the Driving Drum of DSJ80 / 40 / 2 BeltConveyor .....                                                  | ChenYuxuan(110)                |
| Analysis of the Abnormal Noise of Rotation at the Joint of Cutting Part and Traction Part of the Shearer .....           | Huo Yunhu(112)                 |
| A Study on Jumping Law of Cutting Arm of Roadheader Based on Simulink .....                                              | Wang Juan(115)                 |
| Optimizing Operation Efficiency of Coal Mine Ventilation System .....                                                    | Zhang Lei(118)                 |
| Study on the Control of Downwind Flow in the Ventilation Lane of Sihe Coal Mine .....                                    | Zhao Shaobo(121)               |
| Analysis and Improvement of Broken Tooth of Shearer Gear Rail Wheel .....                                                | Li Ming(124)                   |
| A Study on Roadway Support of Coal Seam under Goaf Based on FLAC .....                                                   | Kong Liping(126)               |
| Study on Supporting Technology of Roadway Group in Mining Area .....                                                     | Ma Dongzheng(129)              |
| Study on Cutting Steady State Characteristics of Shearer under Special Working Conditions .....                          | Zheng Yandong(132)             |
| Research on Detection of 2BEC Type Water Ring Vacuum Pump .....                                                          | Huo Yong(134)                  |
| Study on Fault Type and Diagnosis Technology of Mine Hoist .....                                                         | Gao Xiaodong(136)              |
| Application of Emergency Fault Diagnosis and Early Warning System for Diesel Engine .....                                | Cui Jianwei(138)               |
| Study on Pressure Manifestation Law of Stratified Coal Mine in No.3 Coal of Pingshang Coal Industry .....                | Gao Yigang(140)                |
| Research on Abnormal Detection and Early Warning Management System of Shearers .....                                     | Zhao Ruipeng(143)              |
| Retrofit of Anti-surge Control for Air Separation System Supercharger .....                                              | Zhang Tao(145)                 |
