## ·The Theory and Approaches of the Design·

|                                                                                                                                   |                                                                                   |
|-----------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
| Structural Design Analysis Study of Hydraulic Brackets in Mines Based on Section Geometry .....                                   | Ci Yakun(1)                                                                       |
| Cyclone Waste Energy Recovery Device Design Study .....                                                                           | Tie Zhiguo(4)                                                                     |
| Study on the Design of Belt Conveyor Tensioning Device .....                                                                      | Tong Jingxuan(6)                                                                  |
| Hydraulic Bracket Selection and Mine Pressure Observation in Working Face of Composite Roof Coal Seam .....                       | Wen Xianjun(9)                                                                    |
| Research on the Calculation of Mine Ventilation Air Volume and the Selection of Ventilation Equipment .....                       | Liang Xingliang(11)                                                               |
| Design Technology of the Welding Platform for the Tooth Seat of the MG400/930-WD Coal Mining Machine Drum .....                   | Liu Xiaochun(14)                                                                  |
| Design of Rotating Movable Belt Conveyor .....                                                                                    | Chen Xiaowei(16)                                                                  |
| Analysis of Design Selection and Installation Measures of Overhead Occupant Devices .....                                         | Wei Wei(18)                                                                       |
| Design and Application of Automatic Cleaning Box for Belt Conveyor Based on Air Cannon Technology .....                           | Yan Lipeng(20)                                                                    |
| Design of Gas Extraction System for Datong Coal Industry of Jinneng Holding Coal Industry Group ...                               | Yang Yanwei(23)                                                                   |
| Design of Dust Control System for Large Mining Height Integrated Mining Face .....                                                | Gao Fei(25)                                                                       |
| Strength Analysis and Optimal Design of Spoke Plate Hub of Belt Conveyor Drive Roller .....                                       | Gong Shaohua(27)                                                                  |
| Design and Application of Long-distance Temporary Support Technology for Coal Roadways .....                                      | Li Qiang(30)                                                                      |
| Design and Application Technology of Hydraulic Belt Pulling Device for Belt Conveyor with Large Gradient .....                    | Zhang Jian, Qi Chenglong(32)                                                      |
| Design and Simulation of Dynamic Reactive Power Compensation Scheme for Mine Hoist ...                                            | Zhang Wenshuai(34)                                                                |
| Design and Application of Drilling Anchor System of Large Cross Section and Horizontal Shaft of the Driving Anchor Machine .....  | Zhang Xing, Gong Kongzheng, Zhou Jianlong(36)                                     |
| Optimisation of the Design and Study of the Structure of Belt Conveyor Rollers .....                                              | Hao Zhigang(39)                                                                   |
| Substation Main Transformer and Main Equipment Selection .....                                                                    | Liu Jiewei(41)                                                                    |
| Design of Suspended Robotic Support Platform for Roadheading Face .....                                                           | Zhang Jichang(43)                                                                 |
| Establishment and Simulation Analysis of Dual Synthetic Power System for Belt Conveyor .....                                      | Shen Yangjun(46)                                                                  |
| <b>·The Machinery Analysis and Design·</b>                                                                                        |                                                                                   |
| Fatigue Load Calculation and Analysis of 5MW Wind Turbine Nlade .....                                                             | Shan Guangkun, Fang Manli, Ma Tieqiang, Li Ming, Che Sidi, Lin Yaokun(48)         |
| Multistage Centrifugal Pump Performance Test Practice .....                                                                       | Fan Xueqi(52)                                                                     |
| Joint Simulation Analysis of Hydraulic Support Machine and Fluid Based on AMESim and ADAMS .....                                  | Chi Zejun(54)                                                                     |
| Analysis of Bolt Rounding Rolling Strengthening Process Method .....                                                              | Xia Chunhe(56)                                                                    |
| Static Analysis and Improvement Study on the Rear Seat Plate of the Cut-off Section of Mining Roadheading Machine .....           | Wang Xuefeng(59)                                                                  |
| Research on Vibration Modal and Strain Measurement Techniques for Mine Hoist Spindles ...                                         | Zhang Zhongwei(61)                                                                |
| Performance Analysis of Different Structural Forms of Belt Conveyor Drive Rollers .....                                           | Pan Hong(64)                                                                      |
| Research on Joint Support Technology for Roadway Excavation over Fault Fracture Zone .....                                        | Guo Yanfei(66)                                                                    |
| Analysis and Improvement of the Tearing Problem in the Middle of the Guiding Sliding Boot of the Coal Miner Walking Section ..... | Li Feng(68)                                                                       |
| Mechanical Analysis and Optimization Research on the Rotary Platform of Mining Roadheading Machine .....                          | Zhang Qing(70)                                                                    |
| Construction Design and Support Technology for Water Exploration and Release in Roadway Excavation .....                          | Wang Liang(73)                                                                    |
| Fatigue Life Analysis of the Walking Wheels of WG-2 × 125/571-WD Coal Mining Machine .....                                        | Fang Jinjin, Li Shugang, Hao Huibin, Hao Xiaogang, Zhang Xiaofeng(75)             |
| Analysis of the Performance of the Load-bearing Structure of Cantilever Roadheader under Different Working Conditions .....       | Ma Xiaowen(78)                                                                    |
| Strength of Conical Selection of Cut-off Teeth for Mine Boring Machines Based on Finite Element Analysis .....                    | Zhang Junwei(80)                                                                  |
| Analysis and Optimization of the Frame Structure of a Self-moving Tail Belt Conveyor .....                                        | Wang Jiawei(83)                                                                   |
| Influence of Different Impeller Lengths on the Safety Performance of Ventilation Fans .....                                       | Cui Qiwen(85)                                                                     |
| Analysis of Wind Sorting Agglomeration Phenomenon in MacTavish Wind Separator .....                                               | Pu Shaokun, Tian Xiaosheng, Wang Xin, Hua Rong, Xing Li, Liu Wen, Wang Shuang(87) |
| Joint Simulation and Analysis Study of Mine Hoisting Mechanism Dynamic System .....                                               | Zhang Lizhi(90)                                                                   |
| Study on the Control Measures of Coal Wall Flakes on the Header Working Face .....                                                | Li Zilu(92)                                                                       |
| Research on Vibration Characteristics of Roadheader under Vertical Cutting Conditions .....                                       | Zhao Chenglong(95)                                                                |
| Numerical Simulation Study on Optimization of Coal Mining Machine Cut-off Wall Parameters ...                                     | Guo Qiangqiang(97)                                                                |
| Optimization of Support for Broken Roofs in Roadway Excavations .....                                                             | Wang Jun(99)                                                                      |
| Optimization of In-Road Anchor Support Process Applied to Coal Mines along the Hollow Stay ...                                    | Wang Lihong(101)                                                                  |
| Automatic Speed Control of Coal Mining Machines Based on Fuzzy Control .....                                                      | Fan Chao(103)                                                                     |
| Exploration of Combined Anchor Mesh Cable Support Technology for Coal Mine Retrieval Roadway .....                                | Song Wei(106)                                                                     |

Analysis and Improvement Research of Belt Conveyor Runout Problem ..... Li Ruiguang(108)

Research and Analysis of Anchor Rod Support Process for Coal Mine Roadway Excavation ... Zhang Jianting(110)

Optimal Design of Support at the Working Face of the Windrow ..... Liu Jie(113)

Finite Element Analysis and Improvement Study of Mining Hydraulic Support Roof Beam ..... Hou Liangke(115)

Numerical Simulation of Scraper Conveyor Chain Drive System and Suggestions for Optimization ... Guan Jie(117)

Study on the Optimal Size of Torsion Shaft Unloading Chute for Coal Mining Machines ..... Wang Yachuan(120)

Mechanistic Analysis of the Effect of Different Support Parameters of Anchor Rods on Roadway Support  
..... Zhao Yapeng(122)

Optimization of Support Parameters for Back Mining Roadways ..... Chang Yuchen(124)

Design and Application of Pre-stressed Anchor Support Parameters in Roadways ..... Liu Yonghong(126)

Analysis of the Failure Mechanism of Belt Conveyor Roller Welds ..... Jiang Songhua(128)

Effect of Shot Peening and Plasma Spraying on the Organization and Properties of Laser Welding  
..... Tian Zhiping, Gao Haisheng(131)

**•The Test and Diagnose Technology•**

Research on Early Fault Detection of Belt Conveyor Based on Ultrasonic Sensing Technology ... Tian Yachao(133)

Research on Scraper Conveyor Chain Drive Fault Diagnosis ..... Li Bin(136)

Research on Vibration Detection System during Coal Mining Machine Operation ..... Zhang Libing(139)

Research on Crude Oil Engine Failure Monitoring and Alarm on Offshore Platforms ..... Zhao Qiang(141)

Application of Automatic Fault Diagnosis System for Roadheading Machines ..... Ma Qi (143)

Analysis on the Failure Characteristics of TD75 Type Belt Conveyor Roller Bearings ..... Ren Fujun(145)

Air Compressor Fault Detection and the Design of Its Control System ..... Wang Jun(148)

Design of an Attitude Monitoring System for Hydraulic Supports ..... Mo Yexiang(150)

**•The Practice and Application•**

Research on Integrated Support Technology for Roof and Surrounding Rock Fracture Roadways ... An Pengfei(153)

SGZ1000/2 × 700 Type Scraper Conveyor Scraper Wear Causes and Improvement Research ..... Huo Xuan(156)

Research on the Engineering Application of Remote Monitoring System for Mining Ventilation Fans  
..... Gao Haijiang(158)

Application of Twin-screw Automatic Coal Cleaning Device in Belt Conveyors in Roadway Excavation - Li Jun(161)

Research and Application Analysis of Belt Conveyor Automation Control Technology ..... Li Hao(163)

Application of Overstress Zone Support Technology for Header Working Face ..... Yang Shuai(165)

Research on Coal Cutting Height and Hauling Speed Control of Coal Mining Machine in  
Comprehensive Working Face ..... Hao Yun(167)

Research on the Electric Transmission System of the Power Car of the 160km/h Power Concentrated  
Rolling Stock with Permanent Magnet Direct Drive ..... Peng Xu, Xing Liang, Song Andong(169)

Application of "Two Plugging and One Injection" Hole Sealing Technology in Water Exploration and Release  
..... Jiang Ning(172)

Optimization and Application of Coal Mining Machine Dragging Cable Device ..... Liu Haosen(174)

Application of KGT9-D in Coal Mine Electromechanical Equipment ..... Zhang Xiu(176)

Application of Joint Support Technology in Fractured Rocks of Roadways ..... Cao Zhi(178)

Research on Intelligent Control of Multi-Motors in High Power Belt Conveyors ..... Yang Renwei(180)

Application of Rapid Installation Process of Coal Mining Machine in Header Working Face ..... Su Jianguo(183)

Application of Automatic Anti-Collision Device for Coal Mine Trackless Rubber Wheel Car ..... Fu Ligang(185)

Application of Adaptive Speed Control Mode for a Belt Conveyor ..... Li Jinkai(187)

Application of Intelligent Construction of Lanhua Baoxin Coal Excavation Workface ..... Li Dongdong(189)

Application of PLC-based Gas Extraction Monitoring System ..... Li Xuhao(191)

Application of Longitudinal Tear Protection Systems for Belt Conveyors at Header Workings ..... Song Jutao(194)

Application of Optimization of Roadway Support in Stress Zones ..... Cao Zhihui(196)

Research on the Support Technology for the Crushed Section of the Roof Slab in Roadway Excavation  
..... Hou Wenzhi(198)

Analysis and Research on Energy Saving Technology of Underground Ventilator in Coal Mine ..... Liu Qiang(200)

Design and Application of Water Unloading and Water Control Device for Water Exploration Borehole  
..... Yu Pengfei(202)

Application of Online Monitoring Technology for Mining Hoist ..... Zhang Zhuo(204)

Induction Rope Winch in Coal Mine Application and Optimization ..... Han Meimiao(206)

Application of Electric Control System for Coal Mine Roadheading Machine ..... Zhao Liang(208)

Research and Application of Fully Hydraulic Room and Pillar Type Temporary Support System  
Process for Door Frame ..... Xi Bingbing, Wang Dezhong, Wang Liyuan(211)

Application of Rapid Moving and Installation Technology for Header Mining Equipment ..... Tian Qing(213)

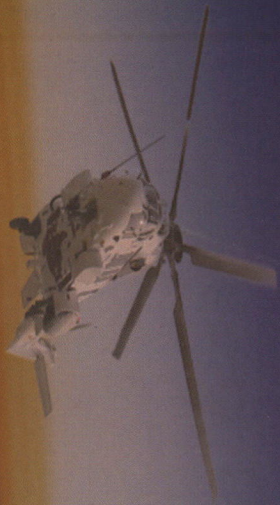

Establishment and Experimental Analysis of Dual Synthetic Power System for Belt Conveyor ..... Wu Jun(215)

Application of Mechanised Support Systems in Roadheading Operations ..... Zhao Gang(218)

Application of Remote Intelligent Control Technology for Header Diggers ..... Liu Jian(220)

Research on High Pressure Spray Dust Reduction Technology for Coal Mining Machine at Header Working Face  
..... Fan Shaofeng(222)

|                                                                                                                                                   |                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|
| Research on Wind Pressure Monitoring Control System of Mining Ventilation Fan .....                                                               | Kang Jiale(225)                                       |
| Application of Extended Prestressed Anchor Cable Support in Fractured Surrounding Rock ...                                                        | Wang Yanqing(227)                                     |
| Application of Cut-off Load Determination System for Roadheading Machine .....                                                                    | Zhao Xin(229)                                         |

创造美好生活 携手走向成功

山西成功通用航空股份有限公司位于山西省长治市，注册资本 1.5 亿，具有民航局批准的 CCAR-135 部、CCAR-91 部、CCAR-145 部资质，2015 年 12 月在“新三板”挂牌上市，为全国首家固定翼通用航空上市企业。公司下辖广州分公司和 1 家全资子公司、1 个 CCAR-145 部维修单位。

公司现有各型飞机 24 架，现有飞行人员 32 名，机务维修人员 30 名。主要服务于具有通用航空服务需求的政府部门、企事业单位及其他高端客户，主营人工影响天气、大气物理探测、应急救援、航空护林灭火、短途客运、飞行驾驶执照培训、空中游览、空中跳伞、体验飞行、航拍航测、公务机托管与地面服务代理等业务。
