3.5K镝灯具换代产品

上海圣亚照明有限公司

长寿命节能型3.5K镝灯具，是本公司研发的专利产品，它适用于建筑施工及高空作业的场所，投放上海市场一年多的时间里，客户反映良好，本公司新产品与老产品相比具有如下优点（见数据）：

1. 施工方便：采用一体化设计将镝灯、启动器、限流器、灯具主要部件构成一体，并预留电源输入接线端，不仅方便用户接线安装，同时还提高了工程施工效率。
2. 节能：老产品镇流器所产生的热能，在新产品中转换成光能，在照明效果相同的条件下，节电0.8~1.2千瓦/小时。
3. 寿命长：采用高电压、小电流设计，老产品工作电流：16-20A；新款灯具工作电流：7-8A，减轻了镝灯电极的烧损及灯泡内胆钨片电流密度过大的缺陷。使镝灯泡的使用寿命延长到3000小时。本产品按国家规定执行“三包”。
4. 价格低廉：由于新产品设计取消了镇流器，不仅成本降低60%。同时电源铜导线由6mm<sup>2</sup>降至2.5mm<sup>2</sup>，使每100m导线节省1000元。并解决了易过热燃烧的镇流器部件给工程带来的不安全隐患。

注：灯具安装尺寸是均布在Φ100圆周上的三个Φ13通孔。

# MAIN CONTENTS 英文要目

## 06 Building energy conservation showing remarkable results and bearing hard task

Year 2010 is an endgame of the 11th Five-Year Plan, as well as the 6th year of building energy conservation in full swing nationwide. During the past 6 years, the national building energy conservation has got remarkable results. Taking the development of residential heat metering and charging area in the north as example, during the 4 years of 2006-2009, it doubled yearly. Compared with 2008, in 2009, the area tripled up to 150 million m<sup>2</sup>. According to Qiu Baoxing, Vice Minister of Housing and Urban-Rural Development, if a national reform that concerns national welfare and the people's livelihood tripled, it is developed at great speed.

## 19 Unshattered battle fortress in mudrock flow

On September 4, heavy rain fell on Yingxiu Town that was thrashed by disasters of "May 12" Wenchuan earthquake and "August 14" mountain torrential mudrock flow. All these disasters couldn't stop the firm steps of aid construction of China Construction 7th Engineering Bureau 3rd Company. The Yingxiu Project Department overcame such difficulties as post-disaster complicated geological environment, strict traffic restrictions, inconvenient transportation of equipment and material, insufficient labor force, and held the ceremony of resumption of works in the baptism of heavy rain, thus recovered the construction and production completely, and fired the first shot of the tough fight to "resolutely complete the aid construction task, and pledge our life to build beautiful Yingxiu".

## 21 Take the innovative path, increase soft strength and enhance service level

According to the requirement of Suggestions as to Speed up and Push on Reforming, Developing Industry Association and Chamber of Commerce Quality and Standard by General Office of the State Council, "the industry association, under authorization, shall undertake industrial statistics, master domestic and foreign industrial development dynamics, collect and issue industrial information; implement consultation service concerning law, policy, technology, management and market; organize trainings of talent, technology, management and law regulations, help member enterprises to improve quality, increase innovation ability, improve management; participate in industrial quality certification, new technique promotion, accident recognition and relevant work; proactively assist enterprises in expanding international markets, establish industrial common platform, develop domestic and international economic and technological exchanges and collaboration, contact relevant international organizations, direct, specify and supervise member enterprise's foreign communications". In order to realize the above services, Beijing Construction Association actively seek for guidance and support from relevant agencies such as Beijing Municipal Commission of Housing and Urban-Rural Development, endeavor to improve self construction, solidly serve for healthy development of the industry and enterprises. The association's social influence keeps increasing.
