Vol.33 No.4

目 次

|                                   |                                   |
|-----------------------------------|-----------------------------------|
| 复杂边界稠油油藏蒸汽注采过程自适应网格法的研究 .....     | 施安峰, 王晓宏, 贾江涛, 郑晓磊(513)           |
| 高阶孤立波的速度场特征 .....                 | 胡子俊, 吴 卫, 刘 桦(521)                |
| 非线性弹性土中桩基的屈曲和后屈曲分析 .....          | 朱媛媛, 胡育佳, 程昌钧(526)                |
| 曝气反应器内流动特性的 PIV 试验研究 .....        | 李瑞芳, 邢世录, 田 瑞, 李春丽, 乔波波, 文佳龙(535) |
| “正本清源”在力学之数学及专业基础知识体系建立中的作用 ..... | 谢锡麟(544)                          |
| 高速列车空气动力制动装置气动噪声的数值模拟 .....       | 武 频, 陈 玮, 尚伟烈, 张 震, 高 升(558)      |
| 闭链双臂空间机器人动力学建模及变结构控制 .....        | 陈志煌, 陈 力(565)                     |
| 功能梯度声子晶体中纵波带隙分析 .....             | 高立名, 王居林(571)                     |
| 高温循环作用后混凝土力学性能试验研究 .....          | 陈有亮, 索晓航, 蒋立浩, 王 朋, 代明星(577)      |
| 锁骨三维有限元应力分析 .....                 | 杨晓霞, 许金泉, 张二虎(584)                |
| 一种基于摄动力的不完备模态扩充方法 .....           | 刘金玉, 姜建华(590)                     |
| 低渗透油藏非达西渗流动边界模型求解新方法 .....        | 姚 军, 刘文超(597)                     |
| 基于多点策略方法的超临界机翼性能优化 .....          | 叶 骏, 孙 刚(602)                     |
| 两种改进虚拟激励法比较及大跨结构的行波效应分析 .....     | 张 婷, 陈清军, 杨永胜(612)                |
| 基于塑性铰线方法的主圆支方 T 形节点研究 .....       | 马昕煦, 陈以一(620)                     |
| 平面远场受拉孔洞塑性区半径应变梯度解 .....          | 谢 翔, 张永强(628)                     |
| 漂浮基柔性关节空间机械臂模糊滑模控制及振动抑制 .....     | 谢立敏, 陈 力(635)                     |
| 含缺陷的方形网格扁球壳非线性自由振动分析 .....        | 丁卫君, 聂国华, 王 榕(642)                |
| CFRP 加固 H 型损伤钢梁的扩展有限元分析 .....     | 姜震宇, 王春江, 李向民, 许清风, 张卫海(649)      |
| 不规则波作用下风机单桩基础结构响应分析 .....         | 祈德庆, 崩兴峰(657)                     |
| 悬臂组合梁大挠度弯曲的挠度分析 .....             | 杨 骁, 刘 璐(665)                     |
| 基于神经网络的风机叶片叶尖翼型设计 .....           | 司景喆, 孙 刚(672)                     |
| 悼念副主编柳兆荣教授 .....                  | 本刊编辑部(679)                        |

|                                                                                                                                                                      |                                                                                 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|
| Adaptive Mesh Refinement Technique for the Simulations of the Steam Injection Processes in<br>Complex Boundary Reservoirs .....                                      | SHI An-feng, WANG Xiao-hong, JIA Jiang-tao, ZHENG Xiao-lei (513)                |
| Velocity Field of High Order Solitary Wave .....                                                                                                                     | HU Zi-jun, WU Wei, LIU Hua (521)                                                |
| Analysis of Buckling and Post-Buckling for Piles in Non-Linear Elastic Soils .....                                                                                   | ZHU Yuan-yuan, HU Yu-jia, CHENG Chang-jun (526)                                 |
| Experimental Study on Liquid Characteristics of the Aeration Reactor by Particle Image Velocimetry<br>.....                                                          | LI Rui-fang, XING Shi-lu, TIAN Rui, LI Chun-li, QIAO Bo-bo, WEN Jia-long (535)  |
| The Roles of "To Radically Reform & To Thoroughly Overhaul" in the Set Up of the Fundamental<br>Mathematical and Mechanical Knowledge Systems of the Mechanics ..... | XIE Xi-lin (544)                                                                |
| Numerical Simulation of Aerodynamic Noise Based on the Brake Device of High Speed Trains .....                                                                       | WU Pin, CHEN Wei, SHANG Wei-lie, ZHANG Xia, GAO Sheng (558)                     |
| Dynamic and Control for Dual-Arm Space Robot with Closed Chain .....                                                                                                 | CHEN Zhi-huang, CHEN Li (565)                                                   |
| Study of Band Gap of Longitudinal Wave in Functionally Graded Phononic Crystal .....                                                                                 | GAO Li-ming, WANG Ju-lin (571)                                                  |
| Experimental Study on Mechanical Properties of Concrete After Different High Temperature Cycles<br>.....                                                             | CHEN You-liang, SUO Xiao-hang, JIANG Li-hao, WANG Peng, DAI Ming-xing (577)     |
| Three-Dimensional Finite Element Stress Analysis of Clavicle .....                                                                                                   | YANG Xiao-xia, XU Jin-quan, ZHANG Er-hu (584)                                   |
| Incomplete Modal Expansion Method Using Perturbed Force .....                                                                                                        | LIU Jin-yu, JIANG Jian-hua (590)                                                |
| New Method for Solution of the Model of Non-Darcy Seepage Flow in Low-Permeability Reservoirs<br>with Moving Boundary .....                                          | YAO Jun, LIU Wen-chao (597)                                                     |
| Supercritical Wing Aerodynamic Optimization Based on Multi-Strategy Method .....                                                                                     | YE Jun, SUN Gang (602)                                                          |
| Comparison Between Two Improved Pseudo-Excitation Methods and Analysis of Long-Span Structural<br>Travelling Wave Effects .....                                      | ZHANG Ting, CHEN Qing-jun, YANG Yong-sheng (612)                                |
| Study on the T-Joint with CHS Chord and RHS Brace Based on Yield Line Method .....                                                                                   | MA Xin-xu, CHEN Yi-yi (620)                                                     |
| Strain Gradient Plasticity Solutions of Plastic Region Radius for a Borehole Problem .....                                                                           | XIE Xiang, ZHANG Yong-qiang (628)                                               |
| Fuzzy Sliding Mode Control and Vibration Suppression of Free-Floating Flexible-Joint Space Manipulator<br>.....                                                      | XIE Li-min, CHEN Li (635)                                                       |
| Analysis of Non-Linear Free Vibration of Squarely-Latticed Shallow Spherical Shells with Geometrical<br>Imperfections .....                                          | DING Wei-jun, NIE Guo-hua, WANG Rong (642)                                      |
| Extended Finite Element Analysis on H-Shaped Damage Steel Beam Strengthened with CFRP .....                                                                          | JIANG Zhen-yu, WANG Chun-jiang, LI Xiang-min, XU Qing-feng, ZHANG Wei-hai (649) |
| Analysis on the Offshore Wind Turbine Under Wave Load .....                                                                                                          | QI De-qing, BENG Xing-feng (657)                                                |
| Deflection Analysis of Cantilever Composite Beam for Large Deflection Bending .....                                                                                  | YANG Xiao, LIU Lu (665)                                                         |
| Design of the Wind Turbine Blade Airfoil Based on SOM .....                                                                                                          | SI Jing-zhe, SUN Gang (672)                                                     |
| To Lament for Professor LIU Zhao-rong, the Deputy Chief Editor .....                                                                                                 | The Editorial Staff (679)                                                       |
