|                                                                                                                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Electromechanical phase transition of a dielectric elastomer tube under internal pressure of constant mass<br><i>S. Che, T. Lu, T.J. Wang</i>                                                                         | 121 |
| Effect of negative permeability on elastic wave propagation in magnetoelastic multilayered composites<br><i>W. Wang, Y.Q. Guo, W.Q. Chen</i>                                                                          | 126 |
| Buckling of thin gel strip under swelling<br><i>R. Jiang, J. Xiao, J. Song</i>                                                                                                                                        | 134 |
| Pressure induced by the interaction of water waves with nearly equal frequencies and nearly opposite directions<br><i>L. Pellet, P. Christodoulides, S. Donne, C.J. Bean, F. Dias</i>                                 | 138 |
| Analysis of wave propagation in a functionally graded nanobeam resting on visco-Pasternak's foundation<br><i>M. Arefi, A.M. Zenkour</i>                                                                               | 145 |
| Bending of functionally graded nanobeams incorporating surface effects based on Timoshenko beam model<br><i>L. Yang, T. Fan, L. Yang, X. Han, Z. Chen</i>                                                             | 152 |
| Numerical study of the influence of spoiler deflection on high-lift configuration<br><i>W. Wang, P. Liu</i>                                                                                                           | 159 |
| Calculating buoy response for a wave energy converter—A comparison of two computational methods and experimental results<br><i>L. Sjökvist, M. Göteman, M. Rahm, R. Waters, O. Svensson, E. Strömstedt, M. Leijon</i> | 164 |
| Anisotropic cell growth-regulated surface micropatterns in flower petals<br><i>X. Huang, Y. Hai, W.-H. Xie</i>                                                                                                        | 169 |
| Revolving scheme for solving a cascade of Abel equations in dynamics of planar satellite rotation<br><i>S.V. Ershkov</i>                                                                                              | 175 |
