CONTENTS

Review

- Quantitative characterization of deformation and damage process by digital volume correlation: A review
F. Xu 84
- Forced vibration analysis of nano-composite rotating pressurized microbeam reinforced by CNTs based on MCST with temperature-variable material properties
R. Rostami, M. Mohammadimehr, M. Ghannad, A. Jalali 98
- A new equivalent method to obtain the stoichiometric fuel-air cloud from the inhomogeneous cloud based on FLACS-dispersion
Y.L. Zhang, Y.X. Cao, L.Z. Ren, X.S. Liu 110

Solid Mechanics

- Sound absorption characteristic of micro-helix metamaterial by 3D printing
N.S. Gao, H. Hou 63
- An analysis of dynamic stability of an elastic column
M. Jin 68
- Local buckling of thin plate on tensionless elastic foundations under interactive uniaxial compression and shear
J.H. Dong, X. Ma, Y. Zhuge, J.E. Mills 75
- An improved model for predicting effective Young's modulus of the twisted structure under cyclic loading: taking into account the untwisting effect
H.X. Cui, D.H. Yue, X.Y. Zhang, Y.H. Zhou 133
- An improved wall shear stress measurement technique using sandwiched hot-film sensors
X.H. Liu, Z.Y. Li, N. Gao 138

Fluid Mechanics

- Numerical simulation of the self-propulsive motion of a fishlike swimming foil using the δ^+ -SPH model
P.N. Sun, A. Colagrossi, A.M. Zhang 116
- Effect of neat and reinforced polyacrylonitrile nanofibers incorporation on interlaminar fracture toughness of carbon/epoxy composite
S.M.J. Razavi, R.E. Neisiany, S.N. Khorasani, S. Ramakrishna, F. Berto 127
