CONTENTS

Design of elliptical underwater acoustic cloak with truss-latticed pentamode materials <i>Y.Y. Ge, X.N. Liu, G.K. Hu</i>	221
On the number of fractured segments of spaghetti breaking dynamics <i>Y. Zhang, X. Li, Y.F. Dai, B.H. Sun</i>	227
Independent component analysis of streamwise velocity fluctuations in turbulent channel flows <i>T. Wu, G.W. He</i>	233
Mathematical modeling of fractional derivatives for magnetohydrodynamic fluid flow between two parallel plates by the radial basis function method <i>S. Hosseinzadeh, S. M. Emadi, S. M. Mousavi, D. D. Ganji</i>	241
Motion of a sphere and the suspending low-Reynolds-number fluid confined in a cubic cavity <i>G.F. Chen, X.K. Jiang</i>	251
Investigation of nanofluid flow in a vertical channel considering polynomial boundary conditions by Akbari-Ganji's method <i>M. F. Najafabadi, H. TalebiRostami, K. Hosseinzadeh, D.D. Ganji</i>	257
A new dynamic subgrid-scale model using artificial neural network for compressible flow <i>H. Qi, X.L. Li, N. Luo, C.P. Yu</i>	267
Hydrothermal analysis of non-Newtonian fluid flow (blood) through the circular tube under prescribed non-uniform wall heat flux <i>S. Faghiri, S. Akbari, M. B. Shafii, K. Hosseinzadeh</i>	275
Stirring by anisotropic squirming <i>Z. Lin, S.R. Zhu, L.Y. Ding</i>	286
An alternative form of energy density demonstrating the severe strain-stiffening in thin spherical and cylindrical shells <i>M. M. Lateefi, D. Kumar, S. Sarangi</i>	294
