CONTENTS

Academician View

Development and innovation practice of China coal mining technology and equipment for 50 years: Commemorate the 50th anniversary of the publication of <i>Coal Science and Technology</i>
Mechanical principle and mining methods of automagical entry formation without coal pillars
Hydraulic fracturing technology with directional boreholes for strata control in underground coal mines and its
application ······ KANG Hongpu, FENG Yanjun, ZHANG Zhen, et al (31)
New opportunities for coal industry transformation and development under the background of the level of a moderately developed country and a new "dual control" system
New energy exploitation in coal-endowed areas under the target of "double carbon": a new path for
transformation and upgrading of coal mines in the future
Mining Science and Engineering
Development of strata movement and its control in underground mining: In memory of 40 years of Voussoir Beam Theory proposed by Academician Minggao Qian ····································
Analysis of overburden structure and evolution characteristics of hard roof mining in extremely thick coal
seam ······ YU Bin, KUANG Tiejun, YANG Jingxuan, et al (95) Dip effect of stress transfer and structural instability mechanism of coal-rock combination ······
Research progress on stability control of surrounding rock in weakly cemented strata engineering in western
China mining area ····· JI Hongguang, SUN Lihui, SONG Zhaoyang, et al (117)
Current situation of gob-side entry retaining and suggestions for its improvement in China
······································
Distributed optical fiber measurement of floor heave evolution in mining roadway
Research on surrounding rock control technology of deep roadway based on butterfly failure theory
New progress in theory and technology of electromagnetic radiation in coal and rock
HE Xueqiu, WEI Menghan, SONG Dazhao, et al (168)
Geo-dynamic division and its application in study of rock burst
ZHANG Hongwei, LI Sheng, HAN Jun, et al (191)
Discussion on key problems in prevention and control system of coal mine rock burst
Difference and mechanism of dynamic behaviors between two walls of normal fault
Development history and new technology research progress of rock roadway blasting excavation in coal mines
in China ····································
Application and research progress of TBM tunneling in coal mine roadway ······
······ LIU Quansheng, HUANG Xing, PAN Yucong, et al (242)
Comprehensive treatment technology for wellbore deflection in thick loose bed and thin bedrock formation
CHENG Hua, PENG Shilong, YAO Zhishu, et al (260)
Research on technology and equipment system of large diameter shaft drilling based on gravity slagging
······ LIU Zhiqiang, SONG Zhaoyang, CHENG Shouye, et al (272)

Safety Science and Engineering

Experimental study on damage characteristics and energy evolution of coal by ultrasonic power
LI Shugang, WANG Ruizhe, LIN Haifei, et al (283)
Prevention and control of deep dynamic disasters and resources green exploitation in Pingdingshan Mining
Area ······ ZHANG Jianguo, WANG Man, ZHANG Guochuan, et al (295)
Effect of gas on microstructure and thermal reactivity of coal during low temperature oxidation
Research progress of mine intelligent ventilation theory and technology
Research progress on fly ash foundation technology to prevent and control spontaneous combustion of coal in
mines
Earth Science and Surveying
Review of research on definition, distribution and causes of abnormal coalbed methane composition
······ FU Xuehai, XU Hanghang, WANG Qiang, et al (343)
Experimental study on stress-permeability of high rank coal samples before and after hydraulic fracturing
······ MENG Zhaoping, LU Yixin (353)
Study on time function of seismic source and numerical simulation data impulse processing of seismic while
driving in mining
Full-time and space early-warning method for floor water inrush in working face based on microseismic
monitoring ······ XU Yanchun, HUANG Lei (369)
Hydrochemical characteristics and formation mechanism of groundwater in Yushenfu Mining Area
FAN Limin, MA Wanchao, CHANG Bofeng, et al (383)
Study on risk assessment model of coal mine water accident induced by flood disaster
Passarah status and prespect on mining damage characteristics and protective technology of high rice
Research status and prospect on mining damage characteristics and protective technology of high-rise structures ······ GUO Wenbing, ZHAO Gaobo, MA Zhibao, et al (403)
Research status and countermeasures of coordinated development of coal mining and cultivated land protection
in the plain coal-cropland overlapped areas ·········· <i>GUO Guangli</i> , <i>LI Huaizhan</i> , <i>ZHA Jianfeng</i> , <i>et al</i> (416)
Mechatronics and Intelligence
Research on key generic technology of multi-arm intelligent coal gangue sorting robot ······
Dynamic response characteristics analysis of four column chock shield support under impact load ·······
ZENG Qingliang, XU Penghui, MENG Zhaosheng, et al (437)
Precise identification method of mine hoist fault source based on MFCC-CS-MUSIC
Research on method of acquiring high quality coal gangue images under multi-factor illumination condition
Research on intelligent dual prevention mechanism and intelligent security control platform of coal mine
Coal Processing and Environment Engineering
Opportunities and challenges of land reclamation and ecological restoration in mining areas under carbon neutral
target ······ HU Zhenqi, LI Yuanyuan, LI Gensheng, et al (474)
Technology and application of damage reduction mining and ecosystem restoration of open-pit coal mines in
eastern grassland area ······ LI Quansheng, LI Lin (484)
Mechanisms of shear tension resistance of root-soil complexes by inoculated bacteria and potential for
ecological restoration in mines ······ BI Yinli, LUO Rui, KE Zengming, et al (493)
Mechanism, potential and regulation of carbon sequestration and sink enhancement in ecological restoration of
mining areas in the Loess Plateau
Future of circulating fluidized bed combustion technology in China for carbon neutralization
Coal mine drainage resources utilization technology innovation
Coal mine drainage resources utilization technology innovation
Carbon emission accounting and carbon reduction analysis for deep coal underground gasification to hydrogen ··
LIU Shuqin, LIU Huan, JI Yutong, et al (531)
LIO DIUGII, LIO IIUUI, DI IUUIIZ, EI UI (JJI)
